So candidates can use our CBCI guide questions immediately after their purchase is the great advantage of our product. The language is easy to be understood makes any learners have no obstacles. The CBCI Test Torrent is suitable for anybody no matter he or she is in-service staff or the student, the novice or the experience people who have worked for years. The software boosts varied self-learning and self-assessment functions to check the results of the learning.

BCI Certificate of the Business Continuity Institute (CBCI) Sample Questions (Q89-Q94):

NEW QUESTION # 89

Which of the following is a way to ensure that personnel remain committed to Business Continuity and to protecting the organization from the effects of disruption?

- A. Making it a disciplinary offence for personnel to miss relevant Business Continuity meetings and training events
- B. Holding annual assessments of Business Continuity knowledge and understanding and setting minimum pass standards which personnel must meet
- C. Providing updates on Business Continuity activities via the intranet which personnel can find and read if they are interested
- D. Including Business Continuity as part of the introduction to meetings and events in order to strengthen and maintain the relationship between personnel and the organization

Answer: D

Explanation:

To foster commitment, Business Continuity must be embedded in the daily organizational culture, not merely treated as an administrative requirement or compliance exercise. The CBCI 7.0 course highlights that including Business Continuity topics in the introductions to meetings and events encourages ongoing dialogue and reinforces its importance. This practice nurtures a sense of shared responsibility and engagement, which is more effective than punitive measures or passive communication. Embedding Business Continuity in routine interactions helps personnel internalize its significance, promotes continual awareness, and strengthens their relationship with the organization's resilience goals. This proactive, inclusive approach ensures commitment is sustained over time, improving response effectiveness during disruptions.

NEW QUESTION # 90

Which of the following factors affects the way in which an organization selects and combines the different types of Business Impact Analysis (BIA)?

- A. The outcomes of an organization's risk assessment to determine which part of the organization is at greatest risk
- B. Consultation with internal and external stakeholders on the extent of analysis that is required
- C. The outcomes of a gap analysis to identify where there is greatest need for Business Continuity capability to be improved
- D. The scope of the Business Continuity Management System (BCMS)

Answer: D

Explanation:

The CBCI 7.0 course explains that the scope of the BCMS is the primary factor influencing the selection and combination of BIA types (e.g., activity, product, or process BIAs). The scope defines which organizational units, activities, and resources are covered, thereby guiding the level and focus of impact analysis. While risk assessments, gap analyses, and stakeholder consultations inform aspects of BCMS development, they do not determine the BIA methodology as directly as the defined scope. Aligning BIAs to scope ensures consistency and resource-effective analysis.

Reference: CBCI 7.0 Study Guide, Module 3: Business Impact Analysis, pages 43-45.

NEW QUESTION # 91

Which of the following would be the most effective and motivating way to share information that is intended to influence personnel to embrace Business Continuity?

- A. Send all information via email or the intranet on the assumption that this will be everyone's preferred, and most convenient, form of communication
- B. Provide detailed explanations on all of the organization and set regular tests to ensure that personnel are taking sufficient interest
- C. Use language that is clear and easily accessible to all when producing documents, presentations or training materials
- D. Ensure that attendance at meetings is recorded and reflected in the staff performance appraisals

Answer: C

Explanation:

The CBCI 7.0 course highlights that the most effective way to motivate personnel is through clear, accessible, and engaging communication. Materials should be understandable regardless of role or background, avoiding jargon and complexity. This clarity facilitates comprehension and fosters genuine interest in Business Continuity. Detailed explanations and testing may overwhelm or alienate, while relying solely on email or intranet assumes preferences that may not be universal. Recording attendance links to compliance rather than motivation. Tailoring communication style and delivery to audience needs maximizes engagement and encourages embracement.

Reference: CBCI 7.0 Study Guide, Module 4: Communication and Engagement, pages 71-74.

NEW QUESTION # 92

In relation to Solutions Design, a gap analysis is used to determine whether:

- A. The results of an external audit are justified in terms of internal evidence of Business Continuity achievements
- **B. New strategies and solutions are in order to meet Business Continuity requirements**
- C. The organization is performing at its optimum financial level
- D. Personnel are embracing Business Continuity sufficiently well to deliver Business Continuity requirements

Answer: B

Explanation:

A gap analysis is a critical evaluation tool used in the Solutions Design phase to identify differences between existing Business Continuity capabilities and what is required to achieve organizational resilience. The CBCI 7.0 course specifies that this analysis determines if new or revised strategies and solutions are needed to meet Business Continuity requirements effectively. By comparing current states with desired outcomes, the gap analysis highlights areas lacking adequate controls, resources, or processes. It drives decision-making for prioritizing improvements and investments in continuity measures. This systematic assessment ensures that Business Continuity strategies are fit for purpose and aligned with evolving risks and business objectives. It is not focused on financial performance or audit justifications but on actionable capability enhancements.

Reference: CBCI 7.0 Study Guide, Module 5: Solutions Design and Gap Analysis, pages 95-99.

NEW QUESTION # 93

In order to enable Business Continuity solutions, it is necessary to:

- A. Create guidance documents that detail response activities and procedures that specific teams need to follow
- B. Measure capabilities to deliver the solutions by carrying out a gap analysis
- C. Carry out a review of the Business Continuity policy to ensure that it is updated with the detail of the agreed solutions
- **D. Establish and implement a strategy to ensure that business objectives are aligned to the agreed solutions**

Answer: D

Explanation:

The CBCI 7.0 course emphasizes that establishing and implementing a strategy aligned with business objectives is fundamental to enabling Business Continuity solutions. Business Continuity solutions must not only be technically sound but also directly support the organization's goals and priorities. Alignment ensures that continuity efforts contribute meaningfully to sustaining critical operations and delivering value during and after disruptions. This strategic approach drives resource allocation, prioritizes recovery efforts, and integrates continuity planning into broader organizational frameworks. While gap analyses, guidance documents, and policy reviews support solution enablement, without strategic alignment solutions risk being disconnected from business needs and may fail to gain management support or achieve desired outcomes.
