Perhaps you have wasted a lot of time to playing games. It doesn't matter. It is never too late to change. There is no point in regretting for the past. Our PCNSE exam materials can help you get the your desired PCNSE certification. You will change a lot after learning our PCNSE Study Materials. Also, you will have a positive outlook on life. All in all, abandon all illusions and face up to reality bravely. Our PCNSE practice exam will be your best assistant. You are the best and unique in the world. Just be confident to face new challenge!

The PCNSE Certification is highly valued by employers and industry professionals alike, as it demonstrates a candidate's ability to work with Palo Alto Networks technologies in a variety of settings. Palo Alto Networks Certified Network Security Engineer Exam certification is recognized globally, and holders of the certification can expect to earn higher salaries and have access to more job opportunities. Additionally, the certification is valid for two years, after which time candidates must recertify to maintain their credentials.

Palo Alto Networks PCNSE certification is a highly recognized and sought-after certification in the cybersecurity industry. Palo Alto Networks Certified Network Security Engineer Exam certification validates that a security engineer has the necessary knowledge and skills to design, deploy, configure, maintain, and troubleshoot Palo Alto Networks next-generation firewalls and related products. Palo Alto Networks Certified Network Security Engineer Exam certification is intended for security engineers, system administrators, and support staff who work with Palo Alto Networks products.

## Reliable PCNSE Guide Dumps: Palo Alto Networks Certified Network Security Engineer Exam - PCNSE Test Prep Materials - Lead1Pass

Everybody wants success, but not everyone has a strong mind to persevere in study. If you feel unsatisfied with your present status, our PCNSE actual exam can help you out. Our PCNSE exam questions always boast a pass rate as high as 99%. Using our study materials can also save your time in the exam preparation. If you choose our PCNSE Test Engine, you are going to get the certification easily. Just make your choice and purchase our PCNSE study materials and start your study right now! Knowledge, achievement and happiness are waiting for you!

## Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q110-Q115):

### NEW QUESTION # 110

Refer to the exhibit.

An administrator is using DNAT to map two servers to a single public IP address. Traffic will be steered to the specific server based on the application, where Host A (10.1.1.100) receives HTTP traffic and HOST B (10.1.1.101) receives SSH traffic.) Which two security policy rules will accomplish this configuration? (Choose two.)

- A. Untrust (Any) to Untrust (10.1.1.1), ssh -Allow
- B. Untrust (Any) to DMZ (10.1.1.100.10.1.1.101), ssh, web-browsing -Allow
- C. Untrust (Any) to DMZ (10.1.1.1), ssh -Allow
- D. Untrust (Any) to DMZ (10.1.1.1), web-browsing -Allow
- E. Untrust (Any) to Untrust (10.1.1.1), web-browsing -Allow

**Answer: C,D**

### NEW QUESTION # 111

What is considered the best practice with regards to zone protection?

- A. If the levels of zone and DoS protection consume too many firewall resources, disable zone protection
- B. Set the Alarm Rate threshold for event-log messages to high severity or critical severity
- C. Use separate log-forwarding profiles to forward DoS and zone threshold event logs separately from other threat logs
- D. Review DoS threat activity (ACC > Block Activity) and look for patterns of abuse

**Answer: D**

Explanation:

Explanation

The best practice with regards to zone protection is to review DoS threat activity (ACC > Block Activity) and look for patterns of abuse. This way, you can identify the sources and types of DoS attacks that target your network zones and adjust your zone protection profiles and policies accordingly<sup>1</sup>. You can also use the DoS Protection dashboard widget to monitor the number of sessions that match DoS protection policies<sup>2</sup>. You do not need to use separate log-forwarding profiles to forward DoS and zone threshold event logs separately from other threat logs, as you can use a single log-forwarding profile to forward different types of logs to different destinations<sup>3</sup>. You should not disable zone protection if the levels of zone and DoS protection consume too many firewall resources, as this would expose your network zones to potential DoS attacks. Instead, you should optimize your zone protection profiles and policies to reduce the resource consumption<sup>4</sup>. You should not set the Alarm Rate threshold for event-log messages to high severity or critical severity, as this would limit the visibility into DoS attacks that have lower severity levels. Instead, you should set the Alarm Rate threshold to a value that is appropriate for your network environment and traffic patterns. References:

#### NEW QUESTION # 112

What is the name of the debug save file for IPSec VPN tunnels?

- A. request vpn IPsec-sa test
- **B. Ikemgr.pcap**
- C. test vpn ike-sa
- D. set vpn all up

**Answer: B**

#### NEW QUESTION # 113

How does Panorama prompt VMWare NSX to quarantine an infected VM?

- A. Syslog Server Profile
- B. Email Server Profile
- **C. HTTP Server Profile**
- D. SNMP Server Profile

**Answer: C**

Explanation:

Panorama includes predefined payload formats for threat and traffic logs in the HTTP Server Profile. These payload formats correspond to predefined security tags in NSX-V. When a guest VM is found in the threat or traffic logs, Panorama makes an API call to NSX-V Manager telling NSX-V Manager to tag the guest VM with the tag specified in the HTTP Server Profile. When the guest VM becomes tagged, NSX-V Manager dynamically moves the tagged guest VM into the quarantine security group, which places the guest VM into the quarantine dynamic address group.

#### NEW QUESTION # 114

If a URL is in multiple custom URL categories with different actions, which action will take priority?

- A. Allow
- **B. Block**
- C. Override
- D. Alert

**Answer: B**

Explanation:

When a URL matches multiple categories, the category chosen is the one that has the most severe action defined below (block being most severe and allow least severe).

- 1 block
- 2 override
- 3 continue
- 4 alert
- 5 allow
