The meaning of qualifying examinations is, in some ways, to prove the candidate's ability to obtain qualifications that show your ability in various fields of expertise. If you choose our SDS study materials, you can create more unlimited value in the limited study time, learn more knowledge, and take the exam that you can take. Through qualifying examinations, this is our SDS Study Materials and the common goal of every user, we are trustworthy helpers, so please don't miss such a good opportunity.

The TestValid is a reliable and trusted platform that is committed to making the Senior Data Scientist (SDS) exam preparation instant, simple and successful. To do this the TestValid is offering top-rated and real Senior Data Scientist (SDS) exam questions with high-in-demand features. These features are inclusively designed to ace the DASCASDS exam preparation.

## SDS Certified - SDS Valid Test Simulator

Free demo for SDS learning materials is available, you can try before buying, so that you can have a deeper understanding of what you are going to buy. We also recommend you to have a try before buying. In addition, SDS training materials contain both questions and answers, and it's convenient for you to check answers after practicing. SDS Exam Dumps cover most of the knowledge points for the exam, and you can have a good command of the knowledge points by using SDS exam dumps. We have online and offline chat service, if you have any questions, you can consult us.

## DASCA Senior Data Scientist Sample Questions (Q44-Q49):

### NEW QUESTION # 44

Which of the following is the common evolutionary algorithm of neural networks?

- A. Genetic programming
- B. Evolution strategy
- C. Genetic algorithm
- D. All of the above

**Answer: D**

Explanation:

Evolutionary algorithms are optimization techniques inspired by natural selection. They are often applied in neural network optimization for evolving architectures, weights, or hyperparameters.

Genetic Algorithm (Option A): Uses selection, crossover, and mutation to evolve neural network parameters.

Genetic Programming (Option B): Evolves computer programs or expressions; can be applied to evolve neural network structures.

Evolution Strategy (Option C): Focuses on optimization using mutation and adaptation of parameters.

Since all are used as evolutionary approaches in neural networks, the correct answer is Option D (All of the above).

### NEW QUESTION # 45

Which of the following is correct?

i. LaTeX is used to publish work in a scientific journal

ii. LaTeX is a markup language that can be compiled into formatted documents iii. LaTeX is for publishing scientific papers

- A. i, ii, iii
- B. ii, iii
- C. i, ii
- D. i, iii

**Answer: A**

Explanation:

LaTeX is a high-quality typesetting system widely used in academia, particularly in scientific publishing.

Statement i: Correct. LaTeX is widely used to prepare manuscripts for scientific journals, theses, and technical reports.

Statement ii: Correct. LaTeX is a markup language (similar to HTML in concept) that compiles into formatted PDFs/documents.

Statement iii: Correct. LaTeX is a standard for publishing scientific papers due to its ability to handle complex mathematical equations, references, and formatting.

Thus, all three statements are true # Option B (i, ii, iii).

### NEW QUESTION # 46

Which of the following is NOT Structured data?

- A. Relational databases
- B. Data tables
- C. None of the above
- D. CSV files
- E. XML

**Answer: E**

Explanation:

Structured data refers to highly organized data stored in predefined formats such as rows and columns.

Relational databases (Option A): Structured.

Data tables (Option B): Structured.

CSV files (Option C): Structured because they are tabular with rows and columns.

XML (Option D): Not structured but semi-structured because it stores hierarchical information with tags and attributes.

Thus, the correct answer is Option D (XML).

#### NEW QUESTION # 47

The grid computing environment uses a middleware to:

- A. Combine computing resources
- B. Divide computing resources
- C. Both A and B
- D. None of the above

**Answer: C**

Explanation:

Grid computing is a distributed computing model where resources (CPU, memory, storage) are pooled across multiple systems to solve large-scale problems.

Option A (Divide): Middleware helps allocate or divide resources dynamically to different tasks.

Option B (Combine): Middleware integrates diverse resources into a unified system, making them accessible for parallel computing.

Option C: Correct - middleware is the "glue" that enables both combining and dividing resources seamlessly across distributed nodes.

Option D: Incorrect.

Thus, grid computing middleware both combines and divides resources, making Option C correct.

#### NEW QUESTION # 48

Which of the following is TRUE about monetization exercise?

- A. The monetization exercise provides an opportunity to uncover new product and/or service opportunities
- B. The monetization exercise works by first understanding the product usage patterns and customer usage behaviors associated with a particular product and service
- C. Both B and C
- D. All of the above
- E. The monetization exercise process then seeks to identify complementary or secondary recommendations that can be packaged and delivered along with that product or service

**Answer: D**

Explanation:

The monetization exercise is a critical phase in Big Data Business Model Maturity where organizations turn insights into new revenue opportunities.

Option A: Correct. Monetization often uncovers new product or service opportunities by leveraging analytics.

Option B: Correct. The first step is analyzing product usage patterns and customer behaviors to identify hidden value.

Option C: Correct. Insights help in building secondary recommendations or complementary products/services (cross-sell, upsell opportunities).

Thus, all three statements are valid, making the correct answer Option E (All of the above).
