We are professional in these career for more than ten years and can give you promised success.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q105-Q110):

NEW QUESTION # 105
The project property to update actual effort from time card is controlled at what level?

- A. Program Level.
- B. Portfolio Level.
- C. Application Level (Global).
- D. Project Level.

Answer: D

Explanation:
According to the ServiceNow documentation1, the project property to update actual effort from time card is controlled at the project level. This property is called Update actual effort from time card and it determines if the Actual effort field on the Dates tab should be updated based on the hours entered from time cards for the project. If set to Yes, the Actual effort field is read-only on the Project and Project Task forms. If set to No, the Actual effort field is editable on the Project and Project Task forms.

NEW QUESTION # 106
When creating a planning item, which fields are populated automatically with the Approved start date value and the Approved end date value respectively?
Choose 2 answers

- A. Due date
- B. Planned end date
- C. Planned start date
- D. Actual start date

Answer: B,C

NEW QUESTION # 107

At which point in the Demand Management lifecycle do assessments get sent to stakeholders?

- A. Screening
- B. Assessment
- C. Creation
- D. Planning

Answer: A

NEW QUESTION # 108

If a lens has four entities, which entity within the lens structure would not have a parent reference?

- A. Third-level entity
- B. Top-level entity
- C. Bottom entity
- D. Second-level entity

Answer: B

Explanation:

According to the ServiceNow documentation1, a lens is a hierarchical structure that consists of entities and relationships. An entity is a data object that represents a business concept, such as a project, a demand, or a resource. A relationship is a link between two entities that defines how they are connected. A lens can have up to four levels of entities, each with a parent reference to the entity above it, except for the top-level entity, which has no parent reference. The top-level entity is the root of the lens and defines its scope and type. For example, a project lens has a project as the top-level entity, and a demand lens has a demand as the top-level entity.

NEW QUESTION # 109

When can a user choose from multiple rate types for their work, while logging a time card?

- A. Only if this capability is enabled in the Project Record
- B. Only one (1) rate type can apply
- C. Only if the capability is enabled in the Time Sheet Policies
- D. Only if the capability is enabled in the Project Preferences

Answer: C

Explanation:

According to the Using rate types and labor rate cards document, a user can choose from multiple rate types for their work, while logging a time card, only if the capability is enabled in the Time Sheet Policies. This capability allows users to select different rate types for different tasks, such as standard, overtime, or travel. The other options are not correct, as they are not the places where the capability can be enabled. The Project Record is used to create and update project details, such as name, description, and state. The Project Preferences are used to set the default values for project fields, such as number, type, and priority. The option C is not correct, as more than one rate type can apply if the capability is enabled.

NEW QUESTION # 110

......

We have collected the frequent-tested knowledge into our CIS-SPM practice materials for your reference according to our experts' years of diligent work.
