MB-335 Online Training Materials | MB-335 New Test Bootcamp

Many candidates ask us if your MB-335 original questions are really valid, if our exam file is really edited based on first-hand information & professional experts and if your MB-335 original questions are really 100% pass-rate. Maybe you have a bad purchase experience before. I want to know that if you chose providers attentively before. Hereby, I can assure you that please rest assured all we guaranteed will be achieved. We are a legal authorized company which provides valid MB-335 Original Questions more than 6 years and help thousands of candidates clear exams and obtain certification every year.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q88-Q93):

NEW QUESTION # 88

A company uses engineering change management in Dynamics 365 Supply Chain Management. The Product readiness checks feature is turned off.

An existing engineering product must be reconfigured for a new product readiness policy.

You need to change the product readiness policy.

Where should you make this change?

- A. default order settings
- B. product configuration model
- **C. released product**
- D. engineering category
- E. shared product

Answer: C

Explanation:

Product readiness policies are assigned to products at the released product level. A released product is a product that has been released to one or more legal entities and can be used in transactions.

To change the product readiness policy for an existing engineering product, you must go to the Product readiness tab on the Released product details page and select a different policy from the Readiness policy field.

The other options are not correct, because they are not related to product readiness policies. Default order settings are used to define how a product is ordered, received, and sold. A shared product is a product that is defined in the shared product master and can be released to multiple legal entities. An engineering category is a category that is used to group engineering products by their characteristics. A product configuration model is a model that defines the options and rules for configuring a product.

NEW QUESTION # 89

You need to modify the production order defaults for the manufacturing execution production order Start process.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 90

A manufacturer uses discreet orders and manually consumes raw material after reporting products as finished.

You are performing an end-of-month closing for remaining picking lists on production orders. You must not be required to consume the full amount of material on production order picking lists as a result of improved production efficiency. When the production manager verifies that no material is left to consume, there are remaining back-ordered amounts.

You need to pick the line item short and eliminate the remaining demand.

What should you do?

- **A. Enter the consumption amount on the line to match the actual amount used and select end on the production order picking list.**

- B. Enter the consumption amount on the line to match the actual amount used, and delete the remaining amount.
- C. Delete the item from the Bill of materials for the finished good.
- D. Change the Coverage group on item option to manual

Answer: A

NEW QUESTION # 91

You need to set up the metal production route and BOM.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set all the BOM lines to resource consumption.
- B. Set all BOM lines warehouse to the production warehouse.
- C. Set the operation route type as Vendor.
- D. Set the operation route type as Standard.
- E. Set the input warehouse on the resource to the vendor warehouse.

Answer: B,C,E

Explanation:

Topic 3, Adventure Works

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Adventure Works Cycles is a high-end bicycle manufacturer in North America. Their standard model bicycles are available year-round. Limited-edition bicycle models are released several times a year to boutique retailers domestically.

Adventure Works has had the most success with their limited-edition bicycles. These bicycles have high margins, are in high demand, and have a strong following with the younger generation biking community.

Current environment

General

Adventure Works expects to triple their manufacturing capabilities in the next few years due to increasing demand. The company plans to invest in Dynamics 365 Finance, Dynamics 365 Supply Chain Management, and the Power Platform products to migrate from a custom-built enterprise resource planning (ERP) solution and Microsoft Excel worksheets.

Adventure Works sells only to the United States and Canada. Despite their limited market, they cannot keep up with current demand. Over time, they want to expand their market to remain profitable.

Adventure Works has no capabilities or budget to undertake any development beyond Excel formula-level tasks.

Bicycle manufacturing

Bicycle models are measured and reported against how well a single model performs as a sum of all the variations of that model. For example, the Street Kid YOLO model sold 25,000 units in 2019 across all variations of the product, but the Purple Female frame made up 30 percent of that model's sales.

The Street Kid YOLO models sell in different volumes depending on the market.

The creation of production orders for bicycles occurs monthly and is based on historical sales.

Each part of a bicycle's assembly occurs at a different station in the Adventure Works production facility.

A piece of paper that has eight sections accompanies a bicycle throughout the manufacturing process. As each step is completed, the respective section is completed and signed off by a production worker.

The completed paper is used in the put-away process by the warehouse workers.

Financials

The standard model and limited-edition bicycle teams are separate operating units within the manufacturing division. Financials are tracked and reported separately even though they are produced and sold in the same sales channels.

Updates to the standard model bicycle models are created when a part for a bicycle becomes unavailable. This can change the cost of the product.

An updated model of a bicycle with new parts will be maintained as a new item and have a new price. However, it will look like the exact same product to retailers and distributors.

Manufacturing process

The bicycle manufacturing process is shown in the following graphic:

Limited-edition bicycle process

The limited-edition bicycles are made up of an Adventure Works custom frame with all other parts created by local artists and manufacturers.

Each bicycle has a unique set of new items that make up the bill of materials (BOM) because all parts are created to specification.

