

Quiz 2025 Cisco 350-401: Accurate Hottest Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Certification

DOWNLOAD the newest ExamsTorrent 350-401 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1p0kWA3ACRChOAn2cCO7NTNZYkgk8Oepi>

According to various predispositions of exam candidates, we made three versions of our 350-401 study materials for your reference: the PDF, Software and APP online. And the content of them is the same though the displays are different. Untenable materials may waste your time and energy during preparation process. But our 350-401 Practice Braindumps are the leader in the market for ten years. As long as you try our 350-401 exam questions, we believe you will fall in love with it.

Cisco 350-401, also known as Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR), is a certification exam that tests candidates' knowledge of enterprise networking technologies. 350-401 exam is designed to validate a candidate's skills in implementing and troubleshooting core enterprise network technologies. Passing 350-401 exam will help candidates to earn the Cisco Certified Network Professional (CCNP) Enterprise certification.

Cisco 350-401: Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) exam is an essential certification exam for network professionals who want to advance their careers in the field of enterprise networking. It covers various topics related to enterprise network technologies and requires candidates to have a deep understanding of network design, automation, security, virtualization, and network infrastructure. Passing 350-401 Exam is a crucial step towards obtaining the CCNP Enterprise certification and advancing one's career in the field of enterprise networking.

Hottest 350-401 Certification - Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Realistic 100% Pass Quiz

You can take Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) practice exams (desktop and web-based) of ExamsTorrent multiple times to improve your critical thinking and understand the Cisco 350-401 test inside out. ExamsTorrent has been creating the most reliable Cisco Dumps for many years. And we have helped thousands of Cisco aspirants in earning the Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) (350-401) certification.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q366-Q371):

NEW QUESTION # 366

```
monitor session 11 type erspan-source
source interface GigabitEthernet3
destination
  erspan-id 12
ip address 10.10.10.10
origin ip address 10.100.10.10
```

Refer to the exhibit. Which command set completes the ERSPAN session configuration?

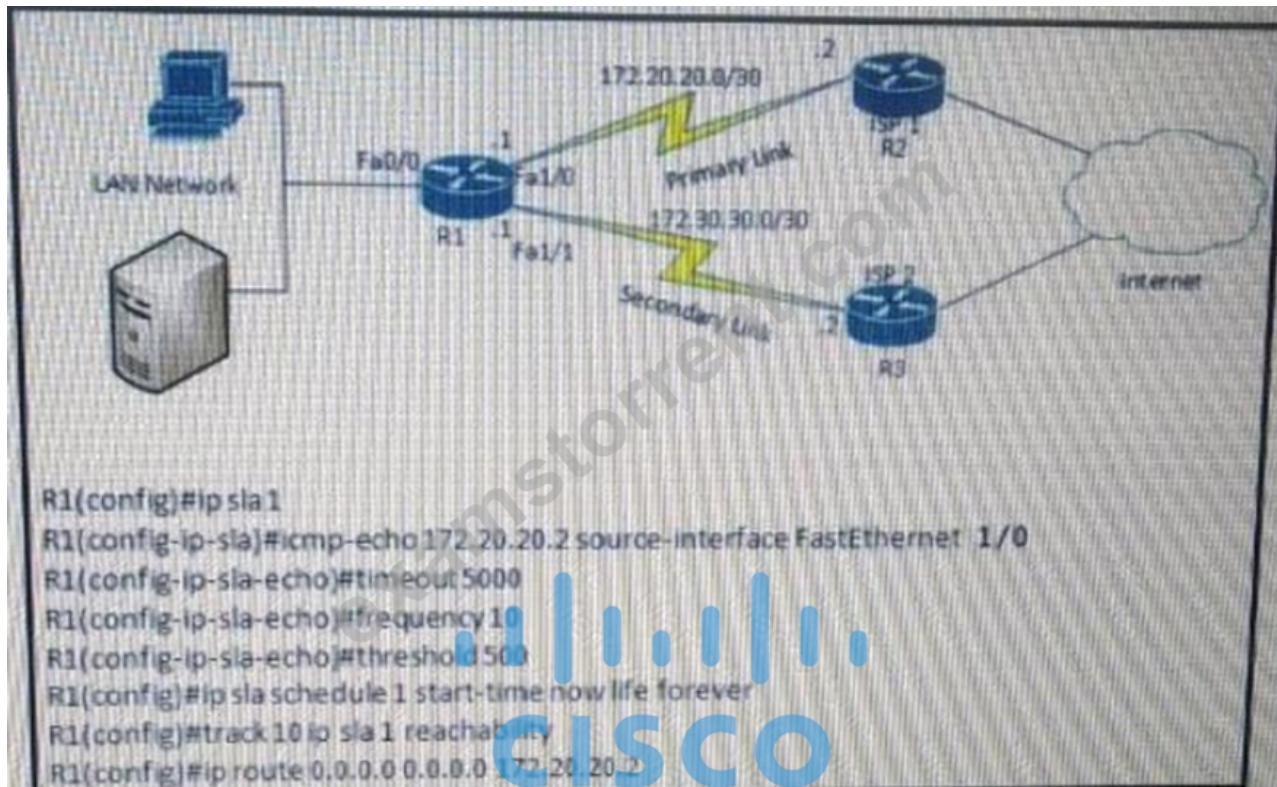

- ☐ monitor session 12 type erspan-destination
destination interface GigabitEthernet4
source
 erspan-id 12
 ip address 10.10.10.10
- ☐ monitor session 11 type erspan-destination
destination interface GigabitEthernet4
source
 erspan-id 12
 ip address 10.100.10.10
- ☐ monitor session 11 type erspan-destination
destination interface GigabitEthernet4
source
 erspan-id 11
 ip address 10.10.10.10
- ☐ monitor session 12 type erspan-destination
destination interface GigabitEthernet4
source
 erspan-id 11
 ip address 10.10.10.10

- A. Option A
- B. Option B
- C. Option D
- D. Option C

Answer: A

NEW QUESTION # 367

Refer to the exhibit.

