

Quiz 2025 Microsoft Professional Associate MS-721 Level Exam

P.S. Free & New MS-721 dumps are available on Google Drive shared by PremiumVCEDump: <https://drive.google.com/open?id=1WLpsr2mDz8l2TEb1HGG3f8KFVe1--dt2>

Our MS-721 test material can help you focus and learn effectively. You don't have to worry about not having a dedicated time to learn every day. You can learn our MS-721 exam torrent in a piecemeal time, and you don't have to worry about the tedious and cumbersome learning content. We will simplify the complex concepts by adding diagrams and examples during your study. By choosing our MS-721 test material, you will be able to use time more effectively than others and have the content of important information in the shortest time. And you can pass the MS-721 exam easily and successfully.

The MS-721 exam is a beta exam, which means that it is still in the testing phase and is not yet widely available. However, those who take the beta exam can provide valuable feedback to Microsoft, which can be used to refine and improve the exam before it is released to the general public. This makes the MS-721 exam a great opportunity for IT professionals who want to be at the forefront of Microsoft technology and help shape the future of communication and collaboration solutions.

Microsoft MS-721 (Collaboration Communications Systems Engineer (beta)) Certification Exam is a highly regarded certification exam that is designed to test the skills and knowledge of IT professionals who are responsible for designing and implementing collaboration and communication systems. The beta certification exam is currently being offered by Microsoft and is open to those who wish to test their skills in this area.

Quiz Microsoft - MS-721 - Collaboration Communications Systems Engineer Latest Associate Level Exam

In case there are any changes happened to the MS-721 exam, the experts keep close eyes on trends of it and compile new updates constantly so that our MS-721 exam questions always contain the latest information. It means we will provide the new updates of our MS-721 Study Materials freely for you later since you can enjoy free updates for one year after purchase. And you can free download the demos to check it by yourself.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q216-Q221):

NEW QUESTION # 216

You have a Microsoft Teams Phone deployment.

You need to configure users to include a toll free phone number as part of their meeting invites.

Which type of policy should you configure?

- A. customization
- B. meeting
- C. audio conferencing

- D. voice routing

Answer: C

Explanation:

Initial assignment of phone numbers that are included in the meeting invites for users. The phone numbers included in the meeting invites of users enabled for Audio Conferencing are defined in the TeamsAudioConferencingPolicy that's assigned to users. When a TeamsAudioConferencingPolicy is assigned to a user, all toll and toll-free phone numbers added in the policy are included in meeting invites for users who have that policy. If a user is assigned a TeamsAudioConferencingPolicy and there aren't any toll or toll-free phone numbers added to the policy, then in that case the phone numbers that appear in the meeting invites of these users are defined by the default conferencing toll phone number and the default conferencing toll-free phone number in each individual user's settings.

NEW QUESTION # 217

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are optimizing a network to better support voice and collaboration workloads in Microsoft Teams.

When the users are at a specific corporate site, you need to prevent the users from adding video during calls.

Solution: You run `New-CsTeamsMeetingPolicy` and set the `-IPVideoMode` parameter to `DISABLED`.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead run `New-CsTeamsNetworkRoamingPolicy` and set the `-AllowIPVideo` parameter to `$False`.

Note: The `New-CsTeamsNetworkRoamingPolicy` cmdlet allows IT Admins to create policies for Network Roaming and Bandwidth Control experiences in Microsoft Teams.

The TeamsNetworkRoamingPolicy cmdlets enable administrators to provide specific settings from the TeamsMeetingPolicy to be rendered dynamically based upon the location of the Teams client. The TeamsNetworkRoamingPolicy cannot be granted to a user but instead can be assigned to a network site. The settings from the TeamsMeetingPolicy included are AllowIPVideo and MediaBitRateKb. When a Teams client is connected to a network site where a CsTeamRoamingPolicy is assigned, these two settings from the TeamsRoamingPolicy will be used instead of the settings from the TeamsMeetingPolicy.

NEW QUESTION # 218

You have a Microsoft Teams conference room named ConferenceRoom01.

You need to ensure that ConferenceRoom01 can be invited directly to third party online meetings by partner organizations.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Explanation:

Answer Area

▼ -Identity "ConferenceRoom01"	▼
Enable-CsMeetingRoom	-AutomateProcessing AutoAccept
Set-CalendarProcessing	-PlaceExternalCalls Enabled
Set-CsMeetingConfiguration	-ProcessExternalMeetingMessages \$true
Set-CsTeamsRoomVideoTeleConferencingPolicy	ReceiveExternalCalls Enabled

NEW QUESTION # 219

Case Study 2 - Contoso

Overview

General Overview

The network contains an Active Directory forest named contoso.com that syncs to Microsoft 365 by using Azure AD Connect. Domain controllers run Windows Server 2019.

Physical Locations

Contoso has offices in Toronto, New York, and London. Contoso has a manufacturing facility in Vancouver.

