|       |         |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>• Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS</li> <li>• SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.</li> </ul>                          |
| Topic 2 | <ul style="list-style-type: none"> <li>• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.</li> </ul>                                                                                                                                             |
| Topic 3 | <ul style="list-style-type: none"> <li>• Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response.   Data Protection Services</li> </ul> |
| Topic 4 | <ul style="list-style-type: none"> <li>• Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.</li> </ul>                                                                      |
| Topic 5 | <ul style="list-style-type: none"> <li>• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.</li> </ul>                                                                                                                                 |

## Zscaler Digital Transformation Administrator Sample Questions (Q29-Q34):

### NEW QUESTION # 29

During the authentication process while accessing a private web application, how is the SAML assertion delivered to the service provider?

- A. HTTP Redirect on the browser
- B. Through the client connector
- C. API request/response sequence
- D. Form POST via the browser

**Answer: D**

Explanation:

During authentication to a private web application, the SAML assertion is delivered to the service provider via a Form POST through the browser. This standard SAML mechanism involves the browser receiving the assertion from the IdP and then POSTing it to the service provider to complete the authentication flow.

### NEW QUESTION # 30

Which of the following is a key feature of Zscaler Data Protection?

- A. Log analysis
- B. Data loss prevention
- C. Stopping reconnaissance attacks
- D. DDoS protection

**Answer: B**

Explanation:

Data Protection provides comprehensive Data Loss Prevention (DLP) capabilities, inspecting content in motion to identify, block, or encrypt sensitive information based on policy.

### NEW QUESTION # 31

The Zscaler platform can protect against malicious files, URLs and content based on a number of criteria including reputation type. What type of checking is virus scanning?

- A. SHA-256 hashing
- B. Site reputation
- C. File reputation
- **D. Malware protection**

**Answer: D**

Explanation:

Virus scanning in the Zscaler platform is part of its Malware Protection capability, which inspects file content against known virus signatures and behaviors.

### NEW QUESTION # 32

What is the default policy configuration setting for checking for Viruses?

- A. Malware Protection
- B. Allow
- **C. Block**
- D. Unwanted Applications

**Answer: C**

Explanation:

Out of the box, Zscaler's Malware Protection policy is configured to block any traffic identified as a virus, ensuring known malicious files are denied immediately.

### NEW QUESTION # 33

How do Access Policies relate to the Application Segments and Application Segment Groups?

- **A. When a condition is met, an Access Policy can either allow or block access to Application Segments and Application Segment Groups.**
- B. When a condition is met, an Access Policy can either allow or block access to Application Segments OR Application Segment Groups.
- C. When a condition is met, an Access Policy can allow access to Application Segments and block access to Application Segment Groups.
- D. When a condition is met, an Access Policy can allow access to Application Segments Groups and block access to Application Segment.

**Answer: A**

Explanation:

Access Policies apply the same allow-or-block decision to both individual Application Segments and to Application Segment Groups when their rule conditions are met.

### NEW QUESTION # 34

.....
