SnowPro Core Certification Exam certification is recognized worldwide and is highly valued by employers who are seeking qualified professionals to help them manage their organization's data.

The Snowflake COF-C02 exam is conducted by Snowflake, which is a cloud-based data warehousing company that provides solutions for data management, data warehousing, and data analytics. The Snowflake COF-C02 certification exam is designed for individuals who want to become certified experts in Snowflake, and it is an ideal certification for data engineers, data analysts, and data scientists.

Snowflake COF-C02 (SnowPro Core Certification) Certification Exam is a computer-based exam that consists of multiple-choice and scenario-based questions. COF-C02 exam duration is 2 hours, and the passing score is 80%. COF-C02 exam is available in English and Japanese languages. COF-C02 exam fee is \$175, and the candidate can take the exam online from anywhere in the world.

Reliable COF-C02 Test Practice & COF-C02 Online Lab Simulation

Exam candidates grow as the coming of the exam. Most of them have little ideas about how to deal with it. Or think of it as a time-consuming, tiring and challenging task to cope with COF-C02 exam questions. So this challenge terrifies many people. Perplexed by the issue right now like others? Actually, your anxiety is natural, to ease your natural fear of the COF-C02 Exam, we provide you our COF-C02 study materials an opportunity to integrate your knowledge and skills to fix this problem.

Snowflake SnowPro Core Certification Exam Sample Questions (Q761-Q766):

NEW QUESTION # 761

What is the MINIMUM Snowflake edition required to add masking policies to selectively mask plain-text data in a table or in view columns at query time?

- A. Virtual Private Snowflake (VPS)
- **B. Enterprise**
- C. Business Critical
- D. Standard

Answer: B

NEW QUESTION # 762

What can be interpreted based on the number of nodes reported in a Query Profile?

- A. Compute required for metadata management
- B. Network bandwidth during query execution
- **C. Query execution time**
- D. Data spillage

Answer: C

NEW QUESTION # 763

When using the ALLOW_CLIENT_MFA_CACHING parameter, how long is a cached Multi-Factor Authentication (MFA) token valid for?

- **A. 4 hours**
- B. 2 hours
- C. 8 hours
- D. 1 hour

Answer: A

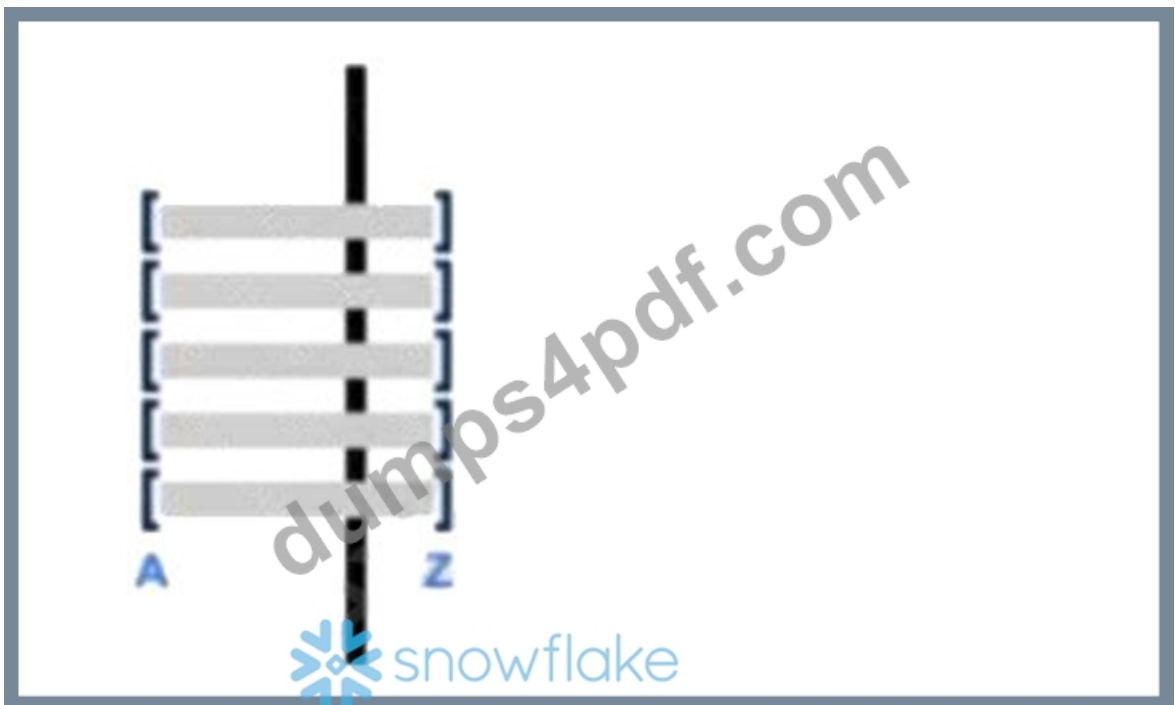

Explanation:

When using the ALLOW_CLIENT_MFA_CACHING parameter, a cached Multi-Factor Authentication (MFA) token is valid for up to 4 hours. This allows for continuous, secure connectivity without users needing to respond to an MFA prompt at the start of each connection attempt to Snowflake within this timeframe.

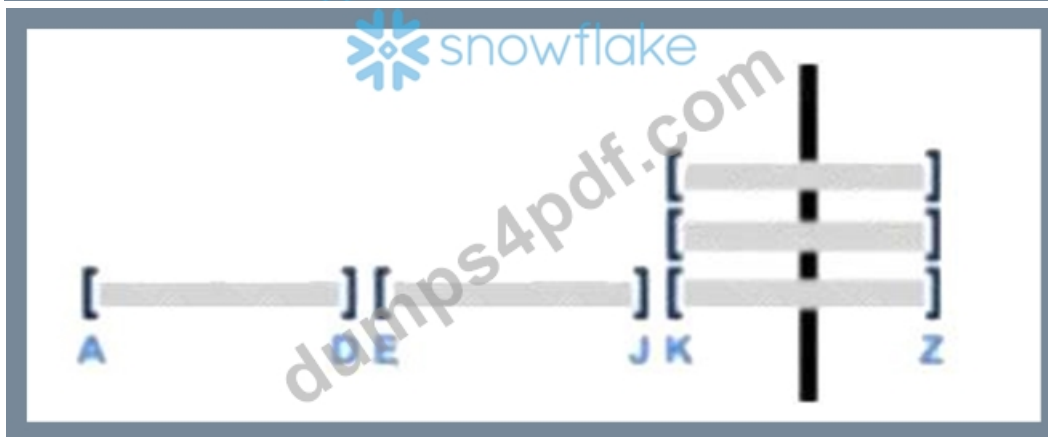

NEW QUESTION # 764

Assume there is a table consisting of five micro-partitions with values ranging from A to Z. Which diagram indicates a well-clustered table?

- A. 

- B.

- C.

- D. 

Answer: D

Explanation:

A well-clustered table in Snowflake means that the data is organized in such a way that related data points are stored close to each other within the micro-partitions. This optimizes query performance by reducing the amount of scanned data. The diagram indicated by option C shows a well-clustered table, as it likely represents a more evenly distributed range of values across the micro-partitions.

NEW QUESTION # 765

Which Snowflake object does not consume any storage costs?

- A. Transient table
- B. Materialized view
- **C. Temporary table**
- D. Secure view

Answer: C

Explanation:

Temporary tables do not consume any storage costs in Snowflake because they only exist for the duration of the session that created them and are automatically dropped when the session ends, thus incurring no long-term storage charges⁴.
