GAQM Certified Business Continuity Professional (CBCP) Sample Questions (Q37-Q42):

NEW QUESTION # 37

In the event of a disaster, notification shall be given to each employee by either the HR Department Manager or through the firm's emergency notice system.

- A. False
- B. True

Answer: B

Explanation:

Explanation

In the event of a disaster, notification shall be given to each employee by either the HR Department Manager or through the firm's emergency notice system. This is true because communication is a vital component of any disaster recovery and business continuity plan. Employees need to be informed of the situation, their roles and responsibilities, and the actions they need to take to ensure their safety and the continuity of the business.

The HR Department Manager or the emergency notice system are the designated channels for communicating with employees during a disaster. Verified References:

NEW QUESTION # 38

There are several reasons why a company would develop and implement a business continuity plan. Which of the following properly describes the best reason?

- A. To increase liability
- **B. The continuation of a company**
- C. Compliance with regulations
- D. Properly react to disasters

Answer: B

Explanation:

The primary reason for developing and implementing a business continuity plan is to ensure the continuation of a company's critical functions and processes in the face of a disruption that may otherwise cause severe losses or damage to the company's reputation, assets, customers, or stakeholders. A business continuity plan can help a company to resume operations as quickly as possible after a disruption, minimize the impact on its performance and profitability, protect its brand and image, and fulfill its legal and contractual obligations.

NEW QUESTION # 39

BIA helps you identify

- **A. All of the above**
- B. Critical interdependencies and interested parties
- C. Critical services and products
- D. Tangible and intangible impact of a disruption over period of time

Answer: A

Explanation:

Explanation

BIA helps to identify all of the above aspects of an organization's functions and processes. It helps to identify the critical services and products that the organization delivers to its customers and stakeholders, and the functions and processes that support them. It also helps to identify the critical interdependencies and interested parties that are involved in or affected by the organization's functions and processes, such as suppliers, partners, regulators, or employees. Moreover, it helps to identify the tangible and intangible impacts of a disruption to the organization's functions and processes over a period of time, such as financial losses, reputational damage, legal liabilities, or customer dissatisfaction. NEW QUESTION # 40

Which of the following can threats be considered? (Choose three)

- **A. Technology failure**
- **B. Water**
- C. Supply chain failure
- **D. Fire**

- E. Operational failure

Answer: A,B,D

Explanation:

Threats can be considered any events or situations that can cause harm or disruption to an organization's functions or processes. Threats can be natural, human-made, or technological in origin. Some examples of threats are water (such as floods, leaks, or spills), technology failure (such as system crashes, cyberattacks, or power outages), and fire (such as arson, accidents, or explosions).

NEW QUESTION # 41

Which control mechanism is the process by which an organization reduces the likelihood of a risk event occurring or mitigates the effects should it occur?

- A. Risk variation
- **B. Risk control**
- C. Risk collision
- D. Risk avoidance

Answer: B

Explanation:

Explanation

Risk control is the control mechanism that is the process by which an organization reduces the likelihood of a risk event occurring or mitigates the effects should it occur. Risk control is the process of implementing measures or actions to modify or influence the risk level of an organization. Risk control can involve various strategies, such as avoidance, reduction, transfer, sharing, retention, or acceptance. Risk control can help to improve the organization's resilience and performance.
