Quiz 2025 Newest C-SEC-2405: Real SAP Certified Associate - Security Administrator Exam Dumps

Research indicates that the success of our highly-praised C-SEC-2405 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our C-SEC-2405 guide torrent implement good practices, systems.We educate our candidates with less complicated Q&A but more essential information. And our C-SEC-2405 Exam Dumps also add vivid examples and accurate charts to stimulate those exceptional cases you may be confronted with. You can rely on our C-SEC-2405 test questions, and we'll do the utmost to help you succeed.

SAP Certified Associate - Security Administrator Sample Questions (Q76-Q81):

NEW QUESTION # 76
Which levels of security protection are provided by Secure Network Communication (SNC)? Note:
There are 3 correct answers to this question.

- A. Privacy
- B. Integrity
- C. Authorization

- D. Availability
- E. Authentication

Answer: A,B,E

NEW QUESTION # 77

Which access categories are available to maintain restrictions in SAP S/4HANA Cloud Public Edition? Note:
There are 3 correct answers to this question.

- A. Write, Read, Value Help (write access)
- B. Read (read access)
- C. Value Help (value help access)
- D. Read, Value Help (read access)
- E. Write, Read (write access)

Answer: A,C,D

Explanation:
In SAP S/4HANA Cloud Public Edition, access restrictions are maintained using specific access categories to control user permissions granularly. The available categories include "Read, Value Help (read access)," which allows users to view data and access value help functionalities; "Value Help (value help access)," which restricts access to only value help features; and "Write, Read, Value Help (write access)," which grants permissions for creating, modifying, reading, and using value help. These categories enable precise control over user access to data and functionalities, ensuring compliance with security policies. The options "Read (read access)" and "Write, Read (write access)" are not standard access categories in this context, as they do not fully align with the system's predefined restriction types.

NEW QUESTION # 78

What use cases are available for a Local Identity Directory? Note: There are 3 correct answers to this question.

- A. Hybrid mode
- B. S/4HANA use case
- C. Proxy mode
- D. Merging attributes
- E. Classic use case

Answer: A,B,E

NEW QUESTION # 79

In the administration console of the Cloud Identity Services, for which system type can you define both read and write transformations?

- A. Target systems
- B. Proxy systems
- C. Source systems

Answer: B

Explanation:
In the administration console of SAP Cloud Identity Services, both read and write transformations can be defined for Proxy systems. Proxy systems act as intermediaries between source and target systems, facilitating user provisioning and synchronization by transforming user attributes during data exchange. Read transformations modify data retrieved from the source system, while write transformations adjust data sent to the target system, ensuring compatibility and compliance with system requirements. This dual transformation capability is unique to proxy systems, as they handle bidirectional data flows. Source systems, which provide user data, typically support only read transformations to format outgoing data, while target systems, which receive data, support only write transformations to process incoming data. By enabling both transformation types, proxy systems offer flexibility in managing complex identity management scenarios, ensuring seamless integration across SAP and non-SAP systems while maintaining data integrity and security in cloud-based identity management.

NEW QUESTION # 80

Which of the following functions within SAP GRC Access Control support access certification and review?
Note: There are 2 correct answers to this question.

- A. SOD Review
- B. Role Review
- C. User Reaffirm
- D. Role Reaffirm

Answer: A,C

Explanation:

In SAP GRC Access Control, the functions that support access certification and review are SOD Review and User Reaffirm. SOD (Segregation of Duties) Review enables organizations to analyze roles and user assignments for potential conflicts, ensuring that access does not violate SoD policies. This review process involves certifying that roles or users do not have conflicting permissions, supporting compliance with security standards. User Reaffirm is used to periodically certify user access, requiring managers or administrators to confirm that users' assigned roles and permissions remain appropriate for their job functions. This reaffirmation process is critical for access governance, ensuring ongoing compliance and security. Role Review, while related to role maintenance, is not a specific GRC function for access certification, and Role Reaffirm is not a standard term in SAP GRC. By leveraging SOD Review and User Reaffirm, SAP GRC Access Control provides robust tools for maintaining secure and compliant access management, addressing both role-based and user-based risks.

NEW QUESTION # 81

......

Owing to the industrious dedication of our experts and other working staff, our C-SEC-2405 study materials grow to be more mature and are able to fight against any difficulties. Our C-SEC-2405 preparation exam have achieved high pass rate in the industry, and we always maintain a 99% pass rate with our endless efforts. We have to admit that behind such a starling figure, there embrace mass investments from our company on our C-SEC-2405 learning quiz. But it is all worth that as the high pass rate can make sure our customers pass the exam by the best percentage.

C-SEC-2405 Valid Test Review: https://www.pass4surecert.com/SAP/C-SEC-2405-practice-exam-dumps.html

We provide you with the best C-SEC-2405 exam study material which will improve your study efficiency and give you right direction, SAP Real C-SEC-2405 Exam Dumps Full of knowledge easily bear in mind, If you would like to get the mock test before the real C-SEC-2405 exam you can choose the software version, and if you want to study in anywhere at any time then our online APP version is your best choice since you can download it in any electronic devices, If a person fails despite proper SAP Certified Associate - Security Administrator C-SEC-2405 test preparation and using C-SEC-2405 practice exam material, Pass4sureCert provides a money-back guarantee.
