NEW QUESTION # 148
What are two features of the Tableau Server user-based license? (Choose two.)

- A. A subscription license
- B. Restricts the number of machine cores you can deploy
- C. Enables distinct user roles
- D. A perpetual license

Answer: A,C

Explanation:
Tableau Server's user-based licensing model assigns licenses to individual users (Creator, Explorer, Viewer) rather than machines or

cores. Key features include:

* Subscription license: Licenses are typically subscription-based, renewed annually or monthly, aligning with Tableau's pricing model.

* Distinct user roles: It supports three roles (Creator, Explorer, Viewer), each with specific capabilities, enabling granular access control.

* Option A (A subscription license): Correct. User-based licenses are subscription-based by default.

* Option B (Enables distinct user roles): Correct. The model defines Creator, Explorer, and Viewer roles.

* Option C (Restricts the number of machine cores): Incorrect. This applies to core-based licensing, not user-based.

* Option D (A perpetual license): Incorrect. Perpetual licenses were phased out; user-based licenses are subscription-based as of recent models.

NEW QUESTION # 149

Which of the following options below best describe the correct steps to be undertaken when an organization wants to change its identity store from Local Authentication to Active Directory (or vice versa)?

- A. Refer to the REST API developer documentation for pre-built scripts that will automate this process for you
- B. Run the TSM command tsm configuration set to update the authentication mechanism, and then restart your Tableau Server using tsm restart to update the settings
- C. Perform a full uninstall (including manual deletion of directories) and then reinstall Tableau Server once again

Answer: C

Explanation:
