{2025} Splunk SPLK-1002 Dumps - A Direction Toward Certain Success

Now there are many IT training institutions which can provide you with Splunk certification SPLK-1002 exam related training material, but usually through these website examinees do not gain detailed material. Because the materials they provide are specialized for Splunk Certification SPLK-1002 Exam, so they didn't attract the examinee's attention.

One of the key benefits of the SPLK-1002 Certification is that it demonstrates to employers and colleagues that you have the skills and knowledge needed to effectively use Splunk. Splunk Core Certified Power User Exam certification can help you stand out in a crowded job market and increase your earning potential. Additionally, the knowledge and skills gained through preparing for the exam can help you become a more effective Splunk user, enabling you to better support your organization's data analysis and visualization needs.

Splunk Core Certified Power User Exam Sample Questions (Q109-Q114):

NEW QUESTION # 109
What do events in a transaction have In common?

- A. All events In a transaction must have the same timestamp.
- B. All events in a transaction must be related by one or more fields.
- C. All events in a transaction must have the exact same set of fields.
- D. All events in a transaction must have the same sourcetype.

Answer: D

Explanation:
Reference:
https://docs.splunk.com/Documentation/Splunk/8.0.3/Knowledge/Abouttransactions

NEW QUESTION # 110
When should you use the transaction command instead of the scats command?

- A. When you have over 1000 events in a transaction.
- B. When you need to group based on start and end constraints.
- C. When you need to group on multiple values.
- D. When duration is irrelevant in search results. .

Answer: B

Explanation:
The transaction command is used to group events into transactions based on some common characteristics, such as fields, time, or both. The transaction command can also specify start and end constraints for the transactions, such as a field value that indicates the beginning or the end of a transaction. The stats command is used to calculate summary statistics on the events, such as count, sum, average, etc. The stats command cannot group events based on start and end constraints, but only on fields or time buckets. Therefore, the transaction command should be used instead of the stats command when you need to group events based on start and end constraints.

NEW QUESTION # 111

Which of the following data models are included in the Splunk Common Information Model (CIM) add-on? (select all that apply)

- A. Alerts
- B. User permissions
- C. Databases
- D. Email

Answer: A,C,D

Explanation:
The Splunk Common Information Model (CIM) add-on contains a collection of preconfigured data models that you can apply to your data at search time. Each data model in the CIM consists of a set of field names and tags that define the least common denominator of a domain of interest. The CIM currently has data models defined for 22 categories, including Alerts, Databases, and Email. User permissions is not one of the categories in the CIM.ReferencesSee Overview of the Splunk Common Information Model and Splunk Common Information Model - Your Questions Answered.

NEW QUESTION # 112
Which one of the following statements about the search command is true?

- A. It behaves exactly like search strings before the first pipe.
- B. It treats field values in a case-sensitive manner.
- C. It does not allow the use of wildcards.
- D. It can only be used at the beginning of the search pipeline.

Answer: A

Explanation:
Reference:https://docs.splunk.com/Documentation/SplunkCloud/8.0.2003/Search/Usethesearchcommand
The search command is used to filter or refine your search results based on a search string that matches the events2. The search command behaves exactly like search strings before the first pipe, which means that you can use the same syntax and operators as you would use in the initial part of your search2. Therefore, option D is correct, while options A, B and C are incorrect because they are not true statements about the search command.

NEW QUESTION # 113
What does the Splunk Common Information Model (CIM) add-on include? (select all that apply)

- A. Automatic data model acceleration
- B. Pre-configured data models
- C. Fields and event category tags
- D. Custom visualizations

Answer: B,C

NEW QUESTION # 114
