## **C-S4EWM-2023 Question Explanations - Exam C-S4EWM-2023 Reviews**

Not only our C-S4EWM-2023 study guide has the advantage of high-quality, but also has reasonable prices that are accessible for every one of you. So it is incumbent upon us to support you. On the other side, we know the consumers are vulnerable for many exam candidates are susceptible to ads that boost about C-S4EWM-2023 skills their practice with low quality which may confuse exam candidates like you, so we are trying hard to promote our high quality C-S4EWM-2023 study guide to more people.

### **SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q54-Q59):**

#### **NEW QUESTION # 54**

What additional customizing is required for a new EWM document type for an inbound process?

- A. Define a document category for the inbound process.
- B. Define the EWM delivery type determination.
- C. Define a delivery item type for the inbound process.
- **D. Define the SAP ERP document type mapping to the delivery document type.**

**Answer: D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

For a new EWM document type in an inbound process, integration with SAP ERP is critical. Option C ("Define the SAP ERP document type mapping to the delivery document type") is correct because you must map the ERP document type (e.g., "EL" for inbound delivery) to the EWM document type in SPRO: SCM Extended Warehouse Management > Interfaces > ERP Integration > Map Document Types. Options A, B, and D are either predefined (document category) or not mandatory (item type, delivery type determination) for basic inbound setup.

#### **NEW QUESTION # 55**

With decentralized EWM, you can skip certain document categories. Which document category combination is still mandatory?

- **A. An outbound delivery order and an outbound delivery**
- B. A posting change request and a posting change
- C. A production material request and a stock transfer
- D. An outbound delivery request and an outbound delivery order

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In decentralized EWM, some document categories can be bypassed, but option A ("An outbound delivery order and an outbound delivery") is mandatory because the outbound delivery order (ODO) is created in EWM from an ERP outbound delivery request, and the outbound delivery is completed after processing, configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Outbound Delivery.

Other combinations (B, C, D) can be optional or situational.

#### NEW QUESTION # 56

To which object do you assign the replenishment method?

- A. Document type
- B. Document category
- **C. Storage type**
- D. Warehouse process type

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Replenishment in SAP EWM moves stock from reserve to picking areas. Option A ("Storage type") is correct because the replenishment method (e.g., automatic, planned) is assigned to a storage type in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Replenishment > Define Replenishment Control per Storage Type. This determines how replenishment is triggered for that area. Options B, C, and D (document-related or process type) are not directly linked to replenishment method assignment.

#### NEW QUESTION # 57

What can a warehouse order include? Note: There are 2 correct answers to this question.

- A. Wave items
- B. Warehouse tasks
- **C. Physical inventory items**
- **D. Warehouse requests**

**Answer: C,D**

#### NEW QUESTION # 58

Where do you enable opportunistic cross-docking in a decentralized EWM?

- A. In the warehouse and the document type
- B. In the product and the document type
- **C. In the product and the warehouse process type**
- D. In the warehouse and the product

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Opportunistic cross-docking in SAP EWM allows goods to be moved directly from goods receipt to goods issue without intermediate storage, optimizing warehouse efficiency. This functionality is enabled at the product level and linked to the warehouse process type, which defines the process flow (e.g., putaway, picking, or cross-docking). In a decentralized EWM system, the configuration is maintained in the product master data (under the "Warehouse" tab) where you specify cross-docking relevance, and in the warehouse process type (SPRO: SCM Extended Warehouse Management > Cross-Docking > Opportunistic Cross-Docking) where the system determines whether a product can bypass putaway. The warehouse process type controls the movement type, and the product master defines eligibility, making option B the correct choice.

Options A, C, and D are incorrect because the document type and warehouse alone do not control this process-it's a combination of product-specific settings and process type logic.

#### NEW QUESTION # 59

.....

At any point in the process of buying our C-S4EWM-2023 exam braindumps, the customer does not need to check the status of

the purchase order, because as long as you have paid for it, then you can get it in a second. With all those efficiency, our C-S4EWM-2023 study engine is suitable in this high-speed society. With strong strength in this career, we can claim that you can only study our C-S4EWM-2023 learning guide for 20 to 30 hours, you can pass your C-S4EWM-2023 exam with 100% guarantee.