Contoso has a global sales team that works remotely without a physical corporate office.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named contoso.com that syncs to Microsoft 365 by using Azure AD Connect. Domain controllers run Windows Server 2019.

Microsoft Office 365

Contoso has a Microsoft 365 subscription. All users are assigned Microsoft 365 E3 licenses.

Contoso uses Microsoft Exchange Online for email.

Network Infrastructure

All the offices connect to each other by using a private WAN. The Toronto office has a 1-Gbps internet circuit and the London office has a 100-Mbps internet circuit. Internet access for all the offices is provided through the Toronto and London offices.

The remote sales team users connect to the networks by using VPN connections. The remote users use various connection types, including wireless and mobile.

Skype for Business Server traffic for the remote users is routed through the VPN connections.

Telephony

Contoso uses a centralized Skype for Business Server 2015 deployment configured for disaster recovery between the Toronto and London datacenters.

Each frontend pool connects to the PSTN through a pair of managed Session Border Controllers (SBCs) that provide Enterprise Voice and dial-in conferencing.

Contoso has a Skype for Business Server Survivable Branch Appliance (SBA) and a local SBC that connects to a Primary Rate Interface (PRI) in the Vancouver manufacturing facility.

Contoso has hybrid connectivity deployed between Skype for Business Server and Office 365.

All SBCs are Microsoft Teams-certified.

The returns department has an auto attendant that uses an ID or returns.aa@contoso.com.

Requirements

Planned Changes

Contoso plans to migrate all existing services from Skype for Business Server to Teams.

Direct Routing will be deployed for the existing SBCs.

Existing meeting rooms have Skype for Business Server video endpoints that are Skype for Business Server-certified. The endpoints are not Teams-certified.

You plan to use the video endpoints in Teams until the equipment is replaced with Microsoft Teams Rooms.

A limited pilot of the Teams migration and the Direct Routing deployment will occur in the Vancouver facility before deployment to the entire company.

Technical Requirements

Contoso identifies the following technical requirements:

During the limited pilot, the media path must be optimized.

Media flow for the remote sales team users must be optimized.

All sales team users require inbound toll-free audio conferencing.

Users in the Vancouver facility must be able to place emergency calls regardless of internet availability.

When users in the returns department dial out, the outbound calls must display Contoso and the department's phone number.

The video endpoints for the existing meeting rooms must be able to be used for both voice and video conferencing in Teams

meetings.

You need to configure a toll-free dial-in bridge for Teams meetings. The solution must meet the technical requirements.

Which three prerequisites must be met before you can assign the toll-free bridge to Teams meeting organizers? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Purchase a Microsoft 365 Domestic and International Calling plan license.
- **B. Assign a phone number to the bridge.**
- C. Get an auto attendant toll-free number.
- **D. Get a Dedicated conference bridge (Toll Free) number.**
- E. From the meeting policy, set Allow dial-in users to bypass the lobby to On.
- F. Assign a phone number to a resource account.
- **G. Purchase Communications Credits.**

Answer: B,D,G

NEW QUESTION # 220

Your company plans to use Microsoft Teams for collaboration and communication.

You need to deploy Microsoft Surface Hub devices to Teams meeting rooms.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Deploy the provisioning package to Surface Hub

Install Windows Configuration Designer

Run the Enable-CsMeetingRoom cmdlet

Install the Windows Installation Assistant

Use the Provision Surface Hub devices wizard

Configure a Teams update policy

Save the provisioning package to a USB device

>

<

Answer:

Explanation:

Deploy the provisioning package to Surface Hub

Install Windows Configuration Designer

Run the Enable-CsMeetingRoom cmdlet

Install the Windows Installation Assistant

Use the Provision Surface Hub devices wizard

Configure a Teams update policy

Save the provisioning package to a USB device

>

<

Install Windows Configuration Designer

Use the Provision Surface Hub devices wizard

Save the provisioning package to a USB device

Deploy the provisioning package to Surface Hub

Explanation:

Step 1: Install Windows Configuration Designer

Step 2: Use the Provision Surface Hub devices wizard

Create provisioning packages for Surface Hub

Provisioning packages allow you to automate deployment of key features, helping deliver a consistent experience across all Surface Hubs in your organization. Using Windows Configuration Designer (WCD) on a separate PC, you can complete the following tasks:

Enroll in Active Directory or Azure Active Directory

Create a device administrator account

Add applications and certificates

Configure proxy settings

Configure Configuration Service Provider (CSP) settings

Overview

On a separate PC running Windows 10 or Windows 11, install Windows Configuration Designer from the Microsoft Store.

Select Provision Surface Hub devices to configure common settings using a wizard. Or select Advanced provisioning to view and configure all possible settings.

Create the provisioning package and save it to a USB drive.

Deploy the package to your Surface Hub during first-run setup, or through the Settings app.

Step 3: Save the provisioning package to a USB device

Step 4: Deploy the provisioning package to Surface Hub
