C_S4CPB_2502 Exam Dumps Free - C_S4CPB_2502 Relevant Questions

You can directly refer our SAP C_S4CPB_2502 study materials to prepare the exam. Once the newest test syllabus is issued by the official, our experts will quickly make a detailed summary about all knowledge points of the real SAP C_S4CPB_2502 Exam in the shortest time. All in all, our C_S4CPB_2502 exam quiz will help you grasp all knowledge points.

SAP C_S4CPB_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of ERP Implementation Project Manager and covers the fundamental aspects of implementing SAP Cloud ERP with a modern approach. It includes forming the right team, promoting agile thinking, and driving successful Fit-to-Standard workshops that align the project with business goals in a cloud environment.
Topic 2	Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of SAP Cloud ERP Consultant and focuses on setting up system configurations in SAP Cloud ERP and understanding how to manage user navigation and interface personalization through the SAP Fiori Launchpad. It tests the consultant's ability to configure and align user experience with business roles.

Topic 3	• Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of ERP Implementation Project Manager and assesses foundational knowledge of cloud computing principles and SAP Cloud ERP structure. It ensures understanding of key differences from on-premise ERP, cloud deployment benefits, and basic navigation of cloud ERP systems.
Topic 4	• Extensibility and Integration: This section of the exam measures skills of SAP Cloud ERP Consultant and deals with the capabilities of extending SAP applications to meet custom business requirements and integrating with other systems or services. The focus is on knowing when to extend standard functionality and how to ensure smooth system integration in a cloud context.
Topic 5	• System Landscapes and Identity Access Management: This section of the exam measures skills of SAP Cloud ERP Consultant and involves understanding SAP's system landscape in the cloud, including tenants and environments. It also focuses on identity and access management, covering how user roles, permissions, and security are managed across the cloud ecosystem.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q25-Q30):

NEW QUESTION # 25

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Runtime Authoring mode
- **B. In the Custom Fields app**
- C. In the Maintain SAP Business Technology Platform Extensions app
- D. In the Extensibility Cockpit app

Answer: B

NEW QUESTION # 26

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- A. Developer extensibility
- **B. Side-by-side extensibility**
- C. Classic extensibility
- D. Key user extensibility

Answer: B

NEW QUESTION # 27

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- **A. The test process failed the execution pre-check.**
- B. The process steps have been reordered.
- **C. An execution variant has not been maintained.**
- D. Data marked for deletion is picked for execution.

Answer: A,C

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it.

* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that

there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run². The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process³.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process⁴.
