

Quiz Nutanix - NCP-MCI-6.10 - High Hit-Rate Test

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Quiz

BONUS!!! Download part of Itcerttest NCP-MCI-6.10 dumps for free: https://drive.google.com/open?id=1IEeJ1dMZYdLiDMFTS9VB_ntbnmgy5PdW

Obtaining Nutanix certification will let your resume shine and make a great difference to your career. But the preparation of Nutanix NCP-MCI-6.10 is long and difficult task. So choosing best study materials for NCP-MCI-6.10 Real Exam is necessary to every candidate. Latest braindumps from Itcerttest can help you pass exam with high passing score in a short time.

The most important is that you just only need to spend 20 to 30 hours on practicing NCP-MCI-6.10 exam questions before you take the exam, therefore you can arrange your time to balance learning and other things. Of course, you care more about your test pass rate. We offer you more than 99% pass guarantee if you are willing to use our NCP-MCI-6.10 test guide and follow our plan of learning. If you fail to pass the exam with our Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) torrent prep, you will get a full refund. However, if you want to continue studying our course, you can still enjoy comprehensive services through NCP-MCI-6.10 Torrent prep. We will update relevant learning materials in time. And we guarantee that you can enjoy a discount of more than one year.

Free PDF Nutanix - NCP-MCI-6.10 Fantastic Test Quiz

Our NCP-MCI-6.10 exam questions are supposed to help you pass the exam smoothly. Don't worry about channels to the best NCP-MCI-6.10 study materials so many exam candidates admire our generosity of offering help for them. Up to now, no one has ever challenged our leading position of this area. The existence of our NCP-MCI-6.10 learning guide is regarded as in favor of your efficiency of passing the exam. And the pass rate of our NCP-MCI-6.10 training braindumps is high as 98% to 100%.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q74-Q79):

NEW QUESTION # 74

In Prism Element, how many nodes can be placed into maintenance mode at one time on 12-node FT2 cluster?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

In a 12-node FT2 cluster, only one node can be placed into maintenance mode at a time. This ensures that the cluster maintains data redundancy and protection (FT2 indicates 2-failure tolerance).

From the Nutanix Enterprise Cloud Administration (ECA) course materials:

"For FT2 clusters, a maximum of one node can be placed in maintenance mode at a time to ensure the cluster's ability to tolerate failures and maintain quorum."

NEW QUESTION # 75

Which update in LCM can an administrator apply on a per-node basis?

- A. NCC
- **B. BMC**
- C. AOS
- D. AHV

Answer: B

Explanation:

BMC (Baseboard Management Controller) updates can be applied per-node in Nutanix LCM, unlike AOS or AHV, which require cluster-wide upgrades.

* Option B (BMC) is correct:

* BMC firmware controls remote management and power cycling of individual nodes.

* Updating BMC does not impact the entire cluster and can be done per node.

* Option A (AOS) is incorrect:

* AOS upgrades affect the entire cluster and require cluster-wide consistency.

* Option C (NCC) is incorrect:

* NCC updates apply across all nodes simultaneously, ensuring uniformity in checks.

* Option D (AHV) is incorrect:

* AHV updates require coordinated upgrades across hosts to maintain VM availability.

References:

* Nutanix LCM User Guide#Per-Node Firmware Updates

* Nutanix KB#How to Upgrade BMC Using LCM

NEW QUESTION # 76

An administrator observes an alert in Prism for a hybrid SSD/HDD cluster:

"Storage Pool SSD utilization consistently above 75%."

What is the potential impact of this condition?

- A. The cluster may be nearly out of storage for metadata.
- B. The cluster is at risk of entering a read-only state.
- C. The cluster is unable to sustain an SSD disk failure.
- **D. Average I/O latency in the cluster may increase.**

Answer: D

Explanation:

High SSD utilization in a hybrid cluster can lead to increased I/O latency as new writes may spill over to HDDs, reducing overall performance.

* Option D (Average I/O latency in the cluster may increase) is correct:

- * If SSD usage is above 75%, data tiering shifts to slower HDDs, increasing latency.
- * Option A is incorrect:
- * SSD failures are managed via redundancy policies (RF2/RF3), and high utilization does not impact failure handling.
- * Option B is incorrect:
- * Metadata is stored separately, and high SSD usage does not mean metadata is at risk.
- * Option C is incorrect:
- * Clusters do not go into read-only mode due to high SSD utilization—they simply experience performance degradation.

References:

- * Nutanix Storage Performance Guide#SSD Tiering and Performance Management
- * Nutanix KB#Managing High SSD Utilization in Hybrid Clusters

NEW QUESTION # 77

An administrator wants to enable application discovery on a Nutanix cluster to monitor applications. A Prism Central instance is already configured with sufficient CPU and memory.

