You have decided to leverage the For Each action to loop through each order and process them individually. How do you configure the For Each action to support this scenario?

- A. Select the Sequential Processing option and set the number of threads to the number of orders.
- **B. Select the Repeating Element field and map the source element that contains the orders.**
- C. Select the Parallel Processing option and set the number of threads to the number of orders.
- D. Select the Group By option separating the orders by their order number.

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

C:True-map repeating element for iteration.

NEW QUESTION # 16

Your design of an asynchronous Oracle Integration Cloud (OIC) integration flow includes the requirement for additional processing logic that is conditionally based on the results returned to the integration instance from earlier external service invocations. You decide to leverage the Switch action to facilitate this implementation.

Which is a valid consideration concerning the configuration and capabilities of the Switch action?

- A. The Switch action must include an otherwise branch.
- B. Data objects returned from actions within a branch of a switch action are not visible in the main flow of the integration after the switch action.
- C. Nested switch actions are not supported, and you may need to create more complex conditional expressions, if necessary.
- **D. XPath version 2.0 functions can be used to create more complex conditional expressions for a branch.**

Answer: D

Explanation:

XPath version 2.0 functions can be used within the Switch action to create more complex conditional expressions for defining branches in Oracle Integration Cloud.

NEW QUESTION # 17

What policy is required to be in an API if that API is to be used under a Plan?

- A. Interface Filtering
- B. Basic Auth
- **C. Key Validation**
- D. Application Rate Limiting

Answer: C

Explanation:

Key Validation ensures that the API is used according to its plan. This policy checks that the correct key or token is presented for accessing the API under the given plan.

NEW QUESTION # 18

You are tasked with provisioning a Managed File Transfer (MFT) Cloud Service on Oracle Cloud Infrastructure (OCI). Which statement is valid concerning MFT provisioning?

- A. Because MFT requires an Oracle ATP database, the database instance must be provisioned in OIC.
- B. Defining virtual machines (compute nodes) for the WebLogic cluster is no longer needed.
- **C. MFT requires creating an Oracle SOA Cloud Service instance and choosing "MFT cluster" as the service type.**
- D. You must include the B2B cluster configuration since the MFT service runs with B2B document.

Answer: C

Explanation:

MFT requires creating an Oracle SOA Cloud Service instance and choosing "MFT Cluster" as the service type. Oracle MFT is available as part of the SOA Cloud Service. During provisioning, selecting "MFT Cluster" ensures that the appropriate infrastructure is set up for the MFT functionalities.

Defining virtual machines: OCI manages the infrastructure for the SOA service, so you typically wouldn't directly manage virtual machines.

B2B cluster: B2B configurations might be used, but it's not mandatory during initial provisioning.

ATP database: MFT does not require a separate Oracle ATP database, as it utilizes an internal database managed by OCI as part of the SOA service.

NEW QUESTION # 19

You are implementing a synchronous Oracle Integration (OIC) integration flow that processes file records within a While loop action. At the end of each loop, you want to delay processing of the next record for a certain period. Which is a valid consideration when using the Wait action in this scenario?

- A. The Wait action can only be positioned as the last action within the loop.
- B. The maximum wait time cannot exceed 20 seconds within a While loop.
- **C. The maximum wait time cannot exceed 300 seconds.**
- D. The Wait action cannot be used in a synchronous flow.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
