GitHub CopilotCertification Exam Sample Questions (Q55-Q60):

NEW QUESTION # 55
How can GitHub Copilot assist with code refactoring tasks?

- A. GitHub Copilot can fix syntax errors without user input.
- B. GitHub Copilot can automatically rewrite code to follow best practices.
- C. GitHub Copilot can remove unnecessary files from the project directory.
- D. GitHub Copilot can suggest refactoring improvements for better code quality.

Answer: D

Explanation:
GitHub Copilot can analyze existing code and suggest refactoring improvements to enhance code quality, readability, and maintainability. It can propose changes to improve code structure, reduce complexity, and follow best practices.

NEW QUESTION # 56
How does GitHub Copilot Enterprise assist in code reviews during the pull request process? (Select two.)

- A. It generates a prose summary and a bulleted list of key changes for pull requests.
- B. It automatically merges pull requests after an automated review.
- C. It can validate the accuracy of the changes in the pull request.
- D. It can answer questions about the changeset of the pull request.

Answer: A,D

Explanation:
GitHub Copilot Enterprise assists in code reviews by generating summaries of pull requests and answering questions about the changes made.

NEW QUESTION # 57
In what way can GitHub Copilot and GitHub Copilot Chat aid developers in modernizing applications?

- A. GitHub Copilot can suggest modern programming patterns based on your code.
- B. GitHub Copilot can create and deploy full-stack applications based on a single query.
- C. GitHub Copilot can directly convert legacy applications into cloud-native architectures.
- D. GitHub Copilot can refactor applications to align with upcoming standards.

Answer: A

Explanation:
GitHub Copilot and GitHub Copilot Chat are powerful AI-driven tools designed to assist developers by providing context-aware code suggestions and interactive support. Specifically, in the context of modernizing applications, GitHub Copilot excels at analyzing existing code and suggesting modern programming patterns, best practices, and syntax improvements that align with contemporary development standards. For example, it can recommend updates to outdated constructs, propose more efficient algorithms, or suggest frameworks and libraries that are widely used in modern application development.
* Why not A?GitHub Copilot does not "directly convert" legacy applications into cloud-native architectures. It can assist by suggesting code changes or patterns that support such a transition, but it doesn't autonomously perform the full conversion process, which involves architectural decisions and deployment steps beyond its scope.
* Why not C?While GitHub Copilot can generate code snippets and even larger portions of an application, it cannot create and deploy full-stack applications from a single query. It requires developer input, refinement, and integration to achieve a complete, deployable solution.
* Why not D?GitHub Copilot can assist with refactoring by suggesting improvements to existing code, but it doesn't inherently "align with upcoming standards" in a predictive sense. Its suggestions are based on current best practices and the data it was trained on, not future standards that are yet to be defined.
Thus,Bis the most accurate and realistic way GitHub Copilot aids developers in modernizing applications, leveraging its ability to provide relevant, context-based suggestions to update and improve codebases.

NEW QUESTION # 58
What role does chat history play in GitHub Copilot's code suggestions?

- A. Chat history is irrelevant to GitHub Copilot and does not affect its functionality.
- B. Chat history is stored and shared with other users to enhance collaboration.
- C. Chat history is used to train the GitHub Copilot model in real-time.
- D. Chat history provides context to GitHub Copilot, improving the relevance and accuracy of its code suggestions.

Answer: D

Explanation:
Chat history provides valuable context to GitHub Copilot, helping it generate more relevant and accurate code suggestions based on previous interactions and conversations.

NEW QUESTION # 59
Why is code reviewing still necessary when using GitHub Copilot to write tests?

- A. Because GitHub Copilot generates the best code possible for the test scenario.
- B. Because GitHub Copilot's generated test cases may not cover all possible scenarios.
- C. Because GitHub Copilot replaces the need for manual testing.
- D. Because GitHub Copilot can cover all possible scenarios in your test cases.

Answer: B

Explanation:
Code review is necessary because GitHub Copilot's generated test cases might not cover all possible scenarios, especially edge cases and complex interactions.
