- B. Only endpoints registered to VCS or Expressway can be scheduled in conferences by TMS.
- C. The MAC address of the endpoint must be entered in the System > Manage Dial Plan menu.
- D. The Cisco UCM must have a SIP trunk directed at TMS.

Answer: A

Explanation:

- * To schedule endpoints that are registered to the Cisco UCM to conferences using TMS, the Cisco UCM must first be added to a folder in TMS Systems > Navigator.
- * This is because TMS needs to discover the endpoints that are registered to the Cisco UCM and import them into its database.
- * To add the Cisco UCM to a folder in TMS Systems > Navigator, the following steps are required:
- * Navigate to Systems > Navigator in TMS and select a folder where you want to add the Cisco UCM.
- * Click Add Systems and select Unified CM from the drop-down menu.
- * Enter the IP address or hostname of the Cisco UCM publisher server, the username and password of the application user, and the SIP domain of the Cisco UCM.
- * Click Save.
- * TMS will then connect to the Cisco UCM and discover the endpoints that are registered to it. The endpoints will appear under the Unified CM node in the folder.
- * The endpoints can then be scheduled to conferences using TMS.
