PMI Cognitive Project Management in AI CPMAI v7 - Training & Certification Exam Sample Questions (Q91-Q96):

NEW QUESTION # 91

You're working on a computer vision application and realize that you do not have enough real world data for the project. You need additional data created to support your training needs. Specifically, the images you need are of people in different poses. What is the best way to obtain this data?

- A. Make use of data from different departments
- B. Make use of Synthetic Training Data
- C. Make use of this data by having employees pose in the positions required

- D. Make use of this data from surveillance footage

Answer: B

Explanation:

Synthetic data is "artificially generated data that mimics real-world data, used when actual data is scarce or sensitive." Generating synthetic training images of people in the required poses allows you to rapidly augment your dataset without logistical, privacy, or labeling overhead.

NEW QUESTION # 92

Your team is working on an image recognition project, have collected the appropriate data for the project, and have picked a neural network algorithm. They are now ready to train their model.

In which phase of CPMAI is this done?

- A. Phase III
- B. Phase VI
- C. Phase II
- **D. Phase IV**
- E. Phase V
- F. Phase I

Answer: D

Explanation:

Phase IV: Model Development is explicitly where "Model Training / Model Building" occurs. This phase includes tasks for selecting modeling techniques, conducting hyperparameter optimization, and executing the actual training runs on the prepared datasets.

NEW QUESTION # 93

You are leading a project to develop a new predictive maintenance solution. Together with your project team you determine your data needs, see if you have access to the data, and then begin working on the project.

Which phase best describes the work you are performing?

- A. Phase III
- B. Phase VI
- C. Phase IV
- D. Phase V
- E. Phase I
- **F. Phase II**

Answer: F

Explanation:

Phase II: Data Understanding is dedicated to identifying data requirements, collecting initial data, assessing data quality, and verifying that necessary datasets are accessible and fit for modeling. Determining what data you need and confirming access are the core activities of this phase .

NEW QUESTION # 94

You are being tasked to manage an AI project at your company and you need to identify which project to start with. What's the best way to approach this?

- A. Go through all possible scenarios to come up with the perfect first project.
- **B. Ask key stakeholders from your group and find a small problem that would have a big return on investment and start there.**
- C. Ask key stakeholders from all groups for input about their pain points.
- D. Find a project that requires 100% accuracy in the results and start with that one.

Answer: B

Explanation:

In Phase I: Business Understanding, CPMAI directs teams to "determine business objectives" by engaging stakeholders to surface specific pain points, estimate time-to-ROI, and prioritize projects that deliver tangible business value quickly. Focusing on a narrowly scoped problem with high ROI ensures early success, builds momentum, and validates the AI methodology before tackling larger or more complex initiatives.

NEW QUESTION # 95

You recently completed an image recognition project at your company that was focused on identifying different types of cars. You have now been assigned a new image recognition project that is focused on identifying different types of animals. You know you can shortcut model development by using a specific technique.

What is this technique called?

- A. Reinforcement Learning
- B. Generative AI
- C. Transfer Learning
- D. Pre-Trained Models

Answer: C

Explanation:

Transfer learning is defined as a technique that "leverages a pretrained model (trained on a large, relevant data set) as a starting point for a new, related task," allowing you to reuse learned representations (e.g., convolutional layers trained on one image domain) when training on another domain (like cars # animals) .

NEW QUESTION # 96
