

# Quiz 2025 Fantastic VMware 2V0-11.25: VMware Cloud Foundation 5.2 Administrator Hottest Certification

P.S. Free & New 2V0-11.25 dumps are available on Google Drive shared by Actual4test: [https://drive.google.com/open?id=1xVksRMaR-cIdpH2u642hwDJZZoHKzJ\\_B](https://drive.google.com/open?id=1xVksRMaR-cIdpH2u642hwDJZZoHKzJ_B)

The design of our 2V0-11.25 guide training is ingenious and delicate. Every detail is perfect. For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study 2V0-11.25 exam questions in a concise and undisturbed environment. In addition, you will find a lot of small buttons, which can give you a lot of help. Some buttons are used to hide or show the answer. What's more important is that we have spare space, so you can take notes under each question in the process of learning 2V0-11.25 Study Tool. When you start, there will be a timer to help you to time, so that you can finish the problem within the prescribed time and it can create an environment. If you are satisfied with our 2V0-11.25 exam questions, you can make a choice to purchase them.

## VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network</li> <li>• storage design.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.</li> </ul>

## 2V0-11.25 New Dumps Ppt, 2V0-11.25 Valid Test Simulator

In fact, many candidates have the willing and ambition to pass the 2V0-11.25 exam and achieve the certification for they want to challenge themselves to become better. The efficiency of going it alone is very low, and it is easy to go to a dead end. You really need a helper. Take a look at the development of 2V0-11.25 Guide quiz and you will certainly be attracted to it. The advantages of 2V0-11.25 study materials are numerous and they are all you need!

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q17-Q22):

### NEW QUESTION # 17

An administrator is troubleshooting a high CPU usage issue of the SDDC Manager VM. Access to SDDC Manager UI is exhibiting degraded performance.

What two steps should the administrator take to diagnose the issue? (Choose two.)

- A. Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted.
- B. Reconfigure the DRS settings to be more aggressive in load balancing.
- C. Upgrade the vSphere version to the latest release.
- D. Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU.
- E. Reboot the SDDC Manager VM to clear any temporary issues.

**Answer: A,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When troubleshooting high CPU usage on the SDDC Manager VM, the recommended diagnostic steps are:

Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU (B): The official documentation instructs administrators to use system monitoring commands such as top or htop within the SDDC Manager appliance to determine if specific processes or services are causing elevated CPU usage. This helps pinpoint the root cause inside the VM.

Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted (D): High CPU usage within the SDDC Manager VM could also result from overall CPU contention on the physical ESXi hosts. Checking host-level CPU usage can help determine if the underlying infrastructure is contributing to the performance issue. The documentation emphasizes reviewing host resource metrics to ensure the management cluster is not overcommitted.

Other options such as rebooting the VM, upgrading vSphere, or modifying DRS settings are not recommended as initial diagnostic steps according to official guidance. Rebooting or changing configurations without proper analysis may disrupt services or not address the root cause.

### NEW QUESTION # 18

Match each vSphere HA host state issue with its troubleshooting step.

Issues		Troubleshooting Steps
Host in Isolation Response		Verify network connectivity and HA isolation response settings
Host in Failover State		Ensure host is powered on and network is properly configured
Host in Unreachable State		Wait for HA to complete its initialization or check logs for errors
Host in Initialization State		Check for sufficient resources on remaining hosts

**Answer:**

Explanation:

Issues		Troubleshooting Steps
Host in Isolation Response	Host in Isolation Response	Verify network connectivity and HA isolation response settings
Host in Failover State	Host in Unreachable State	Ensure host is powered on and network is properly configured
Host in Unreachable State	Host in Initialization State	Wait for HA to complete its initialization or check logs for errors
Host in Initialization State	Host in Failover State	Check for sufficient resources on remaining hosts

### NEW QUESTION # 19

What are three prerequisites for deploying an NSX Edge cluster in a VMware Cloud Foundation (VCF) solution? (Choose three.)

- A. Install Aria Operations and enable Edge Cluster monitoring.
- B. Set up vSAN storage policies for the Edge VMs.
- C. Verify that the NSX host overlay VLAN and NSX Edge overlay VLAN are routed to each other.
- D. Use separate VLAN IDs and subnets for the NSX host overlay and NSX Edge overlay networks.
- E. Create DNS entries for the NSX Edge nodes.
- F. Configure BGP as a dynamic routing protocol on the physical switches.

**Answer: C,D,E**

Explanation:

The NSX host overlay VLAN and NSX Edge overlay VLAN must be routed to each other so Edge nodes can establish overlay tunnels with transport nodes.

DNS A records for each NSX Edge node are required for name resolution during deployment and operation.

NSX requires distinct VLAN IDs and subnets for the host overlay network (transport nodes) and the Edge overlay network to segregate traffic and avoid IP space conflicts.

<https://techdocs.broadcom.com/us/en/vmware-cis/vcf/vcf-5-2-and-earlier/5-2/map-for-administering-vcf-5-2/deploying-nsx-edge-clusters-admin/prerequisites-for-an-nsx-edge-cluster-admin.html>

### NEW QUESTION # 20

Which two SDDC Manager operations can be executed on an NSX Edge cluster after it has been deployed? (Choose two.)

- A. Shrink
- B. Expand
- C. Delete
- D. Sync

- E. Redeploy

Answer: C,D

Explanation:

After an NSX Edge cluster has been deployed, you can perform a sync operation to ensure the NSX Edge cluster is in sync with the configuration in SDDC Manager.

Deleting an NSX Edge cluster can be done after it has been deployed if it is no longer required or needs to be removed from the environment.

**NEW QUESTION # 21**

Arrange the steps in the correct order to resolve host connectivity issues.

Test connectivity using ping and traceroute.	Review network switch configuration and logs.	Verify the network configuration on the ESXi host.	Check the physical network connections.	Restart the network management services on the host.
Step 1	Step 2	Step 3	Step 4	Step 5

Answer:

Explanation:

Test connectivity using ping and traceroute.	Review network switch configuration and logs.	Verify the network configuration on the ESXi host.	Check the physical network connections.	Restart the network management services on the host.
Step 1	Step 2	Step 3	Step 4	Step 5

Check the physical network connections.	Test connectivity using ping and traceroute.	Verify the network configuration on the ESXi host.	Review network switch configuration and logs.	Restart the network management services on the host.
Step 1	Step 2	Step 3	Step 4	Step 5

**NEW QUESTION # 22**

.....

Now you can think of obtaining any VMware certification to enhance your professional career. Actual4test's study guides are your best ally to get a definite success in 2V0-11.25 exam. The guides contain excellent information, exam-oriented questions and answers format on all topics of the certification syllabus. With 100% Guaranteed of Success: Actual4test's promise is to get you a wonderful success in 2V0-11.25 Certification exams. Select any certification exam, 2V0-11.25 dumps will help you ace it in first attempt. No more cramming from books and note, just prepare our interactive questions and answers and learn everything necessary to easily pass the actual 2V0-11.25 exam
