Quiz FCP_FMG_AD-7.4 - FCP - FortiManager 7.4 Administrator–Trustable Latest Exam Online

P.S. Free 2025 Fortinet FCP_FMG_AD-7.4 dumps are available on Google Drive shared by BraindumpsVCE:
https://drive.google.com/open?id=1UMyx5RMu5-WZvp6APya-6Qlrq25bdNET

Candidates who become Fortinet FCP_FMG_AD-7.4 certified demonstrate their worth in the Fortinet field. FCP_FMG_AD-7.4 certification is proof of their competence and skills. This is a highly sought after credential and it makes career advancement easier for the candidate. To become Fortinet FCP_FMG_AD-7.4 Certified, you must pass the FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) Exam. For this task, you need actual and updated FCP_FMG_AD-7.4 Questions.

The FCP - FortiManager 7.4 Administrator certification provides beginners and professionals with multiple great career opportunities. The Fortinet Exam FCP_FMG_AD-7.4 examination is one of the most demanding Fortinet tests. There are multiple

benefits you can get after cracking the FCP_FMG_AD-7.4 test. The top-listed benefits include skill verification, high-paying jobs, bonuses, and promotions in your current organizations. All these benefits of earning the FCP_FMG_AD-7.4 certificate help you level up your career in the tech sector.

Visual FCP_FMG_AD-7.4 Cert Exam, FCP_FMG_AD-7.4 Valid Exam Preparation

We have confidence and ability to make you get large returns but just need input small investment. our FCP_FMG_AD-7.4 study materials provide a platform which help you gain knowledge in order to let you outstanding in the labor market and get satisfying job that you like. The content of our FCP_FMG_AD-7.4question torrent is easy to master and simplify the important information. It conveys more important information for FCP_FMG_AD-7.4 Exam with less answers and questions, thus the learning is easy and efficient. We believe our latest FCP_FMG_AD-7.4 exam torrent will be the best choice for you.

Fortinet FCP_FMG_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.
Topic 2	• Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
Topic 3	• Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.
Topic 4	• Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
Topic 5	• Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40
Refer to the exhibit. An administrator is about to add the FortiGate device to FortiManager using the discovery process. FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

```
config system admin setting
set mgmt-addr <FMG_NATed IP address>
```

What is the expected result?

- A. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.
- B. During discovery, FortiManager uses only the FortiGate serial number to establish the connection.

- C. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.
- D. During discovery, FortiManager sets the NATed device IP address on FortiGate.

Answer: C

Explanation:
You can configure the FortiManger NATed IP address on FortiGate under the central management configuration. This allows FortiGate to announce itself to FortiManager and try to re- establish the FGFM tunnel, if it is torn down. Configuring the FortiManager NATed IP address on FortiGate allows both FortiManager and FortiGate to re-establish the FGFM tunnel. Also, if you configure the FortiManager NATed IP address under the FortiManager system administrator settings, FortiManager sets this address on FortiGate during the discovery process.

NEW QUESTION # 41
Refer to the exhibit.

```
FortiManager log

-------Executing time:                              -----------

Starting log (Run on device)

Local-FortiGate $ config user local
Local-FortiGate (local) $ edit student
Local-FortiGate (student) $ set type ldap
Local-FortiGate (student) $ set status enable
Local-FortiGate (student) $ next
Attribute 'ldap-server' MUST be set.
Command fail. Return code 1
Local-FortiGate (local) $ end
Local-FortiGate $ config firewall policy
Local-FortiGate (policy) $ edit 2
Local-FortiGate (2) $ set srcintf port3
Local-FortiGate (2) $ set dstintf port1
Local-FortiGate (2) $ set srcaddr all
Local-FortiGate (2) $ set dstaddr all
Local-FortiGate (2) $ set action accept
Local-FortiGate (2) $ set schedule always
Local-FortiGate (2) $ set service ALL
Local-FortiGate (2) $ set users student
entry not found in datasource

value parse error before 'student'
Command fail. Return code -3
Local-FortiGate (2) $ set nat enable
Local-FortiGate (2) $ next
Local-FortiGate (policy) $ end
Local-FortiGate $

----------------End of Log----------------------
```

What can you conclude from the failed installation log shown in the exhibit?

- A. Policy ID 2 will not be installed.
- B. Policy ID 2 is installed in the disabled state.
- C. Policy ID 2 is installed without a source address.
- D. Policy ID 2 is installed without the remote user student.

Answer: D

Explanation:
From the log provided in the exhibit, several conclusions can be drawn regarding the installation of Policy ID
2:
* The installation process fails when attempting to set theLDAP user "student". The log shows:
* "Attribute 'ldap-server' MUST be set.": This error indicates that when setting up the LDAP user configuration, a mandatory field (ldap-server) is missing. As a result, the configuration could not be completed for the user.
* "entry not found in datasource"and"value parse error before 'student'": These errors confirm that the user "student" could not be

properly added due to a configuration issue (such as the missing LDAP server).

Because of these errors, while other configuration elements (such as source and destination interfaces, actions, and services) are properly set, the user configuration for "student" is not applied.

Evaluation of the answer options:

* A. Policy ID 2 is installed in the disabled state.
* This is false. There is no indication in the log that Policy ID 2 is disabled.
* B. Policy ID 2 is installed without the remote user student.
* This is true. Due to the failure in setting the "student" user (as indicated by the errors), the policy will be installed without that user being properly configured.
* C. Policy ID 2 will not be installed.
* This is false. The policy is installed, but the user configuration failed. The rest of the policy configuration appears to have proceeded without critical errors that would prevent the installation.
* D. Policy ID 2 is installed without a source address.
* This is false. The log shows that the source address is properly set to "all" (set srcaddr all), so this is not the cause of the issue.

