

# Quiz Fantastic 1z0-915-1 - Oracle MySQL HeatWave Implementation Associate Rel 1 Actual Test Pdf

P.S. Free 2025 Oracle 1z0-915-1 dumps are available on Google Drive shared by Lead2PassExam:  
<https://drive.google.com/open?id=1LPFF88CCTFQx0SY5SgES0npjK0dUiGvx>

Another great way to assess readiness is the 1z0-915-1 web-based practice test. This is one of the trusted online Oracle 1z0-915-1 prep materials to strengthen your concepts. All specs of the desktop software are present in the web-based Oracle 1z0-915-1 Practice Exam. MS Edge, Opera, Firefox, Chrome, and Safari support this 1z0-915-1 online practice test.

There are many advantages of our product and it is worthy for you to buy it. You can download and try out our 1z0-915-1 guide questions demo before the purchase and use them immediately after you pay for them successfully. Once you pay for it, we will send to you within 5-10 minutes. Then you can learn and practice it. We update the 1z0-915-1 Torrent question frequently and provide the discounts to the old client. We check the update every day, once we update, we will send it to you as soon as possible. There are many benefits to buy 1z0-915-1 guide torrent such as after the client pass the exam they can enter in the big company and double their wages.

## 1z0-915-1 Latest Practice Questions & Reliable 1z0-915-1 Test Prep

Our passing rate is very high to reach 99% and our 1z0-915-1 exam torrent also boost high hit rate. Our 1z0-915-1 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our study materials can improve your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You can choose the version which suits you mostly. Our Oracle MySQL HeatWave Implementation Associate Rel 1 exam torrents simplify the important information and seize the focus to make you master the 1z0-915-1 Test Torrent in a short time.

## Oracle 1z0-915-1 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• High Availability: For system reliability engineers and database architects, this domain of the exam covers how to enable and disable the high availability of a DB system, explain placement considerations for a high availability DB system, distinguish between switchover and failover, etc.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• MySQL HeatWave Configurations: For database administrators and performance tuning specialists, this part of the exam covers creating custom configurations, comparing configurations, describing the effects of changing dynamic and non-dynamic variables, and updating a DB system configuration.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Data Migrations: For data migration specialists and database administrators, this part of the exam covers creating a DB system with data import, importing data into a DB system, and exporting data from MySQL servers and DB systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• MySQL HeatWave Service: For database administrators, cloud architects, and DevOps engineers, this section of the exam covers identifying key features and benefits, describing MySQL HeatWave architecture, defining MySQL HeatWave terminology, and identifying MySQL HeatWave limitations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Provisioning and Connecting DB systems: For system administrators and database engineers, this part of the exam covers identifying VCN requirements for provisioning DB systems, connecting to DB systems with OCI Bastion, connecting to DB systems with MySQL Shell, connecting to DB systems with OCI Cloud Shell, connect to DB system with OCI SQL Worksheet, and authenticate DB system with OCI Identity Access Management credentials.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Read Replicas: For database architects and replication specialists, this domain of the exam covers creating and managing read replicas, describing the read replica load balancer, connecting to a read replica, etc.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Describe the architecture of the HeatWave cluster, adding a HeatWave cluster to a DB system, and determine whether a query is offloaded to HeatWave cluster for execution.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• HeatWave Cluster: For database performance specialists and cloud architects, this section of the exam covers</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Inbound Replication: For database administrators and replication experts, this section of the exam covers setting up and troubleshoot inbound replication and creating channels.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Backing up and restoring DB systems: For database administrators and disaster recovery specialists, this section of the exam covers backing up and restoring a DB system, managing automatic backups, and performing point-in-time recovery.</li> </ul>

## Oracle MySQL HeatWave Implementation Associate Rel 1 Sample Questions (Q28-Q33):

### NEW QUESTION # 28

A MySQL DB system has an endpoint in an OCI VCN subnet. The VCN is not configured with VCN peering, VPN access, and FastConnect. You want to connect to the MySQL DB system directly from an OCI Cloud Shell session.

Which two are true? (Choose two.)

