NEW QUESTION # 41
You are prompted to perform a re-index after you have made configuration changes to a very large Jira instance.
Which reason would justify re-indexing only a project instead of a full re-index of the instance?

- A. Only custom fields used by the project were modified.
- B. Workflow changes were limited to the project's unique workflow.
- C. Time tracking was modified for the project.
- D. Only project users would be affected by the re-index.

Answer: A

NEW QUESTION # 42
You have been asked to take on the administration of a second Jira installation in your company.
You were given the following information about user accounts:
* The company standard is to use Active Directory (AD) to provide user accounts.
* There are several Active Directory systems in use by different business units.
* The second Jira is not to be merged with your main Jira.
* The main Jira system is connected to Active Directory for user accounts.
* The second Jira is using internal user accounts, not Active Directory.
* People using the second Jira are using the same login ID as they would use in Active Directory.
* Your company would like to use Single Sign-on (SSO) but has not yet implemented it for either Jira system.
Which authentication method should you recommend?

- A. Change the new Jira to use your main Jira's directory services, as that is already reading your Active Directory services.
- B. Set up a Crowd server to pull in all the AD services, and plan to migrate internal users.
- C. Change the new Jira to link directly to the required AD servers.
- D. Set up a Crowd server to get the user lists from all internal directories and AD, and use AD directly for the password checking.

Answer: D
