

Quiz HPE7-J02 - Advanced HPE Storage Integrator Solutions Written Exam Newest Download Demo

P.S. Free & New HPE7-J02 dumps are available on Google Drive shared by Itbraindumps: <https://drive.google.com/open?id=1Im9zR6m4O8mVta3ThOGysPzisQ-DdrO>

Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. HPE7-J02 test questions have the function of supporting printing in order to meet the need of customers. You can print our HPE7-J02 Exam Question on papers after you have downloaded it successfully. It not only can help you protect your eyes, but also it will be very convenient for you to make notes. We believe that you will like our HPE7-J02 exam prep.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.
Topic 2	<ul style="list-style-type: none">Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.
Topic 3	<ul style="list-style-type: none">Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 4	<ul style="list-style-type: none">Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.
Topic 5	<ul style="list-style-type: none">Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.

- **Monitoring and Telemetry:** This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.

TOP HPE7-J02 Download Demo - Valid HP Advanced HPE Storage Integrator Solutions Written Exam - HPE7-J02 Latest Materials

With these two Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 practice exams, you will get the actual HP HPE7-J02 exam environment. Whereas the Itbraindumps PDF file is ideal for restriction-free test preparation. You can open this PDF file and revise HPE7-J02 Real Exam Questions at any time. Choose the right format of Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 actual questions and start HP HPE7-J02 preparation today.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

Your customer has deployed an HPE Alletra MP B10000 array in its virtualized environment. Data protection follows 3-2-1 best practices, with snapshots on the array, Veeam v12 backups, and storage on an external HPE StoreOnce appliance. Despite this, a ransomware attack made data recovery impossible.

Your customer asks how to enhance data protection with immutability and application consistency.

What is a possible solution using HPE Virtual Lock technology?

- A. Enable Virtual Lock on the HPE Alletra storage array
- B. Enable Virtual Lock for each backup job inside Veeam v12
- C. Enable Virtual Lock on the VMware datastores in VMware vCenter
- **D. Enable Virtual Lock on the HPE StoreOnce Catalyst stores**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Option C is correct because HPE StoreOnce Virtual Lock technology provides immutability at the Catalyst store level, preventing backup data from being deleted or modified for a defined retention period.

This ensures ransomware or malicious actors cannot encrypt, alter, or delete the protected backups, aligning with modern data protection requirements for immutability and compliance. In integration with Veeam v12, backups stored on StoreOnce Catalyst stores can be locked, creating an additional immutability layer beyond application-consistent snapshots.

Analysis of Incorrect Options (Distractors):

A: Virtual Lock is not a Veeam feature. While Veeam v12 supports immutability on certain storage backends (object lock-enabled S3, hardened Linux repositories), HPE Virtual Lock is specific to StoreOnce Catalyst stores, not Veeam job settings.

B: VMware vCenter datastores do not have a native immutability feature. Snapshots in vCenter can be deleted or corrupted during ransomware events, making this option incorrect.

D: HPE Alletra arrays support application-consistent snapshots and replication, but they do not provide the immutability guarantee that StoreOnce Virtual Lock enforces. Array-level snapshots can still be deleted if admin credentials are compromised.

Key Concept:

This question targets knowledge of HPE StoreOnce Virtual Lock - a feature designed to enforce immutability on Catalyst backup stores, making backup data resistant to deletion or alteration during ransomware or insider attacks.

NEW QUESTION # 19

Two HPE Storage Alletra MP B10000 arrays are deployed with Active Peer Persistence. Both arrays and hosts are installed in close proximity to each other. To enable symmetric access, Peer Persistence must be configured accordingly. Which Host Proximity Parameter should be selected for host ESX31 in this case?

- A. Primary
- B. Exclusive
- **C. All**
- D. Secondary

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Option B (All) is correct because in an Active Peer Persistence deployment where both arrays and hosts are in close proximity (metro or campus cluster scenario), the hosts should be configured with Host Proximity = All. This ensures that the host (ESX31) can access both arrays symmetrically and concurrently, enabling active-active paths. This is essential to deliver seamless failover and load balancing across the arrays in an HPE Alletra MP Peer Persistence environment.

Analysis of Incorrect Options (Distractors):

A (Secondary): This is used for hosts located closer to the secondary array, to bias access toward it in asymmetric deployments. Not applicable here since the hosts are near both arrays.

