

Quiz 2025 Symantec 250-587: Symantec Data Loss Prevention 16.x Administration Technical Specialist–Trustable New Test Objectives

Symantec FAMILY DATA SHEET

Symantec Data Loss Prevention

Drive total protection of your sensitive data

At a glance

Highest level of data protection	Single pane of glass	Wide range of integrations
• Broadest data protection for communication channels: cloud, email, web, endpoints, and storage. • Fewer false positives with comprehensive detection technologies.	• Single console for policy management, incident response, reporting and administration. • One set of policies and workflow for all communication channels: cloud, email, web, endpoints, and storage.	• Integrates with Symantec Information Centric Security and the Integrated Cyber Defense Platform. • Broad integration support for user behavior, third-party encryption, data classification and rights management products.

Stop data loss with the highest level of protection

Keeping information safe and compliant has never been easy. But today, enterprises face new and unexpected security problems. As more companies unplug their on-premises systems and move to cloud-based services, company data becomes more vulnerable to accidental exposure by inexperienced cloud users and configuration errors. Cloud security isn't the only concern for enterprises. Targeted cyber-attacks have become all too common as cybercriminals develop effective new methods that circumvent traditional security measures and exploit users to steal valuable data from companies. Symantec's Data Loss Prevention (DLP) solution delivers the highest level of protection you need to prevent data breaches and safeguard your company's reputation. With our industry-leading technology, you get comprehensive discovery, monitoring and protection capabilities that give you total visibility and control over your confidential data.

-  **Discover** where data lives across every channel: cloud, email, web, endpoints, and storage
-  **Monitor** how data is being used on and off the corporate network
-  **Protect** data from being exposed or stolen in real-time

Symantec Data Loss Prevention 16.x Administration Technical Specialist Sample Questions (Q110-Q115):

NEW QUESTION # 110

What is the most efficient policy so that incidents are generated only when a specific user under investigation sends encrypted files?

- A. a policy that has one exception
- **B. a policy that has two conditions**
- C. a policy that has one condition
- D. a policy that has two exceptions

Answer: B

NEW QUESTION # 111

You administer storage for multiple hosts supporting a large OLTP application. Host Mkt operates both within the secure intranet, and host Store operates in a DMZ environment. Store stages detailed transaction logs on a volume named s_detail in a disk group named s_data. You need to deliver large batches of transaction data history from host Store to host Mkt for market analysis, and to receive the results of that analysis, as part of a weekly routine. To deliver sales history to the marketing host, what sequence of actions must you carry out? Place the following actions in order. 1. Use vxvg to deport the snapshot volume's disk group from host Store. 2. Use vxvg to import the snapshot volume into host Mkt. 3. Use vxsnap to create a snapshot of s_detail on s_data. 4. Use the vxsnap command to enable FastResync on s_detail. 5. Use vxvg to split the snapshot volume away from s_data, into a separate disk group.

- A. 5,4,1,2,3
- B. 4,2,5,3,1
- **C. 4,5,2,1,3**
- D. 5,2,4,1,3

Answer: C

NEW QUESTION # 112

An administrator is attempting to check the status of the services for a detection server in the UI. The only option showing under System > Servers > Overview > Server Detail is 'Status'. What is a possible cause for the server details to show 'Status' only?

- A. the user is logged in with a limited role
- **B. Advanced Process Control is unchecked**
- C. the services are failing to run
- D. Symantec Data Loss Prevention Standard Edition is installed

Answer: B

NEW QUESTION # 113

You're the administrator of a large storage environment. The environment includes DBMS systems that use VxFS-based data files, performance-critical application files, and archives of historical user data. You have made a recommendation to adopt the Dynamic Storage Tiering (DST) capability, and you've been asked to summarize the differences between DST and standard volumes and file systems. What are the components of DST that distinguish it from standard mechanisms? (Select two)

- **A. Among the distinctive mechanisms underlying DST are policies governing the mapping of files to storage mechanisms.**
- B. Among the distinctive mechanisms underlying DST are volume snapshots.
- C. Among the distinctive mechanisms underlying DST are specialized volume types.
- D. Among the distinctive mechanisms underlying DST are command scripts.
- **E. Among the distinctive mechanisms underlying DST is the volume set.**

Answer: A,E

NEW QUESTION # 114

You are using Veritas Enterprise Administrator (VEA) to create a volume set. You need to have e is a pre-requisite in place before you can create the new volume set. What should you do?

- A. Ensure that the volume set is a raw I/O.
- **B. Ensure that you have at least one volume created.**
- C. Ensure that the new volume is a /ext file system.
- D. Ensure that you have minimum 256 volumes to be configured in a volume set.

Answer: B

NEW QUESTION # 115
