

Quiz Juniper - Pass-Sure JN0-637 Test Dumps

2025 Latest TestInsides JN0-637 PDF Dumps and JN0-637 Exam Engine Free Share: https://drive.google.com/open?id=1OaU2_KI1rizinhzBkynyBOtSSpo-L_xv

If you are worried about your JN0-637 practice test and you have no much time to prepare, now you can completely rest assured it because we will offer you the most updated JN0-637 dumps pdf with 100% correct answers. You can save your time and money by enjoying one-year free update after purchasing our JN0-637 Dumps PDF. We also provide the free demo for your reference.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 2	Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.
Topic 3	Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.
Topic 4	Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.
Topic 5	Automated Threat Mitigation: This topic covers Automated Threat Mitigation concepts and emphasizes implementing and managing threat mitigation strategies.
Topic 6	Advanced Policy-Based Routing (APBR): This topic emphasizes on advanced policy-based routing concepts and practical configuration or monitoring tasks.

Topic 7	Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.

Latest JN0-637 Exam Duration - Test JN0-637 Lab Questions

Nothing venture, nothing have. Many people know Juniper certification will be a big effect for their career, but IT exams are difficult to pass as everyone knows. I want to introduce you our best products JN0-637 latest exam cram file which is famous for its 100% pass-rate. Candidates from all over the world choose us and clear their exams certainly with only little cost fee and 15-30 hours preparation before the exam. JN0-637 Latest Exam Cram file is useful and valid.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q19-Q24):

NEW QUESTION # 19

Exhibit

```

user@SRX> show service security-intelligence category summary
Category name      :SecProfiling
Status             :Enable
Description        :Security Profiling Data
Update interval    :300s
TTL                :172800s
Feed name          :Proxy_Nodes
Version            :20220812.1
Objects number     :80
Create time        :2022-08-14 11:53:46 UTC
Update time        :2022-08-15 06:11:11 UTC
Update status      :Store succeeded
Expired            :No
Status             :Active
Options            :N/A

user@SRX> show security dynamic-address category-name SecProfiling feed-name
Proxy_Nodes
user@SRX>

```

You have recently configured Adaptive Threat Profiling and notice 20 IP address entries in the monitoring section of the Juniper ATP Cloud portal that do not match the number of entries locally on the SRX Series device, as shown in the exhibit.

What is the correct action to solve this problem on the SRX device?

- A. Flush the DNS cache on the SRX device.
- B. Refresh the feed in ATP Cloud.
- C. Force a manual download of the Proxy_Nodes feed.
- D. You must configure the DAE in a security policy on the SRX device.

Answer: A

NEW QUESTION # 20

Refer to the Exhibit:

testinsides.top

Which two statements about the configuration shown in the exhibit are correct?

- A. The remote IKE gateway IP address is 203.0.113.100.
- B. The local peer is assigned a dynamic IP address.
- C. The local IKE gateway IP address is 203.0.113.100.
- D. The remote peer is assigned a dynamic IP address.

Explanation:

A) The remote IKE gateway IP address is 203.0.113.100. The exhibit shows that the address option under the gateway statement is set to 203.0.113.100, which specifies the IP address of the primary IKE gateway. The address option is used to configure the IP address or the hostname of the remote peer that has a static IP address[1].

D) The remote peer is assigned a dynamic IP address. The exhibit shows that the dynamic option under the gateway statement is configured with various attributes, such as general-ikeid, ike-user-type, and user-at-hostname. The dynamic option is used to configure the identifier for the remote gateway with a dynamic IP address. The dynamic option also enables the SRX Series device to accept multiple connections from remote peers that have the same identifier2.

B) The local peer is not assigned a dynamic IP address, but a static IP address. The exhibit shows that the local-address option under the gateway statement is set to 192.0.2.100, which specifies the IP address of the local IKE gateway. The local-address option is used to configure the IP address of the local peer that has a static IP address.

C) The local IKE gateway IP address is not 203.0.113.100, but 192.0.2.100, as explained above.

Reference: gateway (Security IKE) dynamic (Security IKE)

You want to configure the SRX Series device to map two peer interfaces together and ensure that there is no switching or routing lookup to forward traffic.

Which feature on the SRX Series device is used to accomplish this task?

- A. Mixed mode
- B. Secure wire
- C. Switching mode
- D. Transparent mode

Explanation:

* Secure Wire Feature:

* Connects two interfaces directly without any Layer 2 or Layer 3 processing.

* No routing or switching lookup occurs.

* Use Case:

* Ideal for scenarios where traffic needs to pass through the SRX device transparently.

Option B: Secure wire

* Explanation:

* Secure wire creates a bidirectional link between two interfaces.

* Traffic flows between the interfaces as if they are connected by a physical wire.

NEW QUESTION # 22

You are asked to detect domain generation algorithms

Which two steps will accomplish this goal on an SRX Series firewall? (Choose two.)

- A. Attach the advanced-anti-malware policy to a security policy.
- B. Define an advanced-anti-malware policy under [edit services].
- C. Define a security-metadata-streaming policy under [edit
- D. Attach the security-metadata-streaming policy to a security

Answer: A,B

NEW QUESTION # 23

Exhibit:

Referring to the exhibit, which two statements are true? (Choose two.)

- A. Hosts in the Local zone can be enabled for control plane access to the SRX.
- B. An IRB interface is required to enable communication between the Trust and the Untrust zones.
- C. You can configure security policies for traffic flows between hosts in the Local zone.
- D. Hosts in the Local zone can communicate with hosts in the Trust zone with a security policy.

Answer: A,D

NEW QUESTION # 24

.....

Obtaining the JN0-637 certification is not an easy task. Only a few people can pass it successfully. If you want to be one of them, please allow me to recommend the JN0-637 learning questions from our company to you, the superb quality of JN0-637 Exam Braindumps we've developed for has successfully helped thousands of candidates to realize their dreams. And our JN0-637 study materials have helped so many customers pass the exam.
