Free PDF 2025 Marvelous PL-600: Real Microsoft Power Platform Solution Architect Dumps Free

Moreover, you do not need an active internet connection to utilize Lead2Passed Microsoft PL-600 practice exam software. It works without the internet after software installation on Windows computers. The Lead2Passed web-based Microsoft PL-600 Practice Test requires an active internet and it is compatible with all operating systems. You can conveniently test your performance by checking your score each time you use our Microsoft PL-600 practice exam software.

Microsoft PL-600 is an exam that is designed for professionals who want to become certified Power Platform Solution Architects. PL-600 exam is aimed at evaluating an individual's understanding of the Power Platform, including Power Apps, Power Automate, Power BI, and Power Virtual Agents. It is a rigorous exam that requires a deep understanding of the Power Platform and its various components.

Microsoft Power Platform Solution Architect Sample Questions (Q20-Q25):

NEW QUESTION # 20

A nationwide retailer is streamlining its warehouse operations by using a custom Microsoft Power Platform solution. The retailer plans to migrate its existing data to Microsoft Dataverse.

The retailer provides the following data solution requirements:

- * Dispatchers are responsible for the storage, handling, and transportation of goods to and from the warehouses.
- * Dispatchers will own order records and any associated order lines after an order ships.
- * The floor manager requires a consolidated view of the total order revenue for each order.
- * The remaining inventory on hand must be available on each order line for the shipped product.
- * All staff must take photos if they observe a hazard in a warehouse. These photos must be added to a folder and shared with regional managers.

You need to design the data solution.

Which data solution component should you use for each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Data solution requirements

Requirement	Solution component
Total order revenue	Rollup column Calculated column Choice column Rollup column Whole number column Whole number column Autonumber column Key column Rollup column Whole number column File column File column Rollup column Text Area column SharePoint document library
Inventory on hand	
Photos of hazards	

Answer:

Explanation:

Microsoft Requirement

Requirement	Solution component
Total order revenue	Rollup column
Inventory on hand	Whole number column
Photos of hazards	File column

NEW QUESTION # 21

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	<input type="checkbox"/> Team access <input type="checkbox"/> Privacy preference <input type="checkbox"/> Field security profile <input type="checkbox"/> Hierarchy security profile
Allow only approved device types to access the solution and company data.	<input type="checkbox"/> Endpoint security <input type="checkbox"/> Compliancy policy <input type="checkbox"/> Conditional access <input type="checkbox"/> Mobile threat integration

Answer:

Explanation:

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	<input type="checkbox"/> Team access <input type="checkbox"/> Privacy preference <input checked="" type="checkbox"/> Field security profile <input type="checkbox"/> Hierarchy security profile
Allow only approved device types to access the solution and company data.	<input checked="" type="checkbox"/> Endpoint security <input checked="" type="checkbox"/> Compliancy policy <input checked="" type="checkbox"/> Conditional access <input checked="" type="checkbox"/> Mobile threat integration

NEW QUESTION # 22

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> Business rule Power Automate flow Asynchronous plug-in Background workflow </div>
Prompt users to update each opportunity product record when an opportunity is won or lost.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> JavaScript code Real-time workflow Power Automate flow Asynchronous plug-in </div>

Answer:

Explanation:

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> Business rule Power Automate flow Asynchronous plug-in Background workflow </div>
Prompt users to update each opportunity product record when an opportunity is won or lost.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> JavaScript code Real-time workflow Power Automate flow Asynchronous plug-in </div>

Explanation:

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: right;">▼</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Business rule</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Power Automate flow</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Asynchronous plug-in</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Background workflow</div> </div>
Prompt users to update each opportunity product record when an opportunity is won or lost.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: right;">▼</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">JavaScript code</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Real-time workflow</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Power Automate flow</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; text-align: center;">Asynchronous plug-in</div> </div>

Box 1: Business rule

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins.

Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: Power Automate flow

Trigger the Power Automate flow with "When a record is updated", then add a Condition in the flow and configure it with Status Label equals to Won.

NEW QUESTION # 23

A company has the following security requirements:

- * Salespeople must not be able to display or access a contact's credit card number
- * Sales assistants must be able to view the five key fields required to create a lead.
- * Customer service agents must be able to view only cases they own.

You need to set the appropriate level of security for each scenario.

Which levels of security should you set? To answer, move the appropriate levels of security to the correct scenarios. You may use each level once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Levels of security	Scenarios with the security level required to be set
:: App	<div style="display: flex; align-items: center;"> ■ Scenario </div>
:: Row	Salespeople must not be able to display or access a contact's credit card number.
:: Form	Sales assistants must be able to view the five key fields required to create a lead.
:: Column	Customer service agents must be able to view only cases they own.

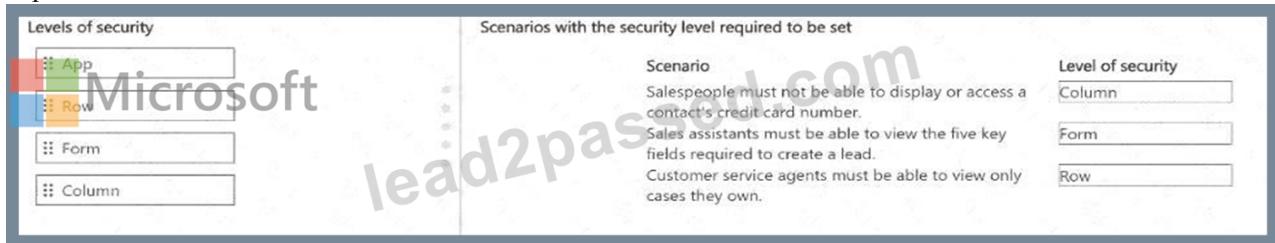

Answer:

Explanation:

Levels of security
:: App
:: Row
:: Form
:: Column

Scenarios with the security level required to be set	Level of security
<div style="display: flex; align-items: center;"> ■ Scenario </div>	:: Column
Salespeople must not be able to display or access a contact's credit card number.	:: Form
Sales assistants must be able to view the five key fields required to create a lead.	:: Row
Customer service agents must be able to view only cases they own.	

Explanation:

NEW QUESTION # 24

You need to recommend the field type to use for configuring meal selections during reservation.

Which field type should you recommend?

- A. Global Option Set
- B. Two Options
- C. Lookup
- D. Option Set

Answer: D