What other prerequisites must be met before enabling application discovery? (Choose two.)

- A. Internet connection
- B. Network controller is enabled
- C. API key and key ID
- D. Sufficient Prism Central VM resources

Answer: A,D

NEW QUESTION # 78

Refer to the Exhibit:

Host 1 (128 GB)			
VMs	VM Memory (GB)	Utilized Memory (GB)	Unutilized Memory (GB)
VM1	64 GB	48 GB	16 GB
VM2	32 GB	20 GB	12 GB
VM3	32 GB	24 GB	8 GB
Total	128 GB	92 GB	36 GB

An administrator needs to create two virtual machines: VM4 and VM5 that leverage the memory over-commit feature.

Once VM4 is created and running, the administrator notices that it uses only 28GB of RAM.

What will be the maximum RAM that can be allocated to VM5 so that it can be powered on?

- A. 4GB
- B. 32GB
- C. 8GB
- D. 16GB

Answer: C

Explanation:

Understanding the Exhibit & Memory Allocation

- * The host has 128GB of physical RAM.
- * The current memory allocation across three VMs (VM1, VM2, VM3) is 128GB, but only 92GB is actually utilized.
- * This means there is 36GB of unutilized memory available for allocation.

Step-by-Step Breakdown

* Existing Memory Usage Before Adding VM4

* Total Physical RAM: 128GB

* Used by running VMs (VM1, VM2, VM3): 92GB

* Unutilized Memory Available: 36GB

* After Creating and Running VM4

* VM4 is allocated memory but only utilizes 28GB.

* The table does not show VM4's allocated RAM, but assuming it was given a reasonable allocation, it must have been taken from the 36GB unutilized memory pool.

- * If VM4 uses 28GB, the remaining unutilized memory is now (36GB - 28GB) = 8GB.
- * Maximum Memory Allocation for VM5
- * Since only 8GB remains unutilized, the maximum memory VM5 can be allocated while still allowing it to power on is 8GB.

Evaluating the Answer Choices

- * (A) 4GB#(Incorrect)
- * More memory (8GB) is available, so limiting to 4GB is unnecessary.
- * (B) 8GB#(Correct)
- * The remaining unutilized memory after VM4 is 8GB, so VM5 can be allocated up to 8GB while ensuring it can power on.
- * (C) 16GB#(Incorrect)
- * Only 8GB is left, so 16GB is not possible.
- * (D) 32GB#(Incorrect)
- * There is not enough unutilized memory to allocate 32GB.

Key Concept: Nutanix Memory Overcommit

* Nutanix AHV supports memory overcommit, meaning VMs can be allocated more memory than physically available using memory ballooning and swapping.

* However, to power on VM5 without impacting performance, it must fit within the available unutilized memory, which is 8GB.

NEW QUESTION # 79

.....

If you are really not sure which version you like best, you can also apply for multiple trial versions of our NCP-MCI-6.10 exam questions. We want our customers to make sensible decisions and stick to them. NCP-MCI-6.10 study engine can be developed to today, and the principle of customer first is a very important factor. NCP-MCI-6.10 Training Materials really hope to stand with you, learn together and grow together.

NCP-MCI-6.10 Latest Exam Pdf: https://www.itcerttest.com/NCP-MCI-6.10_braindumps.html

You can learn and practice our NCP-MCI-6.10 study materials: Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) with ease and master them quickly in a short time, because our NCP-MCI-6.10 exam torrent files are efficient and accurate to learn by exam students of all different levels. With over ten years' efforts, we strive for a high quality and high efficiency NCP-MCI-6.10 exam study material. Many candidates ask us if your NCP-MCI-6.10 exam resources are really valid, if our exam file is really edited based on first-hand information & professional experts and if your NCP-MCI-6.10 practice test materials are really 100% pass-rate.

WScript.Echo EncryptionLevel: objItem.EncryptionLevel, I entered the exam today, You can learn and practice our NCP-MCI-6.10 study materials: Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) with ease and master them quickly in a short time, because our NCP-MCI-6.10 Exam Torrent files are efficient and accurate to learn by exam students of all different levels.

Free PDF Quiz 2025 Unparalleled Nutanix Test NCP-MCI-6.10 Quiz

With over ten years' efforts, we strive for a high quality and high efficiency NCP-MCI-6.10 exam study material. Many candidates ask us if your NCP-MCI-6.10 exam resources are really valid, if our exam file is really edited based on first-hand information & professional experts and if your NCP-MCI-6.10 practice test materials are really 100% pass-rate.

We are a recognized leader in providing reliable NCP-MCI-6.10 PDF & test engine dumps for IT certification exams, especially for NCP-MCI-6.10 certifications exams. We strongly advise you to buy our study material if you want to pass the exam easily.
