Test PCNSE Voucher | PCNSE Torrent

Our PCNSE study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the PCNSE training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our PCNSE study engine.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q105-Q110):

NEW QUESTION # 105

An administrator wants multiple web servers In the DMZ to receive connections initiated from the internet. Traffic destined for 206.15.22.9 port 80/TCP needs to be forwarded to the server at 10.1.1.22. Based on the image, which NAT rule will forward web-browsing traffic correctly?

- A. 

Source IP: Any
Destination IP: 206.15.22.9
Source Zone: Internet
Destination Zone: Internet
Destination Service: 80/TCP
Action: Destination NAT
Translated IP: 10.2.2.23
Translated Port: 53/UDP

- B. 
- C. 
- D. 

Answer: A

NEW QUESTION # 106

A network administrator troubleshoots a VPN issue and suspects an IKE Crypto mismatch between peers. Where can the administrator find the corresponding logs after running a test command to initiate the VPN?

- A. Tunnel Inspection logs
- B. Traffic logs
- C. Configuration logs
- D. System logs

Answer: C

NEW QUESTION # 107

A standalone firewall with local objects and policies needs to be migrated into Panorama

- A. Use the "import Panorama configuration snapshot" operation, then "export or push device config bundle" to push the configuration
- B. What procedure should you use so Panorama is fully managing the firewall?
- C. Use the "import device configuration to Panorama" operation, then "export or push device config bundle" to push the configuration
- D. Use the "import device configuration to Panorama" operation, then perform a device-group commit push with "include device and network templates"
- E. Use the "import Panorama configuration snapshot" operation, then perform a device-group commit push with "include device and network templates"

Answer: E

Explanation:

NEW QUESTION # 108

Which new PAN-OS 11.0 feature supports Pv6 traffic?

- A. DHCPv6 Client with Prefix Delegation
- B. IKEv1
- C. DHCP Server
- D. OSPF

Answer: A

Explanation:

Explanation

According to the Palo Alto Networks documentation, DHCPv6 Client with Prefix Delegation is a new feature in PAN-OS 11.0 that supports IPv6 traffic. This feature allows configuring an interface as a DHCPv6 client with prefix delegation, which enables the interface to obtain an IPv6 prefix from a DHCPv6 server and assign IPv6 addresses to other interfaces on the firewall or downstream devices. Therefore, the correct answer is A.

The other options are not new features in PAN-OS 11.0 that support IPv6 traffic:

OSPF: This option is not a new feature in PAN-OS 11.0. OSPF is a routing protocol that supports both IPv4 and IPv6 traffic. It has been supported by PAN-OS since version 4.12.

DHCP Server: This option is not a new feature in PAN-OS 11.0. DHCP Server is a feature that allows the firewall to act as a DHCP server and assign IP addresses to clients. It supports both IPv4 and IPv6 traffic. It has been supported by PAN-OS since version 5.0

IKEv1: This option is not a new feature in PAN-OS 11.0. IKEv1 is a protocol that supports both IPv4 and IPv6 traffic for establishing VPN tunnels. It has been supported by PAN-OS since version 3.04.

NEW QUESTION # 109

Which four NGFW multi-factor authentication factors are supported by PAN-OS? (Choose four.)

- A. SSH key
- B. User logon
- C. Short message service
- D. Push
- E. One-Time Password
- F. Voice

Answer: C,D,E,F

Explanation:

<https://docs.paloaltonetworks.com/pan-os/8-0/pan-os-admin/authentication/authentication-types/multi-factor-authentication>

Push - An endpoint device (such as a phone or tablet) prompts the user to allow or deny authentication.

Short message service (SMS) - An SMS message on the endpoint device prompts the user to allow or deny authentication. In some cases, the endpoint device provides a code that the user must enter in the MFA login page.

Voice - An automated phone call prompts the user to authenticate by pressing a key on the phone or entering a code in the MFA login page.

One-time password (OTP) - An endpoint device provides an automatically generated alphanumeric string, which the user enters in the MFA login page to enable authentication for a single transaction or session.
