If you want to get a comprehensive idea about our real PL-600 study materials, you can free download the demos on our website. It is convenient for you to download the free demos of our PL-600 learning guide, all you need to do is just to find the “Download for free” item, and you will find there are three kinds of versions of PL-600 Learning Materials for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one as you like.

Microsoft Power Platform Solution Architect Sample Questions (Q127-

Q132):

NEW QUESTION # 127

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application.

Employees report that they are unable to open the application.

You need to ensure that the employees can access the application.

Solution: Add the employees to the user table in the environment.

Does the solution meet the goal?

- A. No
- **B. Yes**

Answer: B

NEW QUESTION # 128

You need to recommend technology for accessing historical job placement data.

What should you recommend?

- A. Power Automate flows
- **B. Virtual tables**
- C. Power Virtual Agents chatbots
- D. Power BI

Answer: B

Explanation:

Explanation

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The solution must provide a worker appointment booking system that can access worker historical job placement data.

First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Topic 2, Relecloud

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to

the question.

Background

Relecloud provides regional air service in North America. The company uses a variety of systems, apps, and services to manage the business. You are hired to design a new solution to manage passenger information, reservations, and maintenance.

Current environment

The company uses Microsoft Office 365.

The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

For flights longer than four hours, passengers receive a meal. Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.

The company uses paper-based reservation checklists to help ensure that all the steps for a reservation are complete.

The company uses vendors to service aircraft.

Environment

Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.

Minimize the use of third-party products and custom development.

Reduce customer support call volumes by having the system automatically resolve common issues.

The security rule for agents must contain the privileges in the default Customer Service Representative security role.

Log issues as cases. The case form must show variable sections based on the case type. Include a custom entity named Seats and grant agents access to the entity.

Application use layout should be role specific.

Agents

You must standardize the format used by agents to enter customer phone numbers.

Agents need a solution to replace paper reservation checklists.

Agents need dashboards to show a current count of all reservations on the entity.

Agents need a way to track reservation issues.

Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.

Agents need different versions of cancellation policies to send customers. One version must be controllable within the system.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

IT

IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.

IT staff needs a system that is easy to navigate to active cases.

IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.

IT specialists need a solution that is visual rather than text-based so they can quickly complete their tasks.

Management

Management requires paginated reports for stakeholders.

Management wants to provide frequent flyers with better service when the flyers call.

Managers need to see all customer dashboards at the top of their menu on their mobile device.

Maintenance

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

Contracts with maintenance companies must be stored in Dynamics 365 Customer Service.

NEW QUESTION # 129

You are designing a Power Platform solution for a company.

You have the following requirements:

Users in the human resources department must be able to create tasks.

Users in the human resources department must be able to assign cases to other users.

You need to recommend security settings to the company.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Business requirement	Solution
Users in the human resources department must be able to create tasks.	Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.

Answer:

Explanation:

Business requirement	Solution
Users in the human resources department must be able to create tasks.	Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.

NEW QUESTION # 130

Hotspot Question

A company has an on-premises data warehouse and analytics solution. The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data.

The data warehouse consolidates and normalizes data that is sourced from 20 different systems.

The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse.

The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.

The new solution must meet these requirements:

- Support the current data warehouse.
- The solution must support drill-through capabilities into the data.
- Retain at least seven years of historical data.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area Microsoft	
Requirement	Solution
Data storage and normalization.	▼ Data Gateway Azure Data Lake Dataverse for Teams Azure Analysis Services
Visibility to key operational metrics from various Teams channels.	▼ Power BI AI Builder Teams adaptive cards Microsoft Teams integration object

Answer:

Explanation:

Answer Area Microsoft

Requirement	Solution
Data storage and normalization.	▼ Data Gateway Azure Data Lake Dataverse for Teams Azure Analysis Services
Visibility to key operational metrics from various Teams channels.	▼ Power BI AI Builder Teams adaptive cards Microsoft Teams integration object

Explanation:

Box 1: Data Gateway

The solution must support the current data warehouse so the intention is to not replace it

<https://docs.microsoft.com/en-us/data-integration/gateway/service-gateway-onprem> Box 2: Power BI It can be integrated into teams with any data set. Once On-prem, gateway is connected. Anything can be tracked with drilled down abilities and can be integrated into Teams at ease.

NEW QUESTION # 131

A company wants to create a Power Automate flow that posts marketing events to social media.

The company must ensure that the postings adhere to regulatory requirements for handling of personally identifiable information (PII)

dat a. The company will not post events to unauthorized social media platforms.
You need to ensure that the requirement is met.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Create a security role to prevent data export.
- **B. Create a Data Loss Protection (DLP) policy.**
- **C. Configure the relevant connector so that it is part of the Blocked data group category.**
- D. Configure the relevant connector so that it is part of the Non-Business data group category.
- E. Configure an Azure Active Directory (AAD) security role for the maker to the environment.

Answer: B,C

Explanation:

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.
