Pass Guaranteed 2025 Reliable ECCouncil 212-82: Certified Cybersecurity Technician Reliable Test Tutorial

Our 212-82 questions pdf is up to date, and we provide user-friendly 212-82 practice test software for the Certified Cybersecurity Technician exam. Moreover, we are also providing money back guarantee on all of Certified Cybersecurity Technician test products. If the 212-82 braindumps products fail to deliver as promised, then you can get your money back. The 212-82 Sample Questions include all the files you need to prepare for the ECCouncil 212-82 exam. With the help of the 212-82 practice exam questions and test software, you will be able to feel the real 212-82 exam scenario, and it will allow you to assess your skills.

ECCouncil Certified Cybersecurity Technician Sample Questions (Q79-Q84):

NEW QUESTION # 79
Maisie. a new employee at an organization, was given an access badge with access to only the first and third floors of the organizational premises. Maisie Hied scanning her access badge against the badge reader at the second-floor entrance but was unsuccessful. Identify the short-range wireless communication technology used by the organization in this scenario.

- A. Bluetooth
- B. RFID
- C. Li-Fi
- D. Wi Fi

Answer: B

Explanation:

RFID (Radio Frequency Identification) is a short-range wireless communication technology that uses radio waves to identify and track objects. RFID tags are attached to objects and RFID readers scan the tags to obtain the information stored in them. RFID is commonly used for access control, inventory management, and identification3. References: What is RFID?

NEW QUESTION # 80

A text file containing sensitive information about the organization has been leaked and modified to bring down the reputation of the organization. As a safety measure, the organization did contain the MD5 hash of the original file. The file which has been leaked is retained for examining the integrity. A file named "Sensitiveinfo.txt" along with OriginalFileHash.txt has been stored in a folder named Hash in Documents of Attacker Machine-1. Compare the hash value of the original file with the leaked file and state whether the file has been modified or not by selecting yes or no.

- A. Yes
- B. No

Answer: A

Explanation:

Yes is the answer to whether the file has been modified or not in the above scenario. A hash is a fixed-length string that is generated by applying a mathematical function, called a hash function, to a piece of data, such as a file or a message. A hash can be used to verify the integrity or authenticity of data by comparing it with another hash value of the same data . A hash value is unique and any change in the data will result in a different hash value . To compare the hash value of the original file with the leaked file and state whether the file has been modified or not, one has to follow these steps:

Navigate to Hash folder in Documents of Attacker-1 machine.

Open OriginalFileHash.txt file with a text editor.

Note down the MD5 hash value of the original file as 8f14e45fceea167a5a36dedd4bea2543 Open Command Prompt and change directory to Hash folder using cd command.

Type certutil -hashfile Sensitiveinfo.txt MD5 and press Enter key to generate MD5 hash value of leaked file.

Note down the MD5 hash value of leaked file as 9f14e45fceea167a5a36dedd4bea2543 Compare both MD5 hash values.

The MD5 hash values are different , which means that the file has been modified.

NEW QUESTION # 81

Sam, a software engineer, visited an organization to give a demonstration on a software tool that helps in business development. The administrator at the organization created a least privileged account on a system and allocated that system to Sam for the demonstration. Using this account, Sam can only access the files that are required for the demonstration and cannot open any other file in the system.

Which of the following types of accounts the organization has given to Sam in the above scenario?

- A. Guest account
- B. Administrator account
- C. Service account
- D. User account

Answer: A

Explanation:

The correct answer is B, as it identifies the type of account that the organization has given to Sam in the above scenario. A guest account is a type of account that allows temporary or limited access to a system or network for visitors or users who do not belong to the organization. A guest account typically has minimal privileges and permissions and can only access certain files or applications. In the above scenario, the organization has given Sam a guest account for the demonstration. Using this account, Sam can only access the files that are required for the demonstration and cannot open any other file in the system. Option A is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. A service account is a type of account

that allows applications or services to run on a system or network under a specific identity. A service account typically has high privileges and permissions and can access various files or applications. In the above scenario, the organization has not given Sam a service account for the demonstration. Option C is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. A user account is a type of account that allows regular access to a system or network for employees or members of an organization. A user account typically has moderate privileges and permissions and can access various files or applications depending on their role. In the above scenario, the organization has not given Sam a user account for the demonstration. Option D is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. An administrator account is a type of account that allows full access to a system or network for administrators or managers of an organization. An administrator account typically has the highest privileges and permissions and can access and modify any files or applications. In the above scenario, the organization has not given Sam an administrator account for the demonstration.

NEW QUESTION # 82

A web application www.movieabc.com was found to be prone to SQL injection attack. You are given a task to exploit the web application and fetch the user credentials. Select the UID which is mapped to user john in the database table.

Note:

Username: sam

Pass: test

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

4 is the UID that is mapped to user john in the database table in the above scenario. SQL injection is a type of web application attack that exploits a vulnerability in a web application that allows an attacker to inject malicious SQL statements into an input field, such as a username or password field, and execute them on the database server. SQL injection can be used to bypass authentication, access or modify sensitive data, execute commands, etc. To exploit the web application and fetch the user credentials, one has to follow these steps:

Open a web browser and type www.movieabc.com

Press Enter key to access the web application.

Enter sam as username and test as password.

Click on Login button.

Observe that a welcome message with username sam is displayed.

Click on Logout button.

Enter sam' or '1'='1 as username and test as password.

Click on Login button.

Observe that a welcome message with username admin is displayed, indicating that SQL injection was successful.

Click on Logout button.

Enter sam'; SELECT * FROM users; - as username and test as password.

Click on Login button.

Observe that an error message with user credentials from users table is displayed.

The user credentials from users table are:

UID	Username	Password
1	admin	admin
2	sam	test
3	alice	alice123
4	john	john123

The UID that is mapped to user john is 4.

NEW QUESTION # 83

Ryleigh, a system administrator, was instructed to perform a full back up of organizational data on a regular basis. For this purpose, she used a backup technique on a fixed date when the employees are not accessing the system i.e., when a service-level down time is allowed a full backup is taken.
Identify the backup technique utilized by Ryleigh in the above scenario.

- A. Hot backup
- B. Nearline backup
- C. Warm backup
- D. Cold backup

Answer: D

NEW QUESTION # 84

......

The main reason why people look for ECCouncil 212-82 practice test is that these help them to prepare for the exam. Even if you study well but with no idea of the Certified Cybersecurity Technician 212-82 exam pattern, it will be tough to crack the nut. You shall waste your time thinking about the pattern and how to attempt the Certified Cybersecurity Technician 212-82 Exam Questions. On the other hand, if you know the Certified Cybersecurity Technician 212-82 exam questions well, you can use that time to solve the queries and improve your chances to score well in the exam.
