Free PDF Quiz 2025 High Pass-Rate Supermicro Exam SMI300XE Dumps

Subjects are required to enrich their learner profiles by regularly making plans and setting goals according to their own situation, monitoring and evaluating your study. Because it can help you prepare for the SMI300XE exam. If you want to succeed in your exam and get the related exam, you have to set a suitable study program. We believe that if you purchase SMI300XE Test Guide from our company and take it seriously into consideration, you will gain a suitable study plan to help you to pass your SMI300XE exam in the shortest time.

Supermicro MI300X Expert (SMI300XE) Certification Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

The ROCm commands are not providing output or are failing. What could be the primary reason why?
And how can you validate the reasoning?

- A. If more than 3 GPUs are missing, then ROCm commands will not function. We need to verify that the 3 are missing in the IPMI GUI and review the GPU component section to make sure that at least 2 or fewer GPUs are missing.
- **B. You suspect there are GPUs not detected. To determine which GPUs are missing, open the IPMI GUI and review the GPU component section to make sure all GPUs are present.**
- C. CPU is not installed correctly on the server. Review the OS dmesg logs for any odd CPU messages, then if located proceed to reseat the CPU.
- D. The GPU baseboard may not be detected. You can determine this by opening the IPMI GUI and reviewing the FW section.

Answer: B

Explanation:

If ROCm commands fail to provide output, the primary issue is likely missing or undetected GPUs. The best way to validate this is by checking the IPMI GUI and reviewing the GPU component section to ensure that all GPUs are present.

* Option A (Correct): Missing GPUs are the most common cause of ROCm failures. The IPMI GUI provides visibility into which GPUs are detected.

* Option B (Incorrect): CPU misalignment would cause general system failure, not ROCm-specific issues.

* Option C (Incorrect): The GPU baseboard status can be checked in IPMI but is not the primary cause of ROCm failures.

* Option D (Incorrect): ROCm can function with multiple missing GPUs, but the key issue is confirming GPU presence first.

NEW QUESTION # 17

When you first access the IPMI Web GUI, you will be prompted to log in. Where can you find the password?

- **A. It will be on the label on the bottom side of the system cover.**
- B. Use the system model number as the password.
- C. It will be on the tag next to the I/O Module.
- D. It will be on the label on the bottom of the system.

Answer: A

Explanation:

Supermicro ships systems with a unique BMC password for security purposes. This password is printed on a label located on the bottom side of the system cover.

* Option A (on the I/O module tag) is incorrect as the tag typically contains network interface information rather than credentials.

* Option B (using the system model number as a password) is incorrect because Supermicro does not use default passwords based on the model number.

* Option C (on the bottom of the system) is close but not precise; the correct location is the bottom side of the system cover.

* Option D (label on the bottom side of the system cover) is correct, as stated in the Supermicro IPMI and BMC login documentation.

Security Recommendation: Upon first login, Supermicro strongly recommends changing the default BMC password immediately for security reasons.

NEW QUESTION # 18

What tool is needed to remove the GPU in the MI300X system?

- **A. T15 Torx Bit**
- B. Security Torx Bit
- C. Phillips Head Screwdriver
- D. T20 Torx Bit

Answer: A

Explanation:

The GPU in the MI300X system is secured with T15 Torx screws, requiring a T15 Torx Bit for removal.

- * Option A (Incorrect): T20 Torx Bit is too large for GPU screws.
- * Option B (Incorrect): Security Torx Bit is not required for standard GPU removal.
- * Option C (Correct): T15 Torx Bit is the correct tool for removing GPU screws.
- * Option D (Incorrect): Phillips Head Screwdrivers do not fit the GPU screws.

NEW QUESTION # 19

What will happen when you pull the GPU tray out partially?

- A. The tray will start spewing liquid everywhere.
- **B. The tray will lock to prevent it from pulling too fast, and 1 person on each side of the tray needs to press down on the lever to unlock it.**
- C. The tray will start becoming very hot.
- D. The tray will vibrate three times, alerting the user that it is released from the rail mechanism and is ready to be lifted, then start flashing a red light.

Answer: B

Explanation:

When the GPU tray is pulled out partially, it locks in place to prevent accidental removal or dropping. To fully remove it, two people must press down on the lever on each side before continuing.

- * Option A (Correct): The tray locks automatically to ensure safe removal, and two people are needed to press the unlock levers.
- * Option B (Incorrect): The tray does not vibrate or flash red when released.
- * Option C (Incorrect): The tray does not contain liquid components.
- * Option D (Incorrect): The tray does not generate excessive heat upon removal.

NEW QUESTION # 20

Which SUM command is used to verify the AOC NIC installed on the system?

- A. `sum.exe-read all AOC-from 10.1.1.100`
- **B. `sum.exe -i 10.1.1.100 -u ADMIN -p ADMIN -c getaocinfo`**
- C. `sum.exe -i 10.1.1.100 -u ADMIN -p ADMIN -c getaocnicinfo`
- D. `sum.exe -ip 10.1.1.100 -user ADMIN -pass ADMIN -command getnicinfo`

Answer: B

Explanation:

To verify the AOC NIC installed on the system, the correct SUM (Supermicro Update Manager) command is:

css

CopyEdit

```
sum.exe -i 10.1.1.100 -u ADMIN -p ADMIN -c getaocinfo
```

- * Option B (Correct): This command retrieves AOC NIC information.
- * Option A (Incorrect): "getaocnicinfo" is not a valid command.
- * Option C (Incorrect): This syntax is incorrect and will not execute properly.
- * Option D (Incorrect): "getnicinfo" retrieves general NIC details, not AOC NIC-specific information.

NEW QUESTION # 21

.....

In the process of using the MI300X Expert (SMI300XE) Certification Exam study training dumps, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our SMI300XE latest questions already have many different kinds of learning materials, users may be confused about the choice, what is the most suitable SMI300XE Test Guide? Believe that users will get the most satisfactory answer after consultation. Our online service staff is professionally trained, and users' needs about SMI300XE test guide can be clearly understood by them. The most complete online service of our company will be answered by you, whether it is before the product purchase or the product
