- A. Shipment cost document
- B. Service entry sheet
- C. Settlement management document
- D. Forwarding settlement document

**Answer: B,C**

#### **NEW QUESTION # 60**

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note: There are 2 correct answers to this question.

- A. OData
- B. SOAP
- C. RFC
- D. IDoc

**Answer: A,B**

Explanation:

For clean core integrations in SAP S/4HANA Cloud, SAP recommends using modern, standardized APIs to ensure extensibility and minimal customizations. According to the SAP documentation:

- \* SOAP (A): SOAP-based web services are recommended for robust, secure integrations, particularly for complex scenarios requiring structured data exchange.
- \* OData (D): OData APIs are preferred for RESTful integrations, providing a standardized, flexible way to access and manipulate data in SAP S/4HANA, aligning with clean core principles.

The other options are incorrect:

- \* RFC (B)(Remote Function Call) is a legacy interface and not recommended for clean core, as it often requires custom code.
- \* IDoc (C) is used for traditional EDI but is less aligned with clean core due to its complexity and customization needs.
