At FreeDumps, we stand behind our Oracle 1Z0-1111-25 Exam Questions and offer a money-back guarantee in the event of failure. We are confident that our Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) exam questions and practice test engine will provide you with all the information and tools you need to pass the exam with flying colors. Plus, for a limited time, we are offering a 20% discount on your purchase. Don't wait – invest in your future and advance your career with FreeDumps today.

Oracle 1Z0-1111-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Respond to Cloud Resource Changes in Real-Time: This domain measures the skills of Event Managers and Integration Specialists in using OCI Events Service. It covers event structures, types, rules, and integration with other OCI services to respond effectively to resource changes and automate workflows.
Topic 2	Summarize OCI Observability and Management Services: This section evaluates the expertise of DevOps Engineers and IT Operations Managers in utilizing Oracle Cloud Infrastructure (OCI) Observability and Management services. It covers tools for monitoring, auditing, and managing cloud resources, emphasizing automation and machine learning-driven insights to optimize IT operations.

Topic 3	• Monitor Cloud Environments with Metrics and Alarms: This section tests Oracle Cloud Operators' knowledge of configuring OCI Monitoring Service. It includes enabling metrics for resource monitoring, setting up alarms based on best practices, and responding to real-time changes in cloud environments to ensure system reliability.
Topic 4	• Monitor Applications with Deep Visibility into End-User Experience: This domain tests the knowledge of Application Performance Engineers and DevOps Specialists in using OCI Application Performance Monitoring (APM). It includes instrumenting applications for data collection, analyzing performance metrics, visualizing distributed application components, and diagnosing issues across multi-tier architectures.

Free PDF Oracle - Professional 1Z0-1111-25 - Oracle Cloud Infrastructure 2025 Observability Professional Detail Explanation

Are you organized for this? Do you want to end up a Oracle certified? In case your answer is high great then we guarantee you that you are on the right region. Check in yourself for Oracle Cloud Infrastructure 2025 Observability Professional (1Z0-1111-25) certification examination and download the 1Z0-1111-25 exam questions and begin preparation right now.

Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which Management Agent group allows the agent to upload data to the discovery service?

- A. Mgmt_agent_dynamic_group
- B. StackMonitoringAdminGrp
- **C. AgentUsersGrp**
- D. StackMonitoringViewerGrp

Answer: C

Explanation:

Management Agents require group membership and policies to interact with OCI services:

AgentUsersGrp (A): A predefined dynamic group for all Management Agents in a tenancy. With an attached policy granting upload permissions (e.g., allow dynamic-group AgentUsersGrp to use discovery-service-family in tenancy), agents can send data to the discovery service for resource detection.

Why not B, C, or D?

B and C: Specific to Stack Monitoring roles, not general agent uploads.

D: A generic name, not a predefined OCI group.

AgentUsersGrp is the standard for this purpose.

NEW QUESTION # 44

From the following, select the different metric namespaces used for APM.

- A. oracle_apm_monitoring namespace, synthetics, and monitoring
- B. RUM metrics, oracle_apm_monitoring, Oracle_apm_synthetic
- C. AjaxDownloadTime, TotalTraceCount, Oracle_pm_rum
- **D. oracle_apm_rum, oracle_apm_synthetics, and oracle_apm_monitoring**

Answer: D

Explanation:

APM uses specific metric namespaces to categorize its telemetry data:

oracle_apm_rum, oracle_apm_synthetics, and oracle_apm_monitoring (D):

oracle_apm_run: Metrics from Real User Monitoring (e.g., page load times).
oracle_apm_synthetic: Metrics from Synthetic Monitoring (e.g., test response times).
oracle_apm_monitoring: Metrics from distributed tracing (e.g., span counts).
These namespaces align with APM's three core features.
Why not A, B, or C?
A: Individual metric names, not namespaces.
B: Incomplete and incorrect namespace naming.
C: Mixes metric types with partial namespace names.
These namespaces enable targeted metric queries in OCI Monitoring.

NEW QUESTION # 45

What are the two capabilities available in Operations Insights? (Choose two.)

- A. Exadata Insights
- B. Entity Topology Viewing
- C. Database Fleet Monitoring
- D. Capacity Planning

Answer: A,D

Explanation:
Operations Insights provides:
Capacity Planning (A): Forecasts resource needs based on historical trends and scenarios.
Exadata Insights (D): Analyzes Exadata system performance and capacity.
Why not B or C?
Database Fleet Monitoring (B): A goal, not a named capability; covered under broader features.
Entity Topology Viewing (C): More aligned with Stack Monitoring, not Operations Insights.
These capabilities optimize resource management.

NEW QUESTION # 46

Which pillars of Observability are available as a single view from the Dashboard?

- A. Logging Analytics, Database Management, Stack Monitoring
- B. Logs, Metrics, and Traces
- C. Compute, Storage, and Network
- D. Log data, Query language, Dashboard widgets

Answer: B

Explanation:
OCI Dashboards consolidate the three pillars of observability:
Logs, Metrics, and Traces (A):
Logs: Event records from Logging Service.
Metrics: Numeric data from Monitoring Service.
Traces: Request flows from APM.
These can be visualized together in OCI Dashboards for unified observability.
Why not B, C, or D?
B: Resource categories, not pillars.
C: Tools or components, not pillars.
D: OCI services, not the core concepts.
This integration enhances system visibility.

NEW QUESTION # 47

Which of the following is not a key interaction element in the Log Explorer UI of Logging Analytics?

- A. Time Picker
- B. Scope Filter

- Answer: D**

Scope Filter (C): Defines the scope (e.g., compartments, log groups) of the log search.
