2025 Google Associate-Cloud-Engineer: Google Associate Cloud Engineer Exam –Efficient Review Guide

Our Associate-Cloud-Engineer study materials can provide you with multiple modes of experience, there are three main modes to choose from: PDF, Software and Online. Firstly, the PDF version is printable. Secondly, the Software version of Associate-Cloud-Engineer exam questions can simulate the real exam environment to give you exam experience more vividly. Thirdly, the online version supports all web browsers so that it can be worked on all the operating systems. And our Associate-Cloud-Engineer Study Materials will help you in a more relaxed learning atmosphere to pass the Associate-Cloud-Engineer exam.

Google Associate Cloud Engineer Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39
You want to configure 10 Compute Engine instances for availability when maintenance occurs. Your requirements state that these instances should attempt to automatically restart if they crash. Also, the instances should be highly available including during system maintenance. What should you do?

- A. Create an instance template for the instances. Set the 'Automatic Restart' to on. Set the 'On-host maintenance' to Migrate VM instance. Add the instance template to an intsance group.
- B. Create an instance group for the instances. Set the 'Autohealing' health check to healthy (HTTP).
- C. Create an instance group for the instance. Verify that the 'Advanced creation options' setting for 'do not retry machine creation' is set to off.
- D. Create an instance templated for the instances. Set 'Automatic Restart' to off. Set 'On-host maintenance' to Terminate VM instances. Add the instance template to an instance group.

Answer: D

NEW QUESTION # 40

You need to manage a third-party application that will run on a Compute Engine instance. Other Compute Engine instances are already running with default configuration. Application installation files are hosted on Cloud Storage. You need to access these files from the new instance without allowing other virtual machines (VMs) to access these files. What should you do?

- A. Create the instance with the default Compute Engine service account Grant the service account permissions on Cloud Storage.
- B. Create the instance with the default Compute Engine service account Add metadata to the objects on Cloud Storage that matches the metadata on the new instance.
- C. Create a new service account and assig n this service account to the new instance Grant the service account permissions on Cloud Storage.
- D. Create a new service account and assign this service account to the new instance Add metadata to the objects on Cloud Storage that matches the metadata on the new instance.

Answer: B

Explanation:
Explanation
https://cloud.google.com/iam/docs/best-practices-for-using-and-managing-service-accounts If an application uses third-party or custom identities and needs to access a resource, such as a BigQuery dataset or a Cloud Storage bucket, it must perform a transition between principals. Because Google Cloud APIs don't recognize third-party or custom identities, the application can't propagate the end-user's identity to BigQuery or Cloud Storage. Instead, the application has to perform the access by using a different Google identity.

NEW QUESTION # 41

Your development team needs a new Jenkins server for their project. You need to deploy the server using the fewest steps possible. What should you do?

- A. Create a Kubernetes cluster on Compute Engine and create a deployment with the Jenkins Docker image.
- B. Create a new Compute Engine instance and install Jenkins through the command line interface.
- C. Use GCP Marketplace to launch the Jenkins solution.
- D. Download and deploy the Jenkins Java WAR to App Engine Standard.

Answer: C

NEW QUESTION # 42

Your company wants to standardize the creation and management of multiple Google Cloud resources using Infrastructure as Code. You want to minimize the amount of repetitive code needed to manage the environment. What should you do?

- A. Use the Cloud Console interface to provision and manage all related resources.
- B. Use curl in a terminal to send a REST request to the relevant Google API for each individual resource.
- C. Create a bash script that contains all requirement steps as gcloud commands.
- D. Develop templates for the environment using Cloud Deployment Manager.

Answer: D

Explanation:
You can use Google Cloud Deployment Manager to create a set of Google Cloud resources and manage them as a unit, called a deployment. For example, if your team's development environment needs two virtual machines (VMs) and a BigQuery database, you can define these resources in a configuration file, and use Deployment Manager to create, change, or delete these resources. You can make the configuration file part of your team's code repository, so that anyone can create the same environment with consistent results.
https://cloud.google.com/deployment-manager/docs/quickstart

NEW QUESTION # 43

Your finance team is working with the engineering team to try and determine your spending for each service by day and month

across all projects used by the billing account. What is the easiest and most flexible way to aggregate and analyze the data?

- A. Use the built-in reports which already show this data.
- B. Export the data for the billing account(s) involved to BigQuery; then use BigQuery to analyze the service data for the desired projects, by day and month.
- C. Export the data for the billing account(s) to File, import the files into a SQL database; then use BigQuery to analyze the service data for the desired projects, by day and month.
- D. Export the data for the billing account(s) involved to a JSON File; use a Cloud Function to listen for a new file in the Storage bucket; code the function to analyze the service data for the desired projects, by day and month.

Answer: B

NEW QUESTION # 44

......

In accordance with the actual exam, we provide the latest Associate-Cloud-Engineer exam dumps for your practices. With the latest Associate-Cloud-Engineer test questions, you can have a good experience in practicing the test. Moreover, you have no need to worry about the price, we provide free updating for one year and half price for further partnerships, which is really a big sale in this field. After your payment, we will send the updated Associate-Cloud-Engineer Exam to you immediately and if you have any question about updating, please leave us a message on our Associate-Cloud-Engineer exam questions.

Associate-Cloud-Engineer Reliable Practice Questions: https://www.latestcram.com/Associate-Cloud-Engineer-exam-cram-questions.html

Google Associate-Cloud-Engineer exam questions PDF file is designed for easy comprehension, allowing you to download it onto various smart devices, Now, let's have a good knowledge of the Associate-Cloud-Engineer passleader study torrent, Google Review Associate-Cloud-Engineer Guide We give you 100 percent guarantee that if you fail the test unluckily, we will return full refund to you, LatestCram provides valid Associate-Cloud-Engineer practice test material for applicants who want to pass the Associate-Cloud-Engineer exam quickly.

He also spends a few minutes talking about technical issues that Associate-Cloud-Engineer affect how you approach mathematics on the computer, Affiliate program models have evolved quite a bit since their inception.

Trusting Authorized Review Associate-Cloud-Engineer Guide in LatestCram Is The Valid Way to Pass Google Associate Cloud Engineer Exam

Google Associate-Cloud-Engineer Exam Questions Pdf file is designed for easy comprehension, allowing you to download it onto various smart devices, Now, let's have a good knowledge of the Associate-Cloud-Engineer passleader study torrent.

We give you 100 percent guarantee that if you fail the test unluckily, we will return full refund to you, LatestCram provides valid Associate-Cloud-Engineer practice test material for applicants who want to pass the Associate-Cloud-Engineer exam quickly.

Now getting an international Associate-Cloud-Engineer certificate has become a trend.
