If you are remain an optimistic mind all the time when you are preparing for the Databricks-Certified-Data-Engineer-Associate exam, we deeply believe that it will be very easy for you to successfully pass the Databricks-Certified-Data-Engineer-Associate exam, and get the related Databricks-Certified-Data-Engineer-Associate certification in the near future. Of course, we also know that how to keep an optimistic mind is a question that is very difficult for a lot of people to answer. As is known to us, where there is a will, there is a way. We believe you will get wonderful results with the help of our Databricks-Certified-Data-Engineer-Associate Exam Questions as we have been professional in this field.

Databricks-Certified-Data-Engineer-Associate certification is highly regarded in the industry and is recognized by many organizations as a mark of excellence in data engineering. Databricks Certified Data Engineer Associate Exam certification can help data engineers to advance their careers and increase their earning potential. It can also help employers to identify skilled and knowledgeable data engineers who can help them to unlock the value of their data.

The GAQM Databricks-Certified-Data-Engineer-Associate (Databricks Certified Data Engineer Associate) Exam is a certification exam that tests the skills and knowledge of individuals in the field of data engineering using Databricks. Databricks is a cloud-based data platform that allows data engineers to build, manage, and deploy data pipelines at scale. Databricks-Certified-Data-Engineer-Associate Exam is designed to assess an individual's proficiency in using Databricks to perform tasks such as data transformation, data ingestion, and data analysis.

The GAQM Databricks-Certified-Data-Engineer-Associate (Databricks Certified Data Engineer Associate) Certification Exam is designed to test an individual's knowledge and skills in using Databricks for data engineering tasks. Databricks Certified Data Engineer Associate Exam certification is highly recognized and respected in the industry and can be used as a benchmark for recruiters and employers to assess the candidate's proficiency in data engineering with Databricks.

## 100% Pass 2025 Valid Databricks-Certified-Data-Engineer-Associate: Databricks Certified Data Engineer Associate Exam Actual Dumps

The trick to the success is simply to be organized, efficient, and to stay positive about it. If you are remain an optimistic mind all the time when you are preparing for the Databricks-Certified-Data-Engineer-Associate exam, we deeply believe that it will be very easy for you to successfully pass the exam, and get the related certification in the near future. Of course, we also know that how to keep an optimistic mind is a question that is very difficult for a lot of people to answer. Because the Databricks-Certified-Data-Engineer-Associate Exam is so difficult for a lot of people that many people have a failure to pass the exam.

## Databricks Certified Data Engineer Associate Exam Sample Questions (Q48-

## Q53):

### NEW QUESTION # 48

A new data engineering team has been assigned to an ELT project. The new data engineering team will need full privileges on the database customers to fully manage the project.

Which of the following commands can be used to grant full permissions on the database to the new data engineering team?

- A. GRANT SELECT PRIVILEGES ON DATABASE customers TO teams;
- B. GRANT ALL PRIVILEGES ON DATABASE customers TO team;
- C. GRANT USAGE ON DATABASE customers TO team;
- D. GRANT ALL PRIVILEGES ON DATABASE team TO customers;
- E. GRANT SELECT CREATE MODIFY USAGE PRIVILEGES ON DATABASE customers TO team;

**Answer: B**

Explanation:

Explanation

To grant full privileges on the database "customers" to the new data engineering team, you can use the GRANT ALL PRIVILEGES command as shown in option E. This command provides the team with all possible privileges on the specified database, allowing them to fully manage it.

### NEW QUESTION # 49

A data engineer needs to apply custom logic to string column city in table stores for a specific use case. In order to apply this custom logic at scale, the data engineer wants to create a SQL user-defined function (UDF).

Which of the following code blocks creates this SQL UDF?