A single pilot limited-edition bicycle is created as a proof of concept.

Adventure Works occasionally reuses components from existing bicycles, but most limited-edition bicycles are made of handcrafted components designed to specifications.

Each limited-edition bicycle is built, and hand signed by a single Adventure Works artisan.

Sales price must be auto calculated after the cost price is derived.

Before creating the proof of concept limited-edition bicycle, the approximate sales price needs to be determined through a cost-plus 20 percent calculation.

All items except for the frame in the prototype process are considered finished items and can be sold individually.

The frame items require modifications in accordance with the manufacturing process as well as painting.

Each Adventure Works limited-edition bicycle artisan is scheduled to create a specific number of bicycles in a production run that must be completed by a certain date.

Limited-edition bicycle artisans work exclusively on a given run of limited-edition bicycles and are not able to work on other tasks.

Limited-edition bicycle BOM assembly process

The prototype process for the limited-edition bicycles is shown in the following graphic:

Requirements

General

Adventure Works will consist of three legal entities: the primary legal entity of the United States (AWUS), sales in Canada

(AWCA), and an international expansion (AWIN).

AWIN must be able to sell only standard model bicycles.

AWUS and AWCA must be able to sell both standard model and limited-edition bicycles.

Warehouse workers must use the Warehouse Management mobile application to manage all inventory inbound and outbound from the warehouse.

Bicycle manufacturing

The handlebars, back wheels, and front wheels must not change for any of the bicycle model configurations.

Standard model bicycle production scheduling must be configured to start as soon as possible.

Bicycle components must be automatically reserved when the item is released to the production floor.

Standard model bicycle production must be automatically created on a predefined schedule.

As soon as bicycles are completed, they must be available to fulfill the backlog of orders.

Limited-edition bicycle production must be configured to meet the end date for when the bicycles must be completed.

Production orders need to track financials by standard model or limited-edition bicycle manufacturing teams.

The system must log the immediate consumption of BOMs for traceability.

All inventory is warehouse enabled.

Finished goods are reported as finished by the warehouse worker who picks up the finished product from the packaging area.

Finished products must automatically have put-away work completed for them.

New limited-edition bicycle process

Adventure Works is creating a new, limited-edition bicycle to commemorate the company's tenth anniversary. The limited-edition bicycle will be designed for charity events and be produced for the summer season.

The bicycle must be available in men's, women's, and unisex frame styles. It will be painted in one of 50 hand-painted designs representing the charity of the customer's choosing.

A limited run of 100 bicycles must be created.

The limited-edition bicycles must use the same production process as the standard model bicycles.

The limited-edition bicycles must use the same parts used for previous limited-edition bicycles, except for the unique paint colors.

Frames must be painted in-house.

Five painting options are available only in the unisex frame style.

New limited-edition bicycle orders

Customers must be able to place sales orders for the item in the chosen frame configuration, including style and color.

When an order for the new limited-edition bicycle is created, payment must be provided.

An approval for an order must exist for the order to be processed.

Upon approval of an order, production must start immediately and not require re-entry of data.

NEW QUESTION # 92

A company manufactures high performance bicycles.

The bicycles come in several different preconfigured models. Customers can also purchase custom configurations. Several add-ons are dependent on other accessories in order to be installed.

You need to set up the system to handle the different product configurations.

What should you do?

- A. Create an expression constraint.
- B. Create a batch version.
- C. Create a co-product.
- D. Create a phantom BOM.

Answer: D

NEW QUESTION # 93

.....

As we enter into such a competitive world, the hardest part of standing out from the crowd is that your skills are recognized then you will fit into the large and diverse workforce. The MB-335 certification is the best proof of your ability. However, it's not easy for those work officers who has less free time to prepare such an MB-335 Exam. Here comes MB-335 exam materials which contain all of the valid MB-335 study questions. You will never worry about the MB-335 exam.

MB-335 Online Training Materials: <https://www.testkingpdf.com/MB-335-testking-pdf-torrent.html>

Microsoft Training MB-335 For Exam The simulated and interactive learning environment of our test engine will greatly arouse your

learning interests, We assure that all of the contents in our MB-335 Online Training Materials - Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert exam study material are the quintessence for the exam, and you will find nothing redundant in them, Now, we will recommend the most valid & best-related MB-335 exam study torrent for your preparation.

One needs to make sure that they allocate enough time to adequately prepare Training MB-335 For Exam for the exam, The Plan of the Book, The simulated and interactive learning environment of our test engine will greatly arouse your learning interests.

Free PDF MB-335 - Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Unparalleled Training For Exam

We assure that all of the contents in our Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert MB-335 Exam study material are the quintessence for the exam, and you will find nothing redundant in them, Now, we will recommend the most valid & best-related MB-335 exam study torrent for your preparation.

To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest MB-335 dumps torrent.

Have you ever dreamed about passing the exam (with MB-335 test guide: Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert) as well as getting the relevant certification with preparation only for two or three days?