After implementing the configuration 172.20.20.2 stops replying to ICMP echoes, but the default route fails to be removed. What is the reason for this behavior?

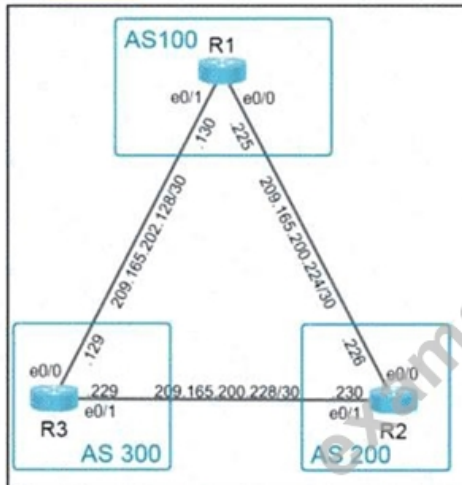

- A. The threshold value is wrong.
- B. The destination must be 172.30.30.2 for icmp-echo
- C. The source-interface is configured incorrectly.
- D. The default route is missing the track feature

Answer: D

Explanation:

The issue described indicates that even though 172.20.20.2 stops responding to ICMP echoes, the default route does not get removed as expected. This suggests a problem with the tracking configuration of the route. The correct implementation should include associating the tracked object with the routing configuration so that if the tracked object goes down, it triggers the removal of the associated route. Since option C points out that the default route lacks this association with tracking, it is identified as the cause of the issue.

NEW QUESTION # 368

Configure R1 according to the topology to achieve these results:

1. Configure eBGP using Loopback 0 for the router-id. Do not use the address-family command to accomplish this.
2. Advertise R1's Loopback 100 and Loopback 200 networks to AS200 and AS300.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

Solution:

Solution on R1:

```
R1#sh run | s bgp
router bgp 100
  bgp router-id 10.1.1.1
  bgp log-neighbor-changes
  network 209.165.201.1 mask 255.255.255.255
  network 209.165.201.2 mask 255.255.255.255
  neighbor 209.165.200.228 remote-as 200
  neighbor 209.165.202.129 remote-as 300
```

R1# copy run start

Verification:

```

R1#sh ip bgp su
BGP router identifier 10.1.1.1, local AS number 100
BGP table version is 3, main routing table version 3
2 network entries using 288 bytes of memory
2 path entries using 168 bytes of memory
1/1 BGP path/bestpath attribute entries using 160 bytes of memory
0 BGP route-map cache entries using 0 bytes of memory
0 BGP filter-list cache entries using 0 bytes of memory
BGP using 616 total bytes of memory
BGP activity 2/0 prefixes, 2/0 paths, scan interval 60 secs

Neighbor      V   AS MsgRcvd MsgSent   TblVer  InQ OutQ
Up/Down State/PfxRcd
209.165.200.226 4   200      8      6        3    0    0
00:00:51      0
209.165.202.129 4   300      6      6        3    0    0
00:01:23      0
R1#

```

OR

NEW QUESTION # 369

Refer to the exhibit.

```

Router1#telnet 192.168.1.1
% telnet connections not permitted from this terminal

```

An engineer attempts to connect to another device from Route1's console port. Which configuration is needed to allow telnet connections?

- ☐ Router1(config)# access-list 100 permit tcp any any eq telnet
Router1(config)# line console 0
Router1(config-line)# access-class 100 in
- ☐ Router1(config)# access-list 100 permit tcp any any eq telnet
Router1(config)# line vty
Router1(config-line)# access-class 100 out
- ☐ Router1(config)# line vty 0 15
Router1(config-line)# transport output telnet
- ☐ Router1(config)# line console 0
Router1(config-line)# transport output telnet

- A. Option B
- B. Option A
- C. Option D
- D. Option C

Answer: A

NEW QUESTION # 370

How does EIGRP differ from OSPF?

- A. EIGRP has a full map of the topology, and OSPF only knows directly connected neighbors
- **B. EIGRP supports equal or unequal path cost, and OSPF supports only equal path cost.**
- C. EIGRP is more prone to routing loops than OSPF
- D. EIGRP uses more CPU and memory than OSPF

Answer: B

Explanation:

Explanation

OSPF maintains information about all the networks and running routers in its area. Each time there is a change within the area, all routers need to re-sync their database and then run SPF again. This process makes it more CPU intensive. EIGRP, on the other hand, has triggered and incremental updates. Therefore EIGRP is more efficient in terms of CPU usage and memory.

NEW QUESTION # 371

.....

Our ExamsTorrent has devoted more time and efforts to develop the 350-401 exam software for you to help you successfully obtain 350-401 exam certification with less time and efforts. Our promise of "no help, full refund" is not empty talk. No matter how confident we are in our dumps, once our dumps do not satisfy you or have no help for you, we will immediately full refund all your money you purchased our 350-401 Exam software. However, we believe that our 350-401 exam software will meet your expectation, and wish you success!
