

Quiz Fortinet First-grade NSE8_812 - Fortinet NSE 8 - Written Exam (NSE8_812) PDF Cram Exam

P.S. Free 2025 Fortinet NSE8_812 dumps are available on Google Drive shared by Exam4PDF: https://drive.google.com/open?id=184T_74TVV4kRsgbnkI-A0e031-RIZMGF

Desktop practice test software, and web-based practice test software. All three Exam4PDF NSE8_812 practice test questions formats are easy to use and compatible with all devices and operating systems. The Exam4PDF NSE8_812 desktop practice test software and web-based practice test software both are the NSE8_812 Practice Exam. While practicing on Fortinet Fortinet NSE 8 - Written Exam (NSE8_812) practice test software you will experience the real-time Fortinet NSE 8 - Written Exam (NSE8_812) NSE8_812 exam environment for preparation. This will help you to understand the pattern of final NSE8_812 exam questions and answers.

Fortinet NSE8_812 Certification Exam is an advanced-level test designed for experienced network and security professionals who aim to showcase their expertise and knowledge in designing and implementing complex network security solutions. Fortinet NSE 8 - Written Exam (NSE8_812) certification is recognized globally and is an excellent way for professionals to differentiate themselves from their peers and advance their careers in the network security industry.

Latest NSE8_812 Exam Registration, Trusted NSE8_812 Exam Resource

In order to let you understand our products in detail, our Fortinet NSE 8 - Written Exam (NSE8_812) test torrent has a free trial service for all customers. You can download the trial version of our NSE8_812 study torrent before you buy our products, you will develop a better understanding of our products by the trial version. In addition, the buying process of our NSE8_812 exam prep is very convenient and significant. You will receive the email from our company in 5 to 10 minutes after you pay successfully; you just need to click on the link and log in, then you can start to use our NSE8_812 study torrent for studying. Immediate download after pay successfully is a main virtue of our Fortinet NSE 8 - Written Exam (NSE8_812) test torrent. At the same time, you will have the chance to enjoy the 24-hours online service if you purchase our products, so we can make sure that we will provide you with an attentive service.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q39-Q44):

NEW QUESTION # 39

Refer to the exhibit.

```

config vpn ipsec phase1-interface
  edit "vpn-hub02-1"
    set interface "wan1"
    set ike-version 2
    set authmethod signature
    set net-device enable
    set proposal aes256-sha256
    set auto-discovery-receiver enable
    set remote-gw 192.168.168.100
    set certificate "BR01FGTLOCAL"
    set peer "vpn-hub02-1_peer"
  next
end

```

To facilitate a large-scale deployment of SD-WAN/ADVPN with FortiGate devices, you are tasked with configuring the FortiGate devices to support injecting of IKE routes on the ADVPN shortcut tunnels.

Which three commands must be added or changed to the FortiGate spoke config vpn ipsec phase1-interface options referenced in the exhibit for the VPN interface to enable this capability? (Choose three.)

- A. set mode-cfg-allow-client-selector enable
- B. set net-device disable
- C. set ike-version 1
- D. set add-route enable
- E. set mode-cfg enable

Answer: A,D,E

Explanation:

B must be set to enable mode-cfg, which is required for injecting IKE routes on the ADVPN shortcut tunnels.

D must be set to enable add-route, which is the command that actually injects the IKE routes.

E must be set to enable mode-cfg-allow-client-selector, which allows custom phase 2 selectors to be configured.

The other options are incorrect. Option A is incorrect because net-device disable is not required for injecting IKE routes on the ADVPN shortcut tunnels. Option C is incorrect because IKE version 1 is not supported for ADVPN.

Phase 2 selectors and ADVPN shortcut tunnels | FortiGate / FortiOS 7.2.0 Configuring SD-WAN/ADVPN with FortiGate | FortiGate / FortiOS 7.2.0

NEW QUESTION # 40

Which two statements are correct on a FortiGate using the FortiGuard Outbreak Protection Service (VOS)? (Choose two.)

- A. The antivirus database queries FortiGuard with the hash of a scanned file
- B. The FortiGuard VOS can be used only with proxy-base policy inspections.
- C. The hash signatures are obtained from the FortiGuard Global Threat Intelligence database.
- D. The AV engine scan must be enabled to use the FortiGuard VOS feature
- E. If third-party AV database returns a match the scanned file is deemed to be malicious.

