The content and design of our 1z0-591 learning quiz are all perfect and scientific, and you will know it when you use this. Of course, we don't need you to spend a lot of time on our 1z0-591 exam questions. As long as you make full use of your own piecemeal time after 20 to 30 hours of study, you can go to the exam. The users of our 1z0-591 Study Materials have been satisfied with their results. I believe you are the next person to pass the exam!

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q90-Q95):

NEW QUESTION # 90

An organization has its employees' names in an Employees table, and information about their jobs in a Jobs table. However, an organization's employees can have multiple jobs, and the same job can be performed by multiple employees. This situation would result in a many-to-many relationship between the Employees and Jobs tables. How can the many-to-many relationship issue be resolved?

- A. By creating the many to many join in the physical model
- B. By creating a logical table source (LTS) that joins the Employees and Jobs tables
- C. By modeling the many to many relationship in the business model
- D. By creating a bridge table that represents one employee doing one job, with several rows for an employee who has several jobs

Answer: D

Explanation:

When you need to model many-to-many relationships between dimension tables and fact tables, you can create a bridge table that resides between the fact and the dimension tables. A bridge table stores multiple records corresponding to that dimension. In the Administration Tool, General tab in the Logical Table dialog box contains a check box that you can select to specify that a table is a bridge table.

A bridge table allows you to resolve many-to-many data relationships.

Reference: OBI Server Administration Server Guide, Version 10.1, Identifying Bridge Tables

NEW QUESTION # 91

Which resource identifies the OBIEE Web Catalog (webcat)?

- A. Admin Server
- B. nqsconfig.ini
- C. instanceconfig.xml
- D. Identity Store
- E. RCU Schema

Answer: A,D

Explanation:

Explanation/Reference:

C: Oracle Business Intelligence authenticates users and get groups using an Oracle WebLogic Server authentication provider against user information held in an identity store.

Incorrect answers:

A: On 10g, Instanceconfig.xml is THE parameter file of the BI Presentation server. With the advent of 11g, instanceconfig.xml is also the configuration file of Oracle BI Scheduler. The instanceconfig.xml file stores the configuration settings that affect Oracle BI Presentation Services.

B: If you want to install the OBIEE Server you have to create some schemas in the database which will keep the OBIEE repository. For working, OBIEE needs some schemas to be created. This work is done automatically by using rcu (Repository Creation Utility).

In order to create the OBIEE schemas with the RCU, you must have installed an Oracle database (11g).

D: NQSConfig.ini is the main configuration file of Bi Server and contains a lot of parameters.

The file is located in this directory :

11g: ORACLE_INSTANCE/config/OracleBIServerComponent/coreapplication_obisn All changes made to this file require that you restart the Oracle BI Server Service.

Note: OBIEE 10G/11G - The (Web|Presentation) Catalog (Webcat)

The Web Catalog becomes in 11g the Presentation Catalog

publisher objects (such as reports and templates).

Each object is composed of two files:

* its own file. For example, an analysis called Analysis 1 would be stored in a file named Analysis1.

* a attributes file. For example, the analysis called Analysis1 would have a corresponding attributes file named Analysis1.atr.

The attributes file contains:

the object's full name,

access control list (ACL),

description,

and so on.

To access an object in the catalog, users must have appropriate ACL entries for that object. All objects in the catalog use ACL entries.

In 11g, the Everyone group has been replaced with the AuthenticatedUser role. The webcatalog is located:

on 11G: ORACLE_INSTANCE/bifoundation/OracleBIPresentationServicesComponent/catalog/

NEW QUESTION # 92

Which three components are part of a cluster server?

- A. Primary Cluster Controller
- B. Master Server
- C. Server request Controller
- D. Repository Publishing Directory
- E. Web Server

Answer: A,B,E

Explanation:

Oracle BI Cluster Server Components *Oracle Business Intelligence Cluster Controller: The Cluster Controller determines which BI Server works in the cluster. It monitors the operation of servers in the cluster. The Cluster Controller is deployed in active-passive mode.

*Clustered BI Servers: The BI Cluster Server feature supports up to 16 BI Servers in a network domain to act as a single server. BI Servers in the cluster share requests from multiple Oracle BI clients.

*Master BI Server: A clustered Oracle Business Intelligence Server is designated as the Master BI Server. The Oracle Business Intelligence Administration Tool connects to the master BI Server for online repository changes.

*Cluster Manager: The Cluster Manager is available in the Administration Tool when a repository is opened in online mode. The Cluster Manager enables Oracle BI Server clustered instances.

NEW QUESTION # 93

Security Manager is used for _____.

- A. Setting permissions for particular users or application roles
- B. Setting up new Roles and Groups
- C. Setting permissions for individual objects in the Presentation Layer
- D. Setting up new Application Roles

Answer: A

Explanation:

Explanation/Reference:

Security Manager - is used to setup users, groups, synchronize LDAP users and Groups, set access rights for Objects (tables, columns) and to control over when and what data a user can access.

Note: When you open the administration tool, you can reach the security manager by the Menu :

Manage > Security

NEW QUESTION # 94

There are two aggregate tables that are available for query. How would they be mapped into the logical data model so queries can use them?

- A. By opening the two logical Table Source dialog boxes and mapping the appropriate levels in the Content tab
- B. By creating two new logical tables sources
- C. By creating one new Logical Table Source
- D. Both A and B

Answer: A

Explanation:

Explanation

B: Example:

1. Configure the new source table to have the 'logical level' under the content set to 'Countries' (the summarized level)

Dimension	Logical Level
DEPARTMENTSDim	countries

b

2. Do the similar setting for dimension table

Now when user query the data at 'Countries' level, the query will be redirected to these summary table instead of the more detail fact table Note: Aggregate tables are Physical tables that store Aggregates of measures across multiple levels of a Hierarchy.

NEW QUESTION # 95

.....

We offer you free update for one year for 1z0-591 study guide, namely, in the following year, you can obtain the latest version for free. And the latest version for 1z0-591 exam dumps will be sent to your email automatically. In addition, 1z0-591 exam materials are high quality, since we have experienced experts to compile and verify them, therefore the quality and accuracy can be guaranteed, so you can use them at ease. We have online and offline chat service, and if you have any questions about 1z0-591 Exam Dumps, you can consult us, and we will give you reply as quickly as possible.
