NEW QUESTION # 20
A table report is shared with a user. That user CANNOT see the table report in the Report Center list. Which role-based permission has NOT been set correctly for this user?

- A. Run Report access to the domain
- B. Access to Insights
- C. Ability to manage Tiles and Dashboards
- D. Create Report access to the domain

Answer: A

Explanation:
When a user cannot see a table report in the Report Center list, the issue typically stems from insufficient role- based permissions (RBP) granted to the user for accessing reports in that domain. Specifically:
* Understand Role-Based Permissions (RBP):
* In SAP SuccessFactors, reports and analytics visibility is governed by RBP settings. These settings ensure that users only see the reports and data they are authorized to access.
* Permissions are categorized into domains such as "Employee Central," "Performance Management," etc.
* Key Permissions for Reports in the Report Center:To view or run reports in Report Center, users need:
* Run Report Access: This allows users to execute reports for domains they are permitted to access.
* Create Report Access: This enables users to create or modify reports.
* Manage Tiles and Dashboards Access: This is necessary for interacting with dashboards and tiles, not table reports specifically.
* Access to Insights: This refers to viewing analytic insights and does not directly impact table report visibility.
* Diagnosing the Issue:
* The given scenario describes a user being unable to view a shared table report.
* The most likely cause is the absence of Run Report access to the domain associated with the table report.
* Without this permission, the system restricts the user from running or even viewing the report, even if it has been shared with them.
* Steps to Resolve:
* Navigate to Admin Center # Manage Permission Roles.
* Select the permission role assigned to the user in question.
* Click Permissions # Reports Permissions.
* Verify that the Run Report Permission is granted for the specific domain associated with the shared report.
* If not, enable this permission and save the changes.
* Test Access:
* After updating the permissions, the user should be able to view the table report in the Report Center.
* SAP SuccessFactors Help Portal: Role-Based Permissions
* SAP SuccessFactors People Analytics Reporting Guide (Latest Release): Check for details on report permissions and their implications.
* SAP KBA 2461114: Troubleshooting Report Center permissions.
* Learning Path: SAP Open Learning on SuccessFactors RBP and Analytics (openSAP).
Step-by-Step Analysis:References and Documentation:This explanation ensures that the resolution is precise, supported by standard SAP practices, and verifiable through official SAP documentation.
