In case of failure, we promise to give you full refund. No help, full refund!

Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q20-Q25):

NEW QUESTION # 20

What is one of the tools associated with Design Thinking?

- A. Behavior-driven development
- B. Set-based design
- C. Empathy maps
- D. Portfolio canvas

Answer: C

Explanation:

Empathy maps are a tool associated with design thinking that help to understand the user's needs, goals, pain points, and emotions. Empathy maps are visual representations of what the user thinks, feels, sees, hears, says, and does in relation to a problem or a solution. Empathy maps help to create a shared understanding of the user among the team and stakeholders, and to generate insights for designing user-centric solutions. Empathy maps can be created based on user research, interviews, observations, or personas¹²³.

NEW QUESTION # 21

Which SAFe Lean-Agile Principle includes an emphasis on "deliver early and often"?

- A. Organize around value
- B. Build incrementally with fast, integrated learning cycles
- **C. Take an economic view**
- D. Make value flow without interruptions

Answer: C

Explanation:

Explanation

According to the SAFe Agilist 6.0 domain of Apply SAFe Principles, this principle is the first Lean-Agile Principle and it describes how to make decisions based on economics¹. One of the practices essential to achieving optimum economic outcomes is to deliver early and often, which means moving new system features through the development value stream as quickly as possible¹. This practice has a direct economic benefit, as it enables faster feedback, higher value, and lower risk¹. You can read more about this principle and practice in this article, under the section "Deliver early and often".

NEW QUESTION # 22

What else does the SAFe principle, unlock the intrinsic motivation of knowledge workers, require besides purpose and mission?

- A. Innovation
- B. Transparency
- **C. Minimum possible constraints**
- D. Incentive-based compensation

Answer: C

Explanation:

According to SAFe Principle #8, "Unlock the intrinsic motivation of knowledge workers," beyond purpose and mission, this principle emphasizes that:

"Management sets the mission with minimum constraints... Workers themselves are most qualified to make decisions about how to perform their work." This aligns with promoting autonomy, mastery, and purpose—autonomy being enabled by minimal constraints from management.

NEW QUESTION # 23

A SAFe Portfolio is a collection of what?

- A. Functional teams
- B. Solutions
- **C. Development Value Streams**
- D. Business units

Answer: C

Explanation:

A SAFe portfolio is a collection of development value streams. A development value stream is a long-lived series of steps that an

enterprise uses to continuously deliver value to a customer or stakeholder. A development value stream typically consists of one or more ARTs and Solution Trains that build and deliver solutions. A SAFe portfolio aligns and governs one or more development value streams that share a common business mission, vision, strategy, and funding. A SAFe portfolio helps enterprises achieve Lean Portfolio Management, which is one of the core competencies of business agility in SAFe. References: SAFe Portfolio, Development Value Streams

NEW QUESTION # 24

The analyzing step of the Portfolio Kanban system has a new Epic with a completed Lean business case. What best describes the next step for the Epic?

- A. It will remain in the analyzing step until one or more Agile Release Trains have the capacity to implement it
- B. It will be implemented once the Epic Owner approves the Lean business case
- C. It will be implemented if it has the highest weighted shortest job first (WSJF) ranking
- **D. It will be moved to the ready state in the Portfolio Kanban if it receives a 'go' decision from Lean Portfolio Management**

Answer: D

Explanation:

Explanation

The next step for an epic with a completed Lean business case in the analyzing step of the Portfolio Kanban is to move it to the ready state if it receives a 'go' decision from Lean Portfolio Management. The analyzing step is where the epic hypothesis statement and the Lean business case are developed and validated. The Lean business case provides the economic justification, assumptions, risks, and potential benefits of the epic. The Lean Portfolio Management is the authority that reviews and approves the Lean business case and decides whether to fund and implement the epic or not. If the epic receives a 'go' decision, it moves to the ready state, where it waits for implementation capacity. If the epic receives a 'no go' decision, it is either deferred or cancelled.
