Symantec Data Loss Prevention 11.5: Administration

Summary Duration 5 Days	Vendor Symantec	Learning Credits 25	Delivery Method Instructor-led (Classroom)
--------------------------------------	---------------------------	-------------------------------	--

Audience
This course is intended for anyone responsible for configuring, maintaining, and troubleshooting Symantec Data Loss Prevention. Additionally, this course is intended for technical users responsible for creating and maintaining Symantec Data Loss Prevention policies and the incident response structure.

Introduction
The Symantec Data Loss Prevention 11.5: Administration course is designed to provide you with the fundamental knowledge to configure and administer the Symantec Data Loss Prevention Enforce platform. The hands-on labs include exercises for configuring Enforce server, detection servers, and DLP Agents as well as reporting, workflow, incident response management, policy management and detection, response management, user and role administration, directory integration, and filtering. Additionally, you are introduced to deployment best practices and the following Symantec Data Loss Prevention products: Network Monitor, Network Prevent, Symantec Data Loss Prevention for Tablets, Network Discover, Network Protect, Endpoint Prevent, and Endpoint Discover. Note that this course is delivered on a Microsoft Windows platform.

Prerequisites
You must have a working knowledge of Windows serverclass operating systems and commands, as well as networking and network security concepts.

At Course Completion
After completing this course, students will be able to:

- By the end of this course, you will be able to configure and use Symantec Data Loss Prevention 11.5.

Course Content

Introduction to Symantec Data Loss Prevention

- Symantec Data Loss Prevention overview
- Symantec Data Loss Prevention architecture

Navigation and Reporting

- Navigating the user interface
- Reporting and analysis
- Report navigation, preferences, and features
- Report filters
- Report commands
- Incident snapshot

Hands-on labs: Become familiar with navigation and tasks in the user interface. Create, filter, summarize, and distribute reports. Create users, roles, and attributes.

Incident Remediation and Workflow

- Incident remediation and workflow
- Managing users and attributes
- Custom attribute lookup

Hands-on labs: Remediate incidents, configure a user's reporting preferences, and custom attribute look-ups using a .csv file.

Policy Management

- Policy overview

- Creating policy groups
- Using policy templates
- Building policies
- Policy development best practices

Hands-on labs: Use policy templates and policy builder to configure and apply new policies.

Response Rule Management

- Response rule overview
- Creating Automated Response rules
- Creating Smart Response rules
- Response rule best practices

Hands-On Labs: Create and use Automated and Smart Response rules.

Described Content Matching

- DCM detection methods
- True cases
- Using DCM in policies

Hands-on labs: Create policies that include DCM and then use those policies to capture incidents.

Exact Data Matching and Directory Group Matching

- Exact data matching (EDM)
- Directory group matching (DGM)
- Advanced EDM

Hands-on labs: Create policies that include EDM and DGM, and then use those policies to capture incidents.

Indexed Document Matching

- Indexed document matching (IDM)
- Using IDM in policies

Hands-on labs: Create policies that include IDM rules and then use those policies to capture incidents.

Vector Machine Learning

- Vector Machine Learning (VML)
- Creating a VML profile

Hands-on labs: Create a VML profile, import document sets, and create a VML policy.

Network Monitor Review

- Review of Network Monitor
- Protocols
- Traffic filtering
- Network Monitor best practices

Hands-On Labs: Apply IP and L7 filters.

Introduction to Network Prevent

- Network Prevent overview
- Introduction to Network Prevent (EDM)
- Introduction to Network Prevent (Web)

250-587 Valid Dumps Files - Test 250-587 Testking

It is inevitable that people would feel nervous when the 250-587 exam is approaching, but the main cause of the tension is most lies with lacking of self-confidence. Our Software version of 250-587 exam questions provided by us can help every candidate to get familiar with the Real 250-587 Exam, which is meaningful for you to take away the pressure and to build confidence in the approach. If you have had the confidence in yourself so that you have won the first step on the road to success.

Symantec Data Loss Prevention 16.x Administration Technical Specialist Sample Questions (Q228-Q233):

NEW QUESTION # 228

You have imported a disk group onto a new Storage Foundation 5.0 server named Srv1. The existing Storage Foundation 4.1 server named Srv1 will be decommissioned. When you attempt to use the newly imported disk group on Srv2, you get the following error: VxVM vxedit ERROR V-5- 1-2829 Disk group version doesn't support feature. You want to resolve this error and use the features provided by VxVM running on Srv2. How would you solve this error?

- A. Explicitly upgrade the disk group to the current version.
- B. Reboot Srv2.
- C. Revert VxVM to an earlier version.
- D. Upgrade the disk group on Srv1 and then import the disk group.

Answer: A

NEW QUESTION # 229

Which action is available for use in Smart Response rules and Automated Response rules?

- A. post log to a syslog server
- B. block email message
- C. limit incident data retention
- D. modify SMTP message

Answer: A

NEW QUESTION # 230

Which traffic type is excluded from analysis when an administrator uses Network Monitor?

- A. Skype
- B. NNTP
- C. Telnet
- D. Yahoo! Instant Messenger

Answer: A

NEW QUESTION # 231

Which product can replace a confidential document residing on a share with a marker file explaining why the document was removed?

- A. Network Discover
- B. Mobile Prevent
- C. Endpoint Discover
- D. Network Protect

Answer: D

NEW QUESTION # 232

You administer storage for multiple hosts supporting a large OLTP application. Host Mkt operates both within the secure intranet, and host Store operates in a DMZ environment. Store stages detailed transaction logs on a volume named s_detail in a disk group

named s_data. You need to deliver large batches of transaction data history from host Store to host Mkt for market analysis, and to receive the results of that analysis, as part of a weekly routine. To deliver sales history to the marketing host, what sequence of actions must you carry out? Place the following actions in order. 1. Use vx dg to deport the snapshot volume's disk group from host Store. 2. Use vx dg to import the snapshot volume into host Mkt. 3. Use vx snap to create a snapshot of s_detail on s_data. 4. Use the vx snap command to enable FastResync on s_detail. 5. Use vx dg to split the snapshot volume away from s_data, into a separate disk group.

- A. 5,2,4,1,3
- B. 4,2,5,3,1
- C. 5,4,1,2,3
- **D. 4,5,2,1,3**

Answer: D

NEW QUESTION # 233
