Which platform should you recommend?

- A. Hadoop
- B. Kubernetes
- C. Hortonworks Data Platform
- D. OpenStack Neutron

Answer: B

Explanation:

Understanding the Requirements:

The customer needs an open-source container orchestration system.

It must support cloud-native applications.

It should provide support for containers with persistent storage.

Platform Options:

Hortonworks Data Platform (A): This is primarily focused on big data and Hadoop-based applications, not on container orchestration.
