SAP C-SAC-2501 Questions and Start Preparation Today [2025]

If you suffer from procrastination and cannot make full use of your sporadic time during your learning process, it is an ideal way to choose our C-SAC-2501 training dumps. We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your C-SAC-2501 Certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our C-SAC-2501 exam questions than the other vendors'.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which of the following data sources can you use in SAP Analytics Cloud data analyzer? Note: There are 3 correct answers to this question.

- A. SAP HANA view
- B. SAP Datasphere model
- C. SAP Analytics Cloud public dataset
- D. SAP BusinessObjects Universe
- E. SAP Analytics Cloud analytic model

Answer: A,B,E

NEW QUESTION # 58

To which story elements can you apply conditional formatting? Note: There are 2 correct answers to this question.

- A. Lane
- B. Chart
- C. Composite
- D. Table

Answer: B,D

Explanation:

In SAP Analytics Cloud stories, conditional formatting can be applied to Table and Chart elements. This feature allows users to visually highlight data points based on specific conditions, such as thresholds, ranges, or comparisons, making it easier to identify trends, outliers, or areas of interest within the data presented in tables and charts.

NEW QUESTION # 59

In a planning data model, what dimensions are included by default? Note: There are 2 correct Answers to this question.

- A. Date
- B. Version

- C. Organization
- D. Entity

Answer: A,B

Explanation:

In a planning data model in SAP Analytics Cloud, the Date and Version dimensions are included by default. The Date dimension is essential for time-based planning and analysis, while the Version dimension allows for the creation and management of different data scenarios, such as budget, forecast, and actuals. These dimensions provide a foundational structure for planning activities within the model.

SAP Analytics Cloud User Guide: Understanding Default Dimensions in Planning Models

NEW QUESTION # 60

You import data into a dataset. One of the columns imported is Year, and SAP Analytics Cloud interprets it as a measure. How can you ensure that it is treated as a calendar year?

- A. Insert a character into the Year measure using the transform bar.
- B. Add the month as a suffix to the Year measure.
- C. Includes the Year measure in a level-based time hierarchy in the dataset.
- **D. Change the Year measure to a dimension in the dataset.**

Answer: D

Explanation:

If SAP Analytics Cloud interprets a 'Year' column as a measure instead of a dimension, it should be changed to a dimension to ensure it is treated as a calendar year. This adjustment can be made within the model or dataset settings, where the column's role can be switched from a measure (quantitative value) to a dimension (qualitative value). Treating 'Year' as a dimension allows it to be used appropriately in time-based analyses, such as trends over time, without being aggregated like a numerical measure.

NEW QUESTION # 61

What type of predictive scenario can write back to a planning model?

- A. Value driver tree
- **B. Time series forecast**
- C. Classification
- D. Regression

Answer: B

Explanation:

In SAP Analytics Cloud, a Time Series Forecast predictive scenario can write back to a planning model. Time Series Forecasting leverages historical data to predict future values over a specified time horizon, using statistical or machine learning methods. This feature is particularly useful in planning and forecasting processes, where future values are predicted based on past trends and seasonality. The ability to write these forecasts back into a planning model allows for the integration of predictive insights into the planning process, enhancing decision-making and strategic planning.