- A. CREATE UDF combine\_nyc(city STRING)  
RETURN CASE  
WHEN city = "brooklyn" THEN "new york"  
ELSE city  
END;
- B. CREATE FUNCTION combine\_nyc(city STRING)  
RETURNS STRING  
AS BEGIN  
RETURN CASE  
WHEN city = "brooklyn" THEN "new york"  
ELSE city  
END;  
END;
- C. CREATE UDF combine\_nyc(city STRING)  
RETURNS STRING  
AS BEGIN  
RETURN CASE  
WHEN city = "brooklyn" THEN "new york"  
ELSE city  
END;  
END;
- D. CREATE UDF combine\_nyc(city STRING)  
RETURNS STRING  
AS CASE  
WHEN city = "brooklyn" THEN "new york"  
ELSE city  
END;
- E. CREATE FUNCTION combine\_nyc(city STRING)  
RETURNS STRING  
AS BEGIN  
RETURN CASE  
WHEN city = "brooklyn" THEN "new york"  
ELSE city  
END;  
END;

**Answer: E**

Explanation:

**NEW QUESTION # 50**

A data architect has determined that a table of the following format is necessary:

employeeId	startDate	avgRating
a1	2009-01-06	5.5
a2	2018-11-21	7.1
...  databricks	...	...

Which of the following code blocks uses SQL DDL commands to create an empty Delta table in the above format regardless of whether a table already exists with this name?

```
CREATE TABLE IF NOT EXISTS table_name (
    employeeId STRING,
    A.   startDate DATE,
    avgRating FLOAT
) 
```

```
CREATE OR REPLACE TABLE table_name AS
SELECT
    employeeId STRING,
    B.   startDate DATE,
    avgRating FLOAT
    USING DELTA
```

```
CREATE OR REPLACE TABLE table_name WITH COLUMNS (
    employeeId STRING,
    C.   startDate DATE,
    avgRating FLOAT
    ) USING DELTA
```

```
CREATE TABLE table_name AS
SELECT
    D.   employeeId STRING,
    startDate DATE,
    avgRating FLOAT
```

```
CREATE OR REPLACE TABLE table_name (
    employeeId STRING,
    E.   startDate DATE,
    avgRating FLOAT
)
```

- A. Option D
- B. Option C
- C. Option A

- D. Option B
- E. Option E

**Answer: E**

#### NEW QUESTION # 51

A data organization leader is upset about the data analysis team's reports being different from the data engineering team's reports.

The leader believes the siloed nature of their organization's data engineering and data analysis architectures is to blame.

Which of the following describes how a data lakehouse could alleviate this issue?

- A. Both teams would autoscale their work as data size evolves
- B. Both teams would reorganize to report to the same department
- C. Both teams would respond more quickly to ad-hoc requests
- D. Both teams would use the same source of truth for their work
- E. Both teams would be able to collaborate on projects in real-time

**Answer: D**

Explanation:

A data lakehouse is a data management architecture that combines the flexibility, cost-efficiency, and scale of data lakes with the data management and ACID transactions of data warehouses, enabling business intelligence (BI) and machine learning (ML) on all data12. By using a data lakehouse, both the data analysis and data engineering teams can access the same data sources and formats, ensuring data consistency and quality across their reports. A data lakehouse also supports schema enforcement and evolution, data validation, and time travel to old table versions, which can help resolve data conflicts and errors1. References: 1: What is a Data Lakehouse? - Databricks 2: What is a data lakehouse? | IBM

#### NEW QUESTION # 52

Which of the following code blocks will remove the rows where the value in column age is greater than 25 from the existing Delta table my\_table and save the updated table?

- A. UPDATE my\_table WHERE age <= 25;
- B. **DELETE FROM my\_table WHERE age > 25;**
- C. UPDATE my\_table WHERE age > 25;
- D. DELETE FROM my\_table WHERE age <= 25;
- E. SELECT \* FROM my\_table WHERE age > 25;

**Answer: B**

Explanation:

1: The DELETE command in Delta Lake allows you to remove data that matches a predicate from a Delta table. This command will delete all the rows where the value in the column age is greater than 25 from the existing Delta table my\_table and save the updated table. The other options are either incorrect or do not achieve the desired result. Option A will only select the rows that match the predicate, but not delete them. Option B will update the rows that match the predicate, but not delete them. Option D will update the rows that do not match the predicate, but not delete them. Option E will delete the rows that do not match the predicate, which is the opposite of what we want. Reference: Table deletes, updates, and merges - Delta Lake Documentation

#### NEW QUESTION # 53

.....

We guarantee you that our top-rated Databricks Databricks-Certified-Data-Engineer-Associate practice exam (PDF, desktop practice test software, and web-based practice exam) will enable you to pass the Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) certification exam on the very first go. The authority of VCEPrep in Databricks-Certified-Data-Engineer-Associate Exam Questions rests on its being high-quality and prepared according to the latest pattern.
