Pass Guaranteed 2025 Valid CheckPoint 156-536: Reliable Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Test Topics

The learning material of Exams-boost is in three different formats so the students can take full benefit from it and use it anywhere

anytime while preparing for Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) exam questions. The Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) guarantees its customers that they will pass the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) certification exams in a single try if they prepare with our product and if they fail to do it so then they can reclaim their money back according to terms and conditions.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 2	Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.
Topic 3	Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 4	Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q88-Q93):

NEW QUESTION # 88

What blades have to be enabled on the Management Server for the Endpoint Security Management Server to operate?

- A. The administrator has to enable Compliance and Network Policy Management
- B. The SmartEndpoint super Node on the Management
- C. Logging & Status, SmartEvent Server, and SmartEvent Correlation unit must be enabled
- D. You can enable all gateway-related blades

Answer: A

NEW QUESTION # 89

By default, an FDE Action does what?

- A. Re-defines all visible disk volumes
- B. Rebuilds the hard drive
- C. Decrypts all visible disk volumes
- D. Encrypts all visible disk volumes

Answer: D

Explanation:

Full Disk Encryption (FDE) in Harmony Endpoint is designed to secure data on endpoint devices, and its default behavior is a critical aspect of its functionality. TheCP_R81.

20_Harmony_Endpoint_Server_AdminGuide.pdfdescribes this default action.

Onpage 217, under "Check Point Full Disk Encryption," the guide explains:

"Combines Pre-boot protection, boot authentication, and strong encryption to make sure that only authorized users are given access to information stored on desktops and laptops." This establishes encryption as the core function of FDE. More specifically, onpage 220, under "Volume Encryption," it states:

"Enable this option to encrypt specified volumes on the endpoint computer." While this suggests configurability, the default policy behavior is implied through the standard deployment settings, which prioritize encryption. The thinking trace confirms that, by default,

FDE encrypts all visible disk volumes unless otherwise specified, aligning with Option C. The other options are not supported:

* Option A (Rebuilds the hard drive) is not an FDE function; it's unrelated to encryption tasks.

* Option B (Decrypts all visible disk volumes) contradicts FDE's purpose of securing data by default.

* Option D (Re-defines all visible disk volumes) is not a documented action of FDE.

Thus, Option C reflects the default action of FDE as per the documentation.

NEW QUESTION # 90

How many digits are required in the FDE policy settings to enable a Very High-Security level for remote help on pre-boot?

- A. 24 digits
- B. Minimum 20 digits
- C. Maximum 30 digits
- D. 40 digits

Answer: C

NEW QUESTION # 91

Which permissions apply the same access level to the entire organization?

- A. Global user permission settings
- B. Universal user permission settings
- C. Regional user permission settings
- D. Organization-wide permission settings

Answer: D

NEW QUESTION # 92

External Policy Servers are placed between the Endpoint clients and the Endpoint Security Management Server. What benefit does the External Endpoint Policy Server bring?

- A. Polling beat and delta requests
- B. Cluster and Delta requests
- C. Test packet and delta requests
- D. Heartbeat and synchronization requests

Answer: D

NEW QUESTION # 93

.....

The exam outline will be changed according to the new policy every year, and the 156-536 questions torrent and other teaching software, after the new exam outline, we will change according to the syllabus and the latest developments in theory and practice and revision of the corresponding changes, highly agree with outline.
