## Pass Guaranteed Fortinet - FCP_FGT_AD-7.6 - FCP - FortiGate 7.6 Administrator –Professional Exam Cost

The countless FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) exam candidates have already passed their dream Fortinet FCP_FGT_AD-7.6 certification exam and they all have got help from Fortinet FCP_FGT_AD-7.6 Exam Questions. You can also trust Fortinet FCP_FGT_AD-7.6 exam practice test questions and start preparation right now.

# Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime. |
| Topic 2 | • Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently. |
| Topic 3 | • Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed. |
| Topic 4 | • VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations. |
| Topic 5 | • Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network. |

# Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q12-Q17):

**NEW QUESTION # 12**
Refer to the exhibit. Which two statements are true about the routing entries in this database table? (Choose two.)

**FortiGate routing database**

```
Local-FortiGate # get router info routing-table database
Codes: K - kernel, C - connected, S - static, R - RIP, B - BGP
       O - OSPF, IA - OSPF inter area
       N1 - OSPF NSSA external type 1, N2 - OSPF NSSA external type 2
       E1 - OSPF external type 1, E2 - OSPF external type 2
       L1 - IS-IS level-1, L2 - IS-IS level-2, ia - IS-IS inter area
       V - BGP VPNv4
       > - selected route, * - FIB route, p - stale info

Routing table for VRF=0
S       0.0.0.0/0 [20/0] via 10.200.2.254, port2, [1/0]
S    *> 0.0.0.0/0 [10/0] via 10.200.1.254, port1, [1/0]
C    *> 10.0.1.0/24 is directly connected, port3
C    *> 10.200.1.0/24 is directly connected, port1
C    *> 10.200.2.0/24 is directly connected, port2
C    *> 172.16.100.0/24 is directly connected, port8
```

- A. All of the entries in the routing database table are installed in the FortiGate routing table.
- B. Both default routes have different administrative distances.
- C. The port2 interface is marked as inactive.
- D. The default route on port2 is marked as the standby route.

**Answer: B,D**

Explanation:
The default route via port2 has the same prefix as the route via port1 but a higher administrative distance [20/0]vs[10/0] and is not marked with ">" or "*". This indicates it is kept as a standby/backup route, to be used only if the better route via port1 fails.
The two static default routes clearly show different administrative distances in the brackets: [20/0] for port2 and [10/0] for port1, confirming that their administrative distances are different.

**NEW QUESTION # 13**
Refer to the exhibit.

## FortiGate web filter profile configuration

The exhibit shows the FortiGuard Category Based Filter section of a corporate web filter profile.

An administrator must block access to download.com, which belongs to the Freeware and Software Downloads category. The administrator must also allow other websites in the same category.

What are two solutions for satisfying the requirement? (Choose two.)

- A. Configure a separate firewall policy with action Deny and an FQDN address object for*.download.com as destination address.
- B. Configure a static URL filter entry for download.com with Type and Action set to Wildcard and Block, respectively.
- C. Set the Freeware and Software Downloads category Action to Warning.
- D. Configure a web override rating for download.com and select Malicious Websites as the subcategory.

**Answer: A,B**

Explanation:

Creating a static URL filter to block download.com specifically allows blocking that site without affecting the entire category.
Using a separate firewall policy with a Deny action for an FQDN address object matching download.com can also block the site
while allowing others in the same category.

## NEW QUESTION # 14
Refer to the exhibit.

As an administrator you have created an IPS profile, but it is not performing as expected. While testing you got the output as shown
in the exhibit.
What could be the possible reason of the diagnose output shown in the exhibit?

- A. There is a no firewall policy configured with an IPS security profile.
- B. Administrator entered the command diagnose test application ipsmonitor 99.
- C. Administrator entered the command diagnose test application ipsmonitor 5.
- D. FortiGate entered into IPS fail open state.

**Answer: A**

Explanation:
The output shows the IPS engine count as 0, indicating no active IPS engines are running. This typically means no firewall policy is
referencing the IPS security profile, so the IPS profile is not being applied or triggered.

