GAQM CBCP-002 Lead2pass, Reliable CBCP-002 Exam Test

Our CBCP-002 study guide boasts many merits and functions. You can download and try out our CBCP-002 test question freely before the purchase. You can use our product immediately after you buy our product. We provide 3 versions for you to choose and you only need 20-30 hours to learn our CBCP-002 training materials and prepare the exam. The passing rate and the hit rate are both high. We provide 24-hours online customer service and free update within one year. And if you have a try on our CBCP-002 Exam Questions, you will find that there are many advantages of our CBCP-002 training materials.

The CBCP-002 certification exam is a computer-based exam that consists of 150 multiple-choice questions. Candidates have three hours to complete the exam, and they must score a minimum of 70% to pass. CBCP-002 Exam is available in multiple languages, including English, Spanish, and Chinese.

GAQM Certified Business Continuity Professional (CBCP) Sample Questions (Q23-Q28):

NEW QUESTION # 23

BIA stands for

- A. Business Improvement Activities
- **B. Business Impact Analysis**
- C. Business Information Availability
- D. Business Importance and Availability

Answer: B

Explanation:

Explanation

Business impact analysis (BIA) is the process of identifying and prioritizing the organization's functions and processes based on their importance to the organization's objectives, and assessing the potential impacts of a disruption to those functions and processes over time. The BIA helps to determine the recovery time objectives (RTOs), recovery point objectives (RPOs), and resource requirements for each function and process, as well as the interdependencies and dependencies among them. The BIA provides the basis for developing recovery strategies and plans. Verified References:

NEW QUESTION # 24

Which of the following are the four T's of risk guidance produced by the Office of Government Commerce? (choose four)

- A. Terminate
- B. Tolerate
- C. Treat
- D. Title
- E. Technique
- F. Transfer

Answer: A,B,C,F

Explanation:

Explanation

The four T's of risk guidance produced by the Office of Government Commerce are transfer, tolerate, treat, and terminate. They are:
Transfer: This strategy involves transferring or sharing some or all of the responsibility or impact of a risk to another party, such as an insurer, a supplier, or a partner.

Tolerate: This strategy involves accepting or retaining a risk without taking any further action to reduce it, either because the risk level is acceptable or because the cost or effort of reducing it is not justified.

Treat: This strategy involves taking steps to reduce the likelihood or impact of a risk to an acceptable level, such as implementing controls, mitigations, or contingency plans.

Terminate: This strategy involves eliminating or avoiding a risk by discontinuing or changing the activity that causes it. Verified References: <https://www.investopedia.com/terms/t/the-four-ts.asp>

NEW QUESTION # 25

What is the frequency of BCP testing for critical processes?

- A. Half-yearly
- B. Quarterly
- C. Annually
- D. As per calendar planned at beginning of the year

Answer: C

Explanation:

The frequency of BCP testing for critical processes is a fundamental aspect of ensuring a plan remains effective and relevant. Business Continuity Professional standards, such as those from DRI International and ISO 22301, provide guidance on testing frequency based on the criticality of processes and organizational needs.

* Annually: Industry standards recommend that critical processes undergo comprehensive BCP testing at least once a year. This ensures that plans are validated, personnel are trained, and any gaps or changes in the business environment are addressed. Annual testing is considered a baseline requirement for maintaining resilience, particularly for critical functions that, if disrupted, could severely impact the organization.

* Quarterly: While more frequent testing (e.g., quarterly) may be appropriate for highly dynamic environments or specific high-risk processes, it is not a universal requirement for all critical processes.

Quarterly testing is typically reserved for specific scenarios or as part of a progressive testing strategy rather than a standard frequency.

* As per calendar planned at beginning of the year: This option implies a flexible schedule, but it lacks specificity and does not align with standardized recommendations. Testing should follow a defined frequency rather than an arbitrary calendar plan unless explicitly tied to a standard (e.g., annual).

* Half-yearly: Semi-annual testing (every six months) may be adopted by some organizations for additional assurance, but it exceeds the minimum standard requirement of annual testing for critical processes unless specified by organizational policy or regulatory mandates.

The verified answer, A. Annually, reflects the widely accepted minimum frequency for testing critical processes as per Business Continuity Professional guidelines. However, organizations may increase frequency based on risk assessments or regulatory requirements, though this is not the default expectation.

References:

* DRI International Professional Practices for Business Continuity Management (2023), Section 9:

Testing and Exercising - Recommends annual testing as a minimum for critical processes.

* ISO 22301:2019, Clause 8.5 - Specifies regular testing and exercising, with annual frequency as a common benchmark for critical functions.

NEW QUESTION # 26

BIA helps you identify

- A. Critical interdependencies and interested parties
- **B. All of the above**
- C. Critical services and products
- D. Tangible and intangible impact of a disruption over period of time

Answer: B

Explanation:

Explanation

BIA helps to identify all of the above aspects of an organization's functions and processes. It helps to identify the critical services and products that the organization delivers to its customers and stakeholders, and the functions and processes that support them. It also helps to identify the critical interdependencies and interested parties that are involved in or affected by the organization's functions and processes, such as suppliers, partners, regulators, or employees. Moreover, it helps to identify the tangible and intangible impacts of a disruption to the organization's functions and processes over a period of time, such as financial losses, reputational damage, legal liabilities, or customer dissatisfaction. NEW QUESTION # 27

Which certification centre provides the physical infrastructure?

- A. Service
- **B. Facility**

Answer: B

Explanation:

A facility certification center is a center that provides the physical infrastructure for testing and certifying the functionality and performance of products, systems, or services. A facility certification center may have specialized equipment, tools, environments, or standards that can simulate real-world conditions or scenarios.

A facility certification center may also have qualified staff, experts, or auditors who can conduct the testing and certification process.
