Pass Guaranteed Quiz 2025 High Pass-Rate JN0-253: Real Mist AI, Associate (JNCIA-MistAI) Exam Dumps

They are using outdated materials resulting in failure and loss of money and time. So to solve all these problems, Pass4SureQuiz offers actual JN0-253 Questions to help candidates overcome all the obstacles and difficulties they face during JN0-253 examination preparation. With vast experience in this field, Pass4SureQuiz always comes forward to provide its valued customers with authentic, actual, and genuine JN0-253 Exam Dumps at an affordable cost. All the Mist AI, Associate (JNCIA-MistAI) (JN0-253) questions given in the product are based on actual examination topics.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q32-Q37):

NEW QUESTION # 32

What are three methods for requesting authentication in the Juniper Mist API? (Choose three.)

- A. Use RADIUS certificates.
- B. Enable basic authentication with a token.
- C. Enable MFA with Okta Verify.
- D. Use an HTTPS login with a user name and password.
- E. Use OAuth2 linked to an OAuth provider.

Answer: B,D,E

Explanation:

The three valid methods for requesting authentication with the Juniper Mist API are:

Use an HTTPS login with a user name and password: The Mist API accepts HTTPS requests where credentials are provided directly for session/token generation and user administration.

Use OAuth2 linked to an OAuth provider: "Juniper Mist APIs offer authentication via OAuth2 with various OAuth-compatible identity providers, such as Okta, for secure and federated access." Enable basic authentication with a token: Mist APIs accept programmatic requests using tokens (API tokens or bearer tokens) for automation, scripting, and integration-each token mapping to specific scopes and user permissions.

Enabling MFA with Okta Verify enhances user portal security but is not an API authentication mechanism.

RADIUS certificates are used for infrastructure 802.1X authentication, not for API access.

Juniper Mist API Authentication Mechanisms

NEW QUESTION # 33

What are two requirements to use the Wired Visibility option of Juniper Mist Wireless Assurance?

(Choose two.)

- A. A cloud-ready switch must be deployed in the network.
- B. The SNMP protocol must be configured on the switch.
- C. A Mist AP must be deployed in the network.
- D. The LLDP protocol must be configured on the switch.

Answer: C,D

Explanation:

The Wired Visibility feature in Juniper Mist relies on Mist APs to gather insights about wired network devices. The APs act as sensors to collect data from connected switches and devices.

LLDP (Link Layer Discovery Protocol) is required for discovering neighboring devices, identifying switch port details, and enabling Wired Visibility to provide comprehensive insights.

NEW QUESTION # 34

As an organization administrator, what are two ways to configure additional layers of security for administrator logins? (Choose two.)

- A. Disable a password policy.
- B. Enable two-factor authentication.
- C. Enable a password policy.
- D. Increase session timeouts.

Answer: B,C

Explanation:

Enable Two-Factor Authentication (2FA): Adding 2FA to administrator logins significantly enhances security by requiring a second form of verification in addition to the password, making unauthorized access more difficult.

Enable a Password Policy: Implementing a strong password policy ensures that passwords meet certain complexity and length requirements, reducing the risk of brute force attacks.

NEW QUESTION # 35

You have five clients on the network and 20 minutes of statistics for each client.

In this scenario, how many user minutes does this equal?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Identify the Scenario: Five clients on the network and 20 minutes of statistics for each client.

Calculation:

User Minutes = 100.

Conclusion:

The total user minutes in this scenario is 100.

NEW QUESTION # 36

Which three components are used to deploy location-based services? (Choose three.)

- A. location sensors
- B. compact flash
- C. location engine
- D. BLE tags
- E. SFP

Answer: A,C,D

Explanation:

To deploy location-based services in Mist, the following components are used:

Location Sensors: These devices capture the location data from BLE tags and other devices.

BLE Tags: These are small devices that emit Bluetooth signals to be picked up by location sensors.

Location Engine: This software processes the data from the sensors and tags to determine precise locations and provide analytics.

NEW QUESTION # 37

.....

These Juniper JN0-253 exam practice questions will greatly help you to prepare well for the final JN0-253 certification exam.

Juniper JN0-253 exam preparation and boost your confidence to pass the JN0-253 Exam. All Juniper JN0-253 exam practice test questions contain the real and updated Juniper JN0-253 exam practice test questions.