## NEW QUESTION # 15
Refer to the exhibits. Based on the current HA status, an administrator updates the override and priority parameters on HQ-
NGFW-1 and HQ-NGFW-2 as shown in the exhibit.

```
HQ NGFW 1         , FGVM02TM24013425, HA cluster index = 1
HQ-NGFW-2         , FGVM02TM24013501, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM02TM24013423, HA operating index = 0
Secondary: FGVM02TM24013501, HA operating index = 1
```

**New FortiGate HA configuration**

```
HQ-NGFW-1
# config system ha
        set group-id 5
        set group-name "Fortinet"
        set mode a-p
        set password *
        set hbdev "port7" 50 "port8" 60
        set session-pick enable
        set override disable
        set priority 90
        set monitor "port3"

HQ-NGFW-2
# config system ha
        set group-id 5
        set group-name "Fortinet"
        set mode a-p
        set password *
        set hbdev "port7" 50 "port8" 60
        set session-pick enable
        set override enable
        set priority 110
        set monitor "port3"
```

What would be the expected outcome in the HA cluster?

- A. HQ-NGFW-2 will take over as the primary because it has the override enable setting and higher priority than HQ-NGFW-1.
- B. HQ-NGFW-1 will synchronize the override disable setting with HQ-NGFW-2.
- C. The HA cluster will become out of sync because the override setting must match on all HA members.
- D. HQ-NGFW-1 will remain the primary because HQ-NGFW-2 has lower priority.
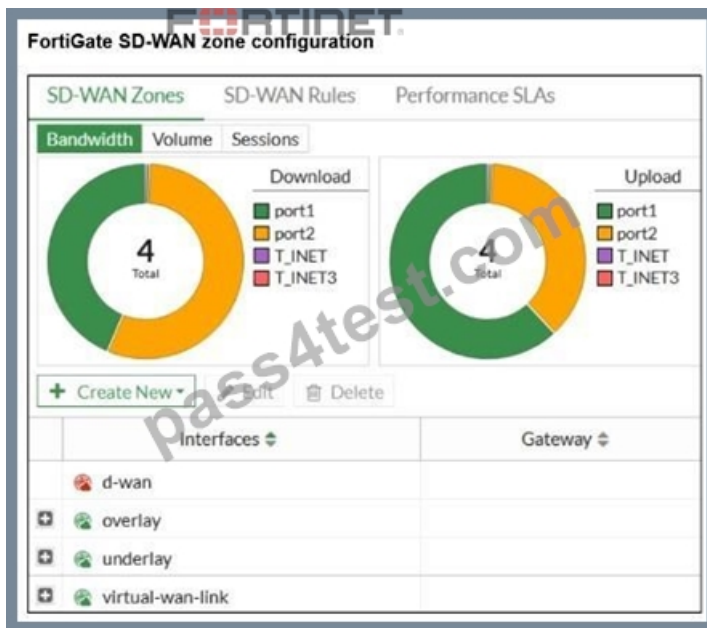

**Answer: A**

Explanation:
With override enabled on HQ-NGFW-2 and its higher priority (110 vs. 90), HQ-NGFW-2 will become the primary device, preempting HQ-NGFW-1 despite the current primary status.

**NEW QUESTION # 16**
Refer to the exhibit, which shows an SD-WAN zone configuration on the FortiGate GUI.

FortiGate SD-WAN zone configuration

Based on the exhibit, which statement is true?

- A. The d-wan zone cannot be deleted.
- B. The virtual-wan-link zone contains no member.
- C. The d-wan zone contains no member.
- D. The underlay zone contains port1 and port2.

**Answer: C**

Explanation:
The "d-wan" zone in FortiGate SD-WAN configuration is the default SD-WAN zone created when SD-WAN is enabled. This zone contains all the interfaces assigned to SD-WAN and is essential for the functionality of the SD-WAN feature. The "d-wan" zone cannot be deleted because it is required for SD-WAN operations. Option A is incorrect because the underlay zone does not contain port1.

**NEW QUESTION # 17**

......

The FCP_FGT_AD-7.6 torrent prep contains the real questions and simulation questions of various qualifying examinations. It is very worthy of study efficiently. Time is constant development, and proposition experts will set questions of real FCP_FGT_AD-7.6 exam continuously according to the progress of the society change tendency of proposition, and consciously highlight the hot issues and policy changes. In order to be able to better grasp the proposition thesis direction, the FCP - FortiGate 7.6 Administrator study question focus on proposition which one recent theory and published, in all kinds of academic report even if update to find effective thesis points, according to the proposition of preferences and habits, ponder proposition style of topic selection, to update our FCP_FGT_AD-7.6 Exam Question, to facilitate users of online learning, better fit time development hot spot.