C (Exclusive): This option assigns the host to a single array exclusively, preventing dual-active access. This would defeat the purpose of symmetric Peer Persistence.

D (Primary): Similar to Secondary, this biases access to only the primary array, which is not correct when arrays and hosts are in the same site for active-active.

Key Concept:

This question focuses on Host Proximity parameters in HPE Peer Persistence.

Primary/Secondary = asymmetric designs (hosts closer to one array).

All = symmetric design (hosts equidistant to both arrays, enabling active-active).

Exclusive = restricts access to one array only.

NEW QUESTION # 20

While attempting to increase an upstream volume size for an Alletra 6000 Peer Persistence setup from local web management, you are facing an error that prevents you from completing the task.

Which action is required to complete the task successfully?

- A. Increase the size of the volume in VMware HPE Storage plugin.
- B. Remove the upstream volume, volume collection before increasing the upstream volume.
- **C. Use the Data Services Cloud Console to grow the upstream volume.**
- D. Remove the downstream volume, volume collection before increasing the upstream volume.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In Alletra 6000 Peer Persistence environments, operations like resizing Peer Persistence volumes must be performed via the HPE Data Services Cloud Console (DSCC), which manages volume collections and replication consistency groups. Attempting to grow the upstream volume locally will fail because the changes need to propagate across both sites consistently.

Distractors:

A/B: Removing upstream or downstream volumes would break replication and is not required.

D: Expanding in VMware only extends the VMFS datastore, not the underlying replicated volume.

Key Concept: Peer Persistence volume resizing is done in DSCC, not local web GUI.

Reference: HPE Alletra 6000 Peer Persistence Configuration and Management Guide.

NEW QUESTION # 21

A global financial services company is looking to enhance its disaster recovery (DR) capabilities. They operate VMware workloads across multiple data centers and a mix of AWS and Azure cloud workloads. They need a solution that can replicate data with near-zero recovery point objectives (RPOs) and orchestrate rapid recovery of critical applications in case of a site-wide failure.

- A. Cohesity
- B. SimpliVity
- C. CommVault
- **D. Zerto**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto, now part of HPE, provides continuous data protection (CDP) with near-zero RPOs and very low RTOs. It supports VMware workloads, as well as hybrid cloud deployments with AWS and Azure. Zerto is specifically designed for disaster recovery orchestration, enabling automated failover, failback, and application-consistent protection across sites and cloud environments.

Distractors:

B (CommVault): Primarily a backup/recovery and data management platform - RPOs are not near-zero.

C (Cohesity): Strong in backup, secondary storage, and ransomware recovery, but not near-zero RPO DR orchestration.

D (SimpliVity): Hyperconverged infrastructure with built-in backup, but not optimized for large-scale multi- cloud DR.

Key Concept: Continuous Data Protection (Zerto) for hybrid/multi-cloud disaster recovery.

Reference: HPE Zerto DR for Hybrid and Multi-cloud Environments.

NEW QUESTION # 22

Your customer has expressed an interest in an HPE CloudPhysics assessment of their environment. They would like to know what to expect from this process.

Which of the following statements is true of a CloudPhysics assessment?

- **A. Some assessment results are visible in only 2 hours.**
- B. Your customer can only access a partial view of the results.
- C. An auto-generated token from HPE is required to view the results.
- D. The assessment period lasts for 5 business days.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE CloudPhysics begins collecting performance and capacity data immediately after deployment of the Observer VM/collector.

Some initial assessment results (e.g., environment inventory, early utilization stats) can be visible within 2 hours, while deeper trending insights require longer data collection (days/weeks).

Distractors:

B: Tokens are not required for customers to view results; reports are available via the portal.

C: Customers get a full dashboard view of results, not partial.

D: Assessments can run for longer periods (days-weeks), not fixed at 5 days.

Key Concept: CloudPhysics delivers initial insights within hours.

Reference: HPE CloudPhysics Technical Overview.

NEW QUESTION # 23

.....

A Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) practice questions is a helpful, proven strategy to crack the Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam successfully. It helps candidates to know their weaknesses and overall performance. Itbraindumps software has hundreds of Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam dumps that are useful to practice in real-time. The Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) practice questions have a close resemblance with the actual Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam.