From the log exhibit, we see errors related to the "ldap-server" attribute not being set and an error with the entry "student" not being found in the datasource. This indicates that Policy ID 2 will not be installed due to missing or incorrect data required for successful installation. The "Command fail. Return code -3" confirms the installation failure, so the correct answer is C.

Options A, B, and D are incorrect because:

* A suggests the policy is installed in a disabled state, which isn't supported by the log.
* B and D suggest partial installation, but the error messages indicate a complete failure to install Policy ID 2.

FortiManager References:

* Refer to FortiManager 7.4 Troubleshooting Guide: Common Errors and Log Interpretation.

NEW QUESTION # 42

Refer to the exhibit.
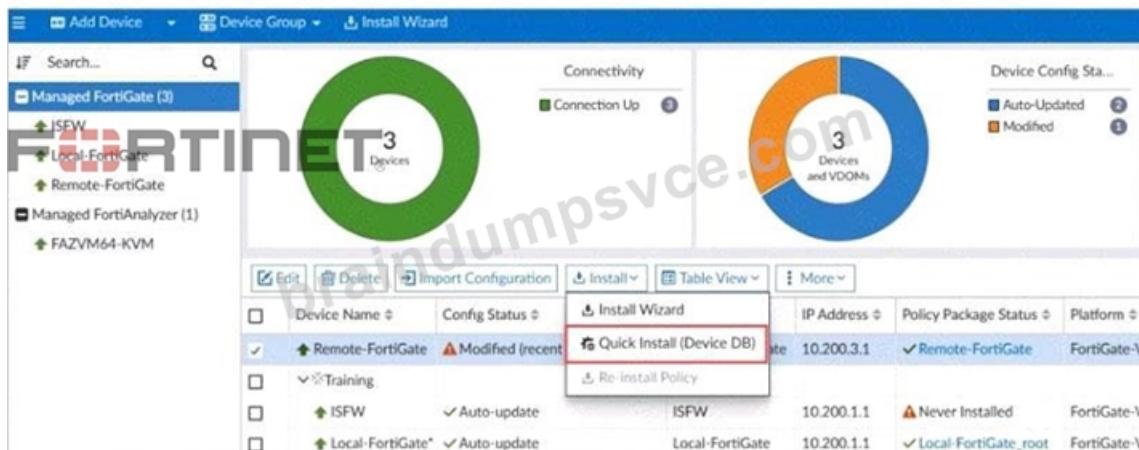

You are using the Quick Install option to install configuration changes on the managed FortiGate.

Which two statements correctly describe the result? (Choose two.)

- A. It provides the option to preview only the policy package changes before installing them.
- B. It installs provisioning template changes on the FortiGate device.
- C. It installs device-level changes on the FortiGate device without launching the Install Wizard
- D. It installs all the changes in the device database first and the administrator must reinstall the changes on the FortiGate device.

Answer: A,C

Explanation:

* Option B: It provides the option to preview only the policy package changes before installing them. This is correct. The Quick Install option in FortiManager provides a preview of policy changes before they are applied, allowing administrators to review and confirm the changes.

* Option D: It installs device-level changes on the FortiGate device without launching the Install Wizard. This is correct. Quick Install allows for the immediate installation of device-level changes, such as interface or routing configurations, directly onto the FortiGate without going through the full Install Wizard.

Explanation of Incorrect Options:

* Option A: It installs provisioning template changes on the FortiGate deviceis incorrect because Quick Install does not specifically deal with provisioning templates.
* Option C: It installs all the changes in the device database first and the administrator must reinstall the changes on the FortiGate deviceis incorrect because Quick Install directly applies changes to the FortiGate device, not requiring a separate reinstall step.
FortiManager References:
* Refer to "FortiManager Administration Guide" for details on "Quick Install" functionality under
"Device Management."

NEW QUESTION # 43
Refer to the exhibit. Given the configuration shown in the exhibit, what are two results from this configuration? (Choose two.)

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

- A. Concurrent read-write access to an ADOM is disabled.
- B. Two or more administrators can make configuration changes at the same time, in the same ADOM.
- C. You can validate administrator login attempts through external servers.
- D. The same administrator can lock more than one ADOM at the same time.

Answer: A,D

NEW QUESTION # 44
In the event that one of the secondary FortiManager devices fails, which action must be performed to return the FortiManager HA manual mode to a working state?

- A. Reboot the failed device to remove its IP from the primary device.
- B. Reconfigure the primary device to remove the peer IP of the failed device.
- C. Manually promote one of the working secondary devices to the primary role, and reboot the old primary device to remove the peer IP of the failed device.
- D. The FortiManager HA state transition is transparent to administrators and does not require any reconfiguration.

Answer: B

Explanation:
If the secondary FortiManager fails, the administrator can reconfigure the primary device to remove the secondary configuration.

NEW QUESTION # 45
......

Laziness will ruin your life one day. It is time to have a change now. Although we all love cozy life, we must work hard to create our own value. Then our FCP_FMG_AD-7.4 training materials will help you overcome your laziness. Study is the best way to enrich your life. On one hand, you may learn the newest technologies in the field with our FCP_FMG_AD-7.4 Study Guide to help you better adapt to your work, and on the other hand, you will pass the FCP_FMG_AD-7.4 exam and achieve the certification which is the symbol of competence.
