

# Quiz Cisco - Accurate 300-535 - Automating and Programming Cisco Collaboration Solutions Valid Test Voucher

2025 Latest ValidTorrent 300-535 PDF Dumps and 300-535 Exam Engine Free Share: <https://drive.google.com/open?id=1jzP8zYTWvb5QJsgH8YDLIEtnv6D9VWZ>

Our 300-535 exam materials are compiled by experts and approved by the professionals who are experienced. They are revised and updated according to the pass exam papers and the popular trend in the industry. The language of our 300-535 exam torrent is simple to be understood and our 300-535 test questions are suitable for any learners. The content of our 300-535 Study Materials is easy to be mastered and has simplified the important information. Our 300-535 test questions convey the latest and valid questions and answers and thus make the learning relaxing and efficient.

Cisco 300-535 is one of those rare exams that pave the path for two professional-level certifications. By explaining the basics of Cisco's automated solutions, it shapes one's career at multiple approaches.

One of the key benefits of earning the Cisco 300-535 certification is that it demonstrates to potential employers that the candidate has the skills and knowledge needed to develop and implement highly efficient and effective collaboration solutions. Automating and Programming Cisco Collaboration Solutions certification also provides candidates with a competitive advantage in the job market, as it is recognized globally by leading organizations and employers.

## Target Audience and Prerequisites

As already said, the Cisco 300-535 exam is associated with two sought-after certifications. The first one is CCNP Service Provider that authenticates one's professional-level comprehension. It is a good choice for the network engineers, network specialists, and systems engineers who can provide scalable infrastructures that are able to support managed services along with various customer requirements. This certificate also covers their automation and programmability skills. In other words, to obtain this Cisco certification, the applicants should be knowledgeable in the areas, such as configuration, verification, troubleshooting, and optimizing IP network infrastructures. Moreover, the individuals interested in becoming a certified specialist must go through one more test, which is known as 350-501 SPCOR.

Cisco Certified DevNet Professional is the second certificate related to the 300-535 Exam. It proves the students' understanding and skills in the development and maintenance of applications that are built by Cisco. This certification is useful for those individuals who have knowledge and insight into APIs, application development on the Cisco platform, automation, and infrastructures. The candidates should also complete the 350-901 DEVCOR test to get certified. Earning this certificate will prove one's expertise in the implementation of network apps on the Cisco platform along with their design, testing, and development.

| 21 | <area-area-id>                               | 43 | ""                     |
| 22 | <area-id>0</area-id>                         | 44 |                        |
| 23 | <running></running>                          | 45 |                        |
| 24 | <name-scopes>                                | 46 |                        |
| 25 | <name-scope>                                 | 47 |                        |
|    |                                              | 48 |                        |
|    |                                              | 49 |                        |

• A.

```
with manager.connect(host=DEVICE,
    port=PORT, username=USER,
    password=PASS, hostkey_verify=True,
    device_name={'name': 'iosxr'})
    look_for_keys=False, allow_agent=True) as m:
    reply = m.edit_config(target='current',
        config=OSPF_CONFIG)
    m.commit
```

• B.

```
with connect(host=DEVICE,
    port=PORT, user=USER,
    password=PASS, hostkey_verify=False,
    device={'name': 'cisco iosxr'})
    look_for_keys=False, allow_agent=False)
    reply = config(target=running,
        config=OSPF_CONFIG)
    commit()
```

• C.

```
with manager.connect(host=DEVICE,
    port=PORT, username=USER,
    password=PASS, hostkey_verify=False,
    device_params={'name': 'iosxr'})
    look_for_keys=False, allow_agent=False) as m:
    reply = m.edit_config(target='candidate',
        config=OSPF_CONFIG)
    m.commit()
```

```

with manager.connect(host=DEVICE,
    port=params, username=USER,
    password=False, hostkey_verify=False,
    device_params={'name': 'cisco_iosxr'})
look_for_keys=False, allow_agent=False)
reply = m.edit_config(target=host=DEVICE,
    config='name': 'cisco_iosxr')
m.commit()

```

- D.