Answer: A,C

Explanation:

* C. The antivirus database queries FortiGuard with the hash of a scanned file. This is how the FortiGuard VOS service works. The FortiGate queries FortiGuard with the hash of a scanned file, and FortiGuard returns a list of known malware signatures that match the hash.

* E. The hash signatures are obtained from the FortiGuard Global Threat Intelligence database. This is where the FortiGuard VOS service gets its hash signatures from. The FortiGuard Global Threat Intelligence database is updated regularly with new malware signatures.

NEW QUESTION # 41

You want to use the MTA adapter feature on FortiSandbox in an HA-Cluster. Which statement about this solution is true?

- A. The MTA adapter is only available in the primary node.
- B. The configuration is different than on a standalone device.
- C. The MTA adapter mode is only detection mode.
- D. The configuration of the MTA Adapter Local Interface is different than on port1.

Answer: A

Explanation:

The MTA adapter feature on FortiSandbox is a feature that allows FortiSandbox to act as a mail transfer agent (MTA) that can receive, inspect, and forward email messages from external sources. The MTA adapter feature can be used to integrate FortiSandbox with third-party email security solutions that do not support direct integration with FortiSandbox, such as Microsoft Exchange Server or Cisco Email Security Appliance (ESA). The MTA adapter feature can also be used to enhance email security by adding an additional layer of inspection and filtering before delivering email messages to the final destination. The MTA adapter feature can be enabled on FortiSandbox in an HA-Cluster, which is a configuration that allows two FortiSandbox units to synchronize their settings and data and provide high availability and load balancing for sandboxing services. However, one statement about this solution that is true is that the MTA adapter is only available in the primary node. This means that only one FortiSandbox unit in the HA-Cluster can act as an MTA and receive email messages from external sources, while the other unit acts as a backup node that can take over the MTA role if the primary node fails or loses connectivity. This also means that only one IP address or FQDN can be used to configure the external sources to send email messages to the FortiSandbox MTA, which is the IP address or FQDN of the primary node. References: <https://docs.fortinet.com/document/fortisandbox/3.2.0/administration-guide/19662/mail-transfer-agent-mta> <https://docs.fortinet.com/document/fortisandbox/3.2.0/administration-guide/19662/high-availability-ha>

NEW QUESTION # 42

You must configure an environment with dual-homed servers connected to a pair of FortiSwitch units using an MCLAG. Multicast traffic is expected in this environment, and you should ensure unnecessary traffic is pruned from links that do not have a multicast listener.

In which two ways must you configure the `igmps-flood-traffic` and `igmps-flood-report` settings? (Choose two.)

- A. enable on the ISL and FortiLink trunks
- B. enable on ICL trunks
- C. disable on ICL trunks
- D. disable on the ISL and FortiLink trunks

Answer: A,C

Explanation:

To ensure that unnecessary multicast traffic is pruned from links that do not have a multicast listener, you must disable IGMP flood traffic on the ICL trunks and enable IGMP flood reports on the ISL and FortiLink trunks.

Disabling IGMP flood traffic will prevent the FortiSwitch units from flooding multicast traffic to all ports on the ICL trunks. This will help to reduce unnecessary multicast traffic on the network.

Enabling IGMP flood reports will allow the FortiSwitch units to learn which ports are interested in receiving multicast traffic. This will help the FortiSwitch units to prune multicast traffic from links that do not have a multicast listener.

NEW QUESTION # 43

Refer to the exhibit.

What is happening in this scenario?

- A. The user status changed at FortiClient EMS to off-net.
- B. The user is authenticating against a FortiGate Captive Portal.
- C. The user is authenticating against an IdP.
- **C. The user has not authenticated on their external browser.**

Answer: C

NEW QUESTION # 44

.....

For the convenience of the users, the NSE8_812 test materials will be updated on the homepage and timely update the information related to the qualification examination. Annual qualification examination, although content broadly may be the same, but as the policy of each year, the corresponding examination pattern grading standards and hot spots will be changed, as a result, the NSE8_812 Test Prep can help users to spend the least time, you can know the test information directly what you care about on the learning platform that provided by us, let users save time and used their time in learning the new hot spot concerning about the knowledge content.