- A. You must install mysql client programs in the Cloud Shell session.
- B. The VCN subnet of the Cloud Shell session must have an Internet Gateway in its route table.
- C. The MySQL DB system subnet must be in the Cloud Shell tenancy home region.
- D. You must attach the Cloud Shell session to a VCN subnet that can connect to the MySQL DB system.
- E. The VCN subnet of the Cloud Shell session must have a Service Gateway in its route table.

**Answer: C,D**

Explanation:

To connect to a MySQL DB system from an OCI Cloud Shell session when the VCN is not configured with VCN peering, VPN access, or FastConnect, the following must be true:

A: You must attach the Cloud Shell session to a VCN subnet that can connect to the MySQL DB system. The Cloud Shell must be

in the same network or have a route to the network containing the MySQL DB system.

C: The MySQL DB system subnet must be in the Cloud Shell tenancy home region: Cloud Shell sessions operate within the OCI home region, so the target MySQL DB system must be accessible from within the same region.

#### NEW QUESTION # 29

Which two methods can you use to import data into a MySQL DB system by using MySQL Shell? (Choose two.)

- A. `util.dumpSchemas()`
- B. `util.loadDump()`
- C. `util.importTable()`
- D. `util.dumpInstance()`

**Answer: B,C**

Explanation:

Two methods to import data into a MySQL DB system using MySQL Shell are:

A. `util.importTable()`: This utility imports data from a file into a table. D. `util.loadDump()`: This utility loads a previously dumped database or table into a MySQL DB system.

#### NEW QUESTION # 30

You want to restore the backup of a stand-alone DB system to a new DB system. Which two changes are allowed? (Choose two.)

- A. Use a different tenancy for the new DB system.
- B. Use a different shape for the new DB system.
- C. Use a smaller data storage size for the new DB system.
- D. Use a different region for the new DB system.
- E. Use a different subnet for the new DB system.

**Answer: B,E**

Explanation:

When restoring the backup of a stand-alone DB system to a new DB system, the following changes are allowed:

\* Use a different subnet for the new DB system (Answer B): You can select a different subnet within the same VCN or a different VCN for the new DB system, providing flexibility in network configuration.

\* Use a different shape for the new DB system (Answer C): You can choose a different compute shape for the new DB system, allowing you to scale the compute resources according to the requirements.

\* OCI MySQL Database Service Backup and Restore Documentation

#### NEW QUESTION # 31

You want to import data into a DB system with MySQL Shell `util.loadDump()`.

Which option can speed up the load?

- A. `skipBinlog: true`
- B. `updateGtidSet: off`
- C. `showMetadata: false`
- D. `deferTableIndexes: all`

**Answer: D**

Explanation:

To speed up the data load into a DB system using MySQL Shell `util.loadDump()`, you can use the `deferTableIndexes: all` option (Answer D). This option defers the creation of indexes until after the data has been loaded, which can significantly improve the speed of the loading process.

Steps:

\* Export your data using MySQL Shell dump utility.

\* Use `util.loadDump()` to import the data and specify the `deferTableIndexes: all` option.

- \* The data is loaded without building indexes initially, reducing the time required for the import.
  - \* After the data load is complete, indexes are created in a batch process, which is more efficient than creating them during the data load.

- \* MySQL Shell Dump & Load Documentation

### NEW QUESTION # 32

You want to train a classification model with MySQL HeatWave AutoML. Which two are requirements of the training data set? (Choose two.)

- A. The target column must be numeric.
- B. There must be at least two feature columns.
- **C. The target column and all feature columns must be stored in a single table.**
- **D. The target column must have at least two distinct values.**
- E. All feature columns must be numeric.

**Answer: C,D**

Explanation:

When training a classification model with MySQL HeatWave AutoML, the following requirements must be met:

- \* The target column and all feature columns must be stored in a single table (Answer B): All data necessary for training the model should be in one table to simplify the data processing and training pipeline.
- \* The target column must have at least two distinct values (Answer E): For classification tasks, the target column must have multiple distinct values to enable the model to differentiate between classes.