**Answer: C**

Explanation:

Chosen option uses the correct parameters for manager.connect, assigns the OSPF configuration XML to the config argument, and commits the candidate configuration. This matches the setup and variable names defined in the script, ensuring the OSPF process is configured on a Cisco IOS XR router.

#### NEW QUESTION # 55

Refer to the exhibit.

```

"request": {
  "url": "http://{{server}}:{{port}}/restconf/data/l3vpn:vpn/l3vpn=test",
  "method": "POST",
<snip>

```

An automation engineer has created a RESTCONF POST to configure network devices. Which two tasks are accomplished when the code is executed? (Choose two.)

- A. If the specified configuration is already in the running configuration, the command is replaced by this request.
- B. If the specified configuration is already in the running configuration, the command updates this request.
- C. If the specified configuration is already in the running configuration, the command is not replaced by this request.
- D. If the specified configuration is not on the device, the POST request creates it.
- E. If the specified configuration is already executed in the running configuration, the command is merged with this request.

**Answer: B,D**

#### NEW QUESTION # 56

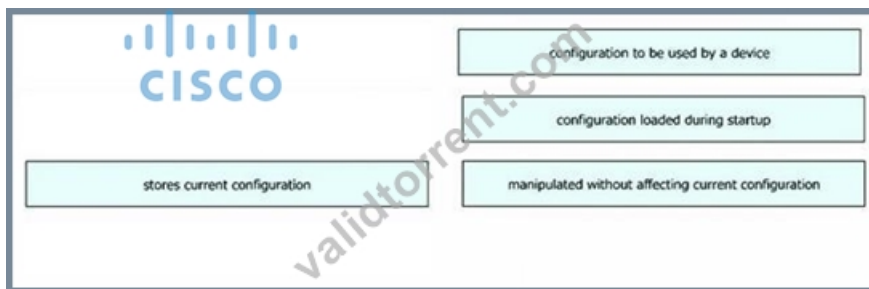

Drag and Drop Question

Drag and drop the characteristics from the left onto the corresponding NETCONF datastores on the right. Not all options are used.

|                                                     |           |
|-----------------------------------------------------|-----------|
| configuration to be used by a device                | running   |
| manipulated without affecting current configuration | startup   |
| stores current configuration                        | candidate |
| configuration loaded during startup                 |           |

**Answer:**

Explanation:

#### NEW QUESTION # 57

Refer to the exhibit.

```
"request": {
  "url": "http://{{server}}:{{port}}/restconf/data/l3vpn:vpn/l3vpn=test",
  "method": "POST",
<snip>
```

An automation engineer has created a RESTCONF POST to configure network devices. Which two tasks are accomplished when the code is executed? (Choose two.)

- A. If the specified configuration is already in the running configuration, the command is replaced by this request.
- **B. If the specified configuration is already in the running configuration, the command updates this request.**
- C. If the specified configuration is already in the running configuration, the command is not replaced by this request.
- **D. If the specified configuration is not on the device, the POST request creates it.**
- E. If the specified configuration is already executed in the running configuration, the command is merged with this request.

**Answer: B,D**

#### NEW QUESTION # 58

Refer to the Cisco IOS XR configuration exhibit.

```
interface Tunnel-te 10
 ipv4 unnumbered Loopback0
 destination 10.5.5.5
 signalled-bandwidth 1000
 priority 7 7
 path-option 1 explicit name testpath
 !
 explicit-path name testpath
 index 1 next-address ipv4 unicast 10.3.3.3
 index 2 next-address ipv4 unicast 10.4.4.4
 !
 mpls traffic-eng
 interface GigabitEthernet 0/0/0/10
 backup-path tunnel-te 10
```

Which statement is correct?

- A. The fast-reroute command is missing under the (config-mpls-te-if)# configuration mode.
- B. The backup tunnel-te 10 tunnel is using the highest setup and hold priority settings of 7.
- C. The backup tunnel path is learned dynamically.
- **D. Interface gi0/0/0/10 is the protected link.**

**Answer: D**
