CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details
Topic 1	Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.
Topic 2	Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.
Topic 3	Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.

Topic 4	• Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.

CWNP Certified Wireless Design Professional Sample Questions (Q199-Q204):

NEW QUESTION # 199

What strategy can be used to ensure efficient cell overlap for VoIP site surveys?

Response:

- A. Install higher gain antennas in the APs.
- B. Measure the percentage of cell overlap using the cell overlap feature in the site survey software.
- C. Ensure at least two APs can be seen with appropriate signal strengths from each location.
- D. Increase the output power of the radio in all APs.

Answer: B

NEW QUESTION # 200

Your new customer is concerned about maintaining privacy for their proprietary information when you conduct information gathering for their WLAN design. Which document can you use to directly address their concern?

- A. SoW
- B. Hold Harmless
- C. BoM
- D. NDA

Answer: D

NEW QUESTION # 201

The installation crew for your WLAN project wants to install a few APs to locations nearby the ones specified in the RF design document. What next step should occur?

- A. Confirm the mounting hardware.
- B. Update the documentation.
- C. Consult the RF designer.
- D. Choose a different AP model.

Answer: C

Explanation:

Any deviation from the RF design plan, including changes in AP placement, can significantly impact the performance and coverage of the WLAN. Therefore, it's crucial to consult the RF designer before making any alterations. The RF designer can assess the proposed

changes and determine if they align with the overall network design objectives or if adjustments are necessary to maintain optimal performance.
