# Quiz Perfect Cisco - 300-710 - Valid Dumps Securing Networks with Cisco Firepower Pdf

What's more, part of that PrepAwayETE 300-710 dumps now are free: https://drive.google.com/open?id=1Qu4GRddhxwmeIoeDrQsUQl4tEQu2_ec6

The print option of this format allows you to carry a hard copy with you at your leisure. We update our Securing Networks with Cisco Firepower (300-710) pdf format regularly so keep calm because you will always get updated Securing Networks with Cisco Firepower (300-710) questions. PrepAwayETE offers authentic and up-to-date Securing Networks with Cisco Firepower (300-710) study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Securing Networks with Cisco Firepower (300-710) exam on the first try.

Cisco 300-710 exam covers a wide range of topics related to network security, including network security concepts, threat defense, and VPN technologies. 300-710 exam also covers advanced topics such as network access control, security intelligence, and advanced malware protection. 300-710 Exam is designed to test the candidate's understanding of network security concepts and their ability to apply these concepts to real-world scenarios.

300-710 Quiz Practice Materials - 300-710 Quiz Torrent & 300-710 Test Bootcamp

PrepAwayETE never sells the useless 300-710 certification 300-710 exam dumps out. You will receive our 300-710 exam dumps in time and get CCNP Security Certified easily. Try 300-710 Exam free demo before you decide to buy it in PrepAwayETE. After you buy PrepAwayETE certification 300-710 exam dumps, you will get free update for ONE YEAR!

Cisco Securing Networks with Cisco Firepower Sample Questions (Q221-Q226):

NEW QUESTION # 221
An administrator configures the interfaces of a Cisco Secure Firewall Threat Defence device in an inline IPS deployment. The administrator completes these actions:
* identifies the device and the interfaces
* sets the interface mode to inline
* enables the interlaces
Which configuration step must the administrator take next to complete the implementation?

- A. Set the interface to routed mode.
- B. Enable spanning-tree PortFast on the interfaces.
- C. Configure an inline set
- D. Set the interface to Transparent mode.

Answer: C

Explanation:
After setting the interface mode to inline and enabling the interfaces on a Cisco Secure Firewall Threat Defense (FTD) device in an inline IPS deployment, the next step is to configure an inline set. An inline set groups two interfaces that work together to inspect traffic passing between them.
Steps to configure an inline set:
* In FMC, navigate to Devices > Device Management.
* Select the FTD device and configure the interfaces.
* Create a new inline set, adding the relevant interfaces that have been set to inline mode.
* Deploy the configuration to the FTD device.
Configuring an inline set ensures that the traffic between the specified interfaces is inspected and processed according to the IPS policies, completing the implementation of the inline IPS deployment.

NEW QUESTION # 222
After deploying a network-monitoring tool to manage and monitor networking devices in your organization, you realize that you need to manually upload an MIB for the Cisco FMC. In which folder should you upload the MIB file?

- A. system/etc/DCEALERT.MIB
- B. /etc/sf/DCEALERT.MIB
- C. /etc/sf/DCMIB.ALERT
- D. /sf/etc/DCEALERT.MIB

Answer: B

Explanation:
Section: Management and Troubleshooting
Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/firesight/541/firepower-module-user-guide/asa- firepower-module-user-guide-v541/Intrusion-External-Responses.pdf

NEW QUESTION # 223
An administrator is adding a QoS policy to a Cisco FTD deployment. When a new rule is added to the policy and QoS is applied on 'Interfaces in Destination Interface Objects", no interface objects are available What is the problem?

- A. The FTD is out of available resources lor use. so QoS cannot be added
- B. A conflict exists between the destination interface types that is preventing QoS from being added
- C. The network segments that the interfaces are on do not have contiguous IP space
- D. QoS is available only on routed interfaces, and this device is in transparent mode.

Answer: D

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config- guide-v64/quality_of_service__qos__for_firepower_threat_defense.html

NEW QUESTION # 224
What is a behavior of a Cisco FMC database purge?

- A. User login and history data are removed from the database if the User Activity check box is selected.
- B. Data can be recovered from the device.
- C. The appropriate process is restarted.
- D. The specified data is removed from Cisco FMC and kept for two weeks.

Answer: C

NEW QUESTION # 225
Upon detecting a flagrant threat on an endpoint, which two technologies instruct Cisco Identity Services Engine to contain the infected endpoint either manually or automatically? (Choose two.)

- A. Cisco FMC
- B. Cisco ASA 5500 Series
- C. Cisco AMP
- D. Cisco Stealthwatch
- E. Cisco ASR 7200 Series

Answer: D,E

NEW QUESTION # 226
......

Preparing for the Securing Networks with Cisco Firepower (300-710) certification test can be a difficult task for candidates. They often face several challenges during their preparation for the Securing Networks with Cisco Firepower (300-710) exam, including fear, lack of updated 300-710 Exam Dumps, and time constraints. Fortunately, there is a solution to these challenges. PrepAwayETE is a reliable website that provides genuine and updated 300-710 Practice Test.
